Almost 1,000

organizations and institutions across the U.S. look for Color for critical healthcare services and support

Color in California – Proven Experience in a Large and Diverse State

363 CA school districts onboarded

2,200 CA schools signed up

760K+ PCR tests conducted

- Integrated platform for registration, consent, and scheduling
- Logistics and support infrastructure
- ‘Plug and play’ delivery
- Comprehensive reporting and analytics

“We love the platform – it is easy to implement, easy to use, and our staff and students really like it.” – *High Tech Los Angeles*

Introducing

ReadyCheckGo™ Program

Simple and cost-effective coronavirus testing and reporting for K-12 schools

Quality testing

Proven effective result reporting

Providing streamlined processes from facilitating implementation to routine testing for administrators, teachers, staff, students and parents in school districts of any size

Gather confidently. Test intelligently. Educate effectively.

Integrating Experienced Teams to Facilitate In-person Learning

Schools focus on learning...

TEACHING / CHILD DEVELOPMENT

Schools trained and registered to collect and ship samples

...let us focus on the rest.

LAB-BASED TESTING

Samples analyzed by certified clinical labs

Powered by **ThermoFisher** SCIENTIFIC

ONSITE TESTING

Highly sensitive, PCR testing solutions

Important Considerations for Testing in K-12 Schools

An effective testing program should....

Empower teachers to focus on education

Help provide a healthy learning environment for students, teachers and staff with minimal disruption to the day

Help maximize in person learning

Avoid unnecessary quarantines to maximize student attendance

ReadyCheckGo provides....

Easy implementation

Simple software to manage registration, consent and reporting results

Less time processing tests in school

PCR based, high sensitivity results

Proactive, PCR-based screening (99% accuracy) identifies infections early and helps prevent exposure

Easy to Collect Samples

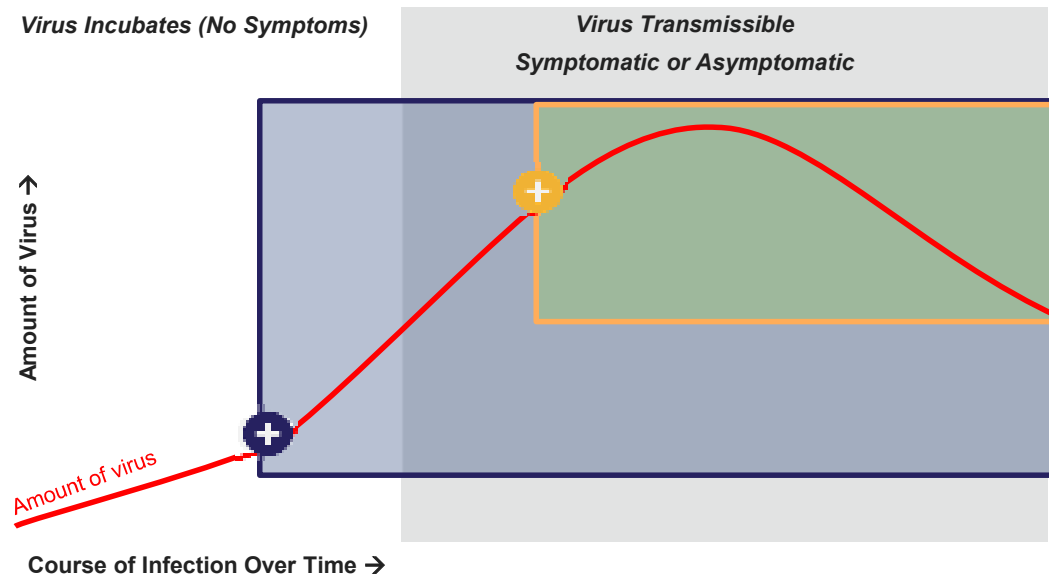

The Thermo Fisher Scientific™ ReadyCheckGo™
Testing Program for grades K-12.

- ✔ Short, gentle swabs
- ✔ Swabbing can be done by students themselves
- ✔ Quick and easy to help reduce class time interruptions

Early Detection of Coronavirus Using PCR Tests

PCR acts as an early warning to remove infected individuals while the amount of virus is low

+ PCR Test Detection

PCR can detect the virus **BEFORE** the virus is transmissible and able to infect others

+ Antigen Test Detection

Antigen can detect the virus when **symptomatic** and at or near peak infection

Seattle WA community screening¹

ASYMPTOMATIC

With similar levels of virus

38%

CHILDREN

7%

ADULTS

Identifying positives early helps reduce the risk of virus being brought into the school

ReadyCheck  Go TM

Testing Program

Simplified testing, easy to implement,
enabling low-risk school environments

ReadyCheckGo Testing Solutions and Support

We offer multiple testing options that lets you choose the right solution for your school testing needs

Results in 24 - 48 hours

Source-pooled PCR test

6 swabs added to 1 tube at school and tested in 1 tube at lab = 1 result for all 6 people tested

Individual PCR test

1 swab collected individually at school and tested in 1 tube at the lab = 1 result for each person tested

Results in 1 hour

Antigen test

1 swab collected individually at school and tested on site at school = 1 result for each person tested

On-Site Staff Support Available

As needed onsite staffing support
Assistance with registration, testing station set-up, monitoring sample collection, packaging samples for shipment

On Site Pooled PCR Testing

How it works

Onsite collection

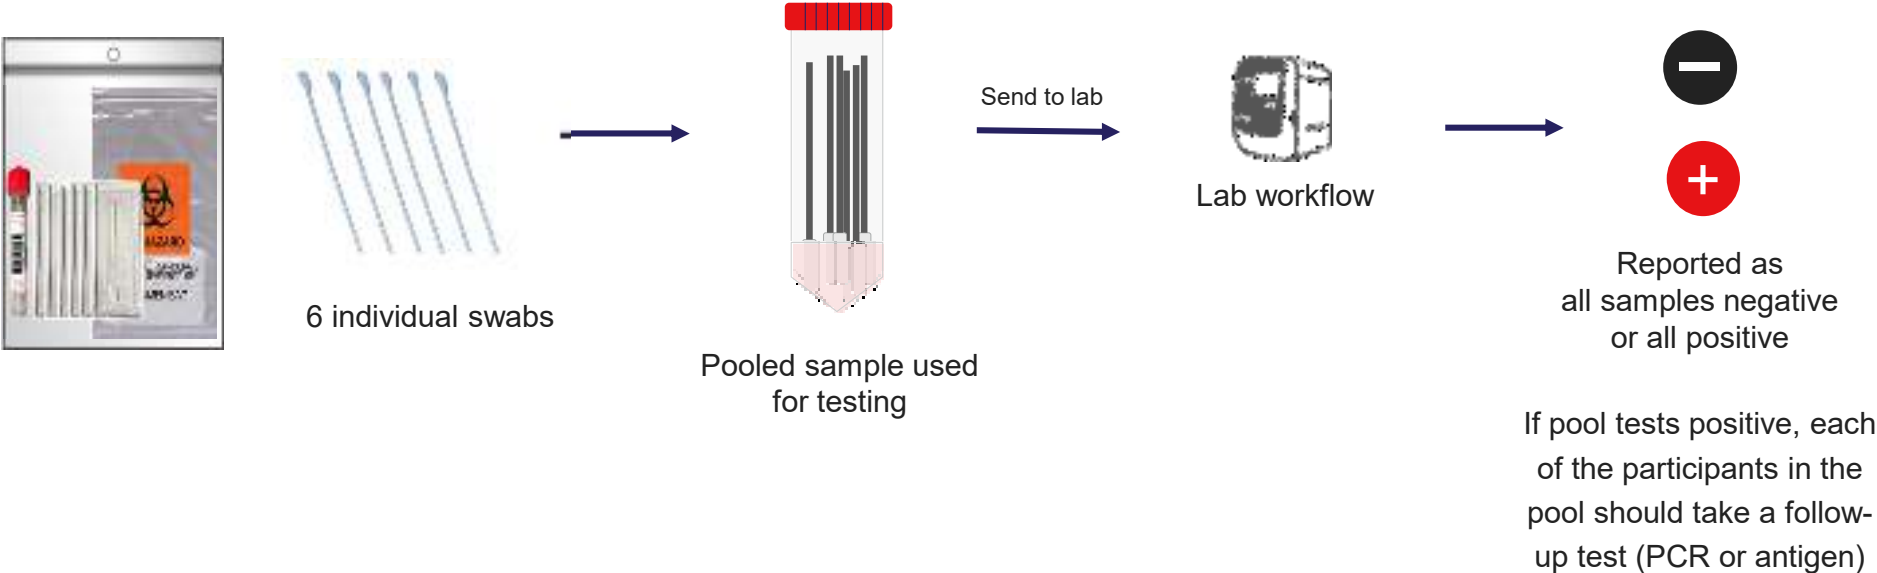

Sample analysis
at laboratory

- 6 samples collected in 1 tube onsite
- Sent to lab for analysis
- Results within 24 to 48 hours

On-Site Pooling Workflow

Combines swabs from multiple people into a single tube for consolidated testing

On-Site Pooling Protocol

Easy-to-order Swab Kits and Easy-to-ship Specimen Packs*

Example: Materials for On Site Pooled testing option

Collection kit

For swabbing and sending tests

Contains materials to collect and package samples for shipping

Collection materials

Swabs, collection tube and specimen bag

Shipping materials

FedEx airbill and shipping container/envelope

QR code

Easily accessible, interactive step-by-step instructions and video

Individual PCR Testing

How it works

Onsite collection

Sample analysis
at laboratory

- Single sample collected on-site
- Sample tested individually at the lab
- Results within 24 to 48 hours

Easy-to-order Swab Kits and Easy-to-ship Specimen Packs*

Example: Materials for individual testing option

Collection kit

For swabbing and sending tests

Contains materials to collect and package samples for shipping

Collection materials

Swabs, collection tube and specimen bag

ReadyCheckGo: Let's Get Started

Coronavirus Testing Made Easy

From sign up to results, we take care of the logistics

Simple, seamless process

- Bilingual consent & registration
- Comfortable self-swab kits
- Real-time result dashboards

Robust training & support

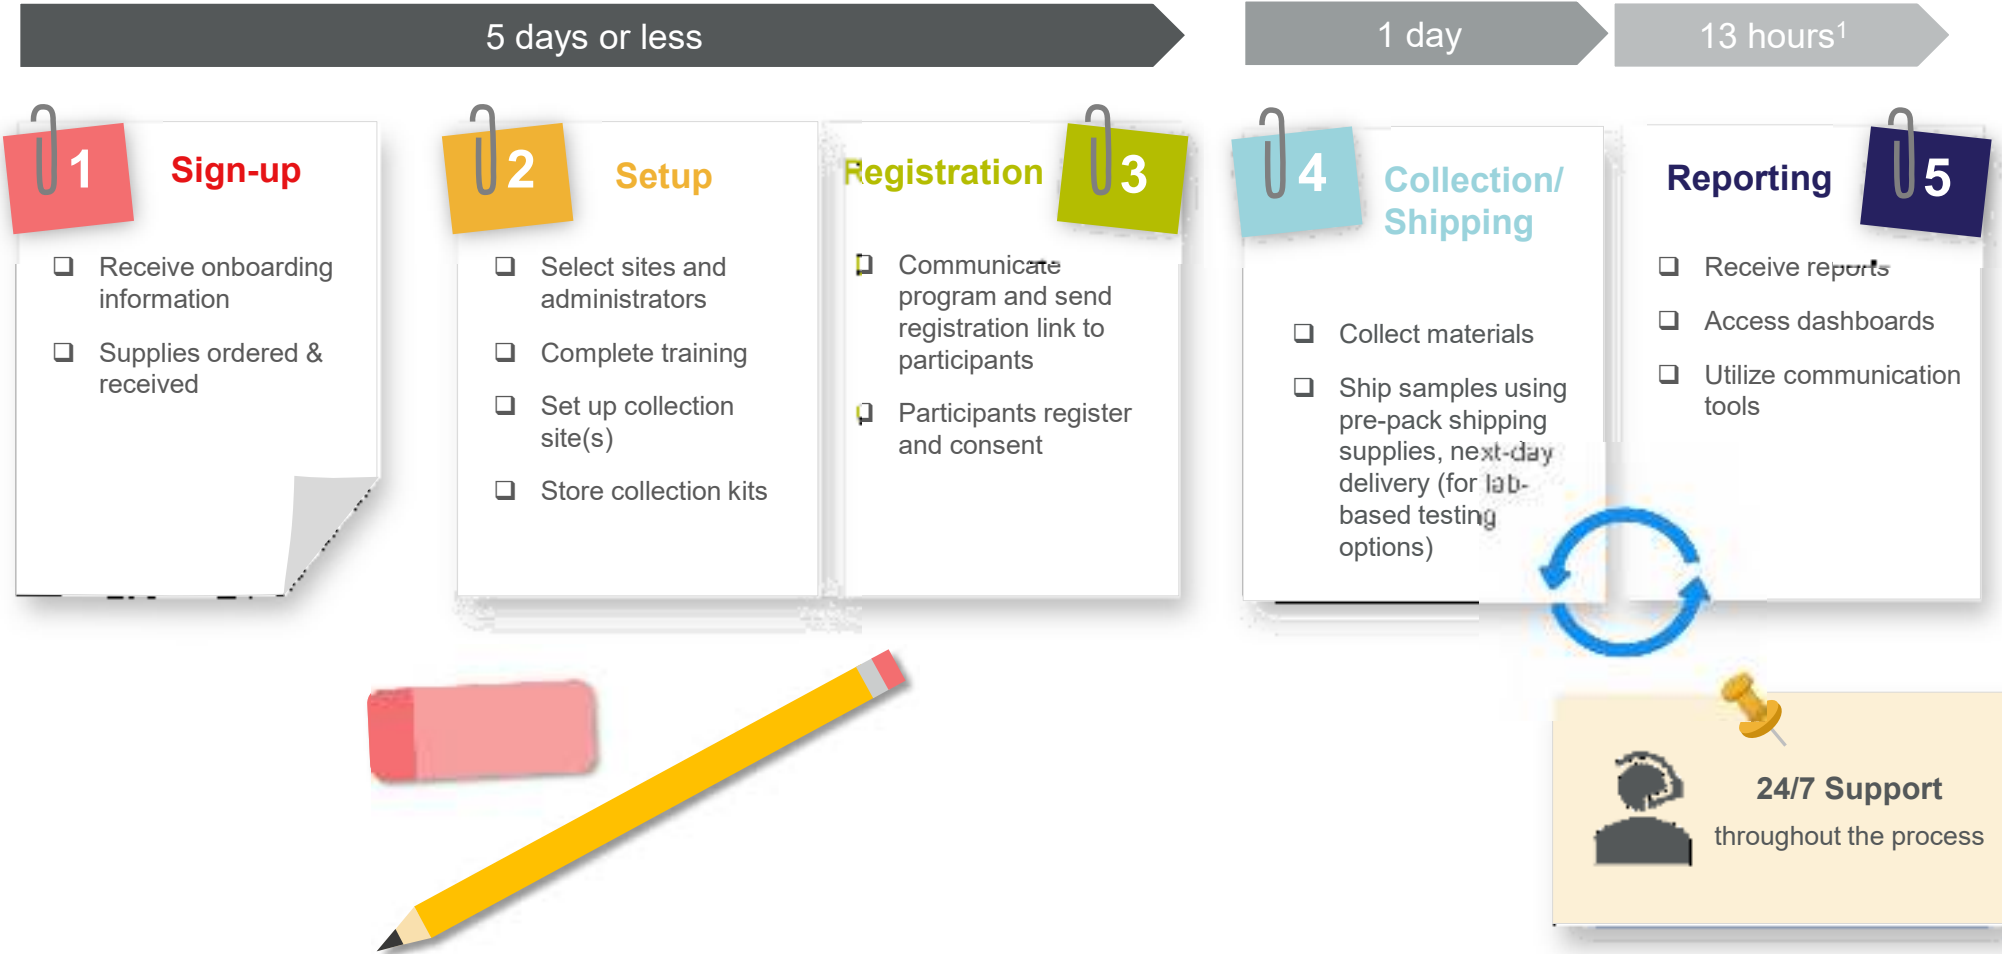

- 24/7 support
- Live & video trainings
- Support and collateral for staff & families

Light-touch logistics

- Requires minimal staff
- Simplified kit ordering
- Free ship-back boxes & shipping

Start to Finish – From Implementation to Routine Testing in 1 Week

¹Median turn-around-time (TAT) from accession to result

Streamlined Sign Up Process to Get Started Quickly

1 - **Sign-up**

- Receive onboarding information
- Supplies ordered & received

- Dedicated account support to assist with sign up
- Full access to online administrator and parent support materials
- Welcome kit shipped promptly upon sign up, which includes:

Set-up Flyers for Admins

Program Overview Brochure

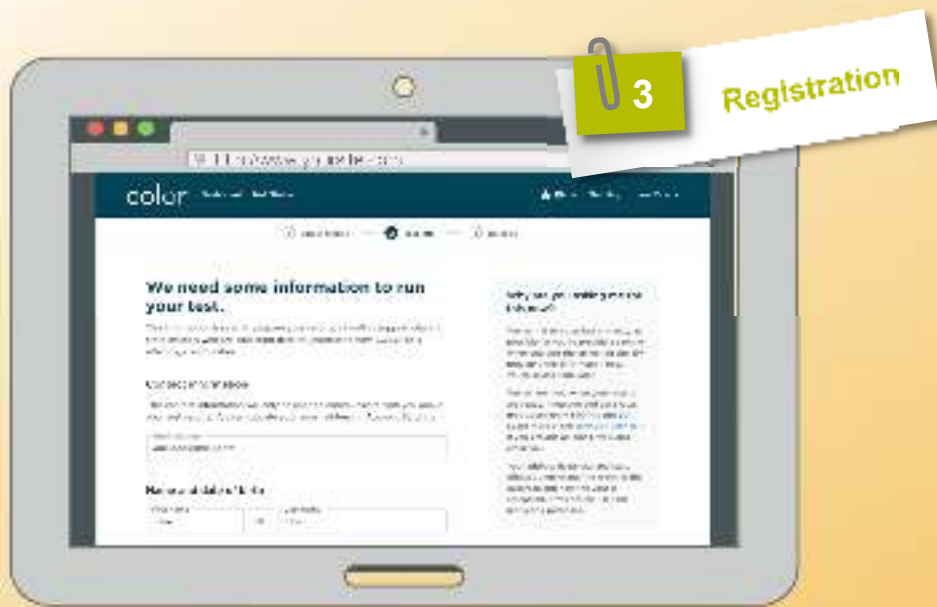

How to Swab Poster

Tube holders
(tube not included)

Simplified Registration and Community Outreach

Intuitive registration and participant insights

Email templates in English and Spanish

Support When You Need It

Receive robust support implementing and administering your testing program

- ✓ Thorough onboarding and registration support to get your program up and running quickly
- ✓ Comprehensive training materials for staff and teachers to manage sample collection
- ✓ On-site support
- ✓ Dedicated phone and email support for schools and families
- ✓ Weekly office hours for TX- Every Thursday at Noon

What Our ReadyCheckGo Customers Are Saying

We love the student swabs. It gives them a sense of empowerment and involvement in the testing process that they even love. We've even heard them tell their friends about their experience.

Customer service has been A-1 since Day 1. From the first day of testing to regular check-ins, COLOR and Thermo Fisher have been there every step of the way. They are just wonderful.

It only took 10-14 days to implement the first pool test. It's not something that requires months and months of planning.

I think as we look to the next school year and with ever-changing guidelines from the CDC, **testing provides has comfort and peace of mind that our students and staff are safe.**

Allow us to help you!

Allow us to assist with any next steps or simply answer questions you may have.
