

## Organization Information

Organization Name: Paper Education

Driven by the mission to democratize education, Paper Education is the leader in personalized learning. Partnering with innovative schools and school districts, Paper helps deliver educational equity through our best-in-category Educational Support System (ESS) that offers virtual, on-demand 1:1 access to 24/7 tutors (synchronous) and essay reviewers (asynchronous). Through Paper's holistic approach, all stakeholders in the education ecosystem are supported: students have access to unlimited academic support to raise performance, parents/guardians are relieved of the burden of providing extra help, teachers gain educational assistants to further personalize learning and administrators can monitor and pinpoint areas where help is needed to bridge learning gaps.

Organization Description: With Paper, students receive unlimited, 24/7 one-on-one tutoring (synchronous) for all subjects, delivered on-demand by a live educator through Paper's virtual classroom in multiple languages. Access is easy and intuitive for students across multiple devices.

Paper also provides students with essay review (asynchronous), where students can upload any piece of written work and receive an annotated version of their work back within twenty-four hours.

All student activity on Paper is recorded, tracked, and made readily available to school teachers and administrators. This equips teachers with real-time transparent insights on how their students are learning outside the traditional classroom and helps educators further personalize their instruction. These insights can be accessed in real-time through the teacher and administrator dashboards on the platform and/or reports can be customized and sent via email on a set schedule.

## Tutor Types

Please list the types of tutors your organization has available (e.g., college students, retired teachers, etc.).

Every member of our culturally diverse and multilingual team of certified tutors is carefully selected to make sure students get the very best help on demand. All our tutors are employees of Paper. We hire high-performing college students or graduates out of top colleges and universities across North America, experts across K-12 subject areas.

## Number of Available Tutors

1,100
