

Organization Information

Organization Name: UpReach Learning

UpReach Learning is a Texas-based, non-profit organization established by former certified teachers and school administrators. We provide high-quality educational services, including Mathematics and ELAR tutoring; supplemental academic courses and classes; workshops, and academic counseling services for grade levels K-12.

Organization Description: The UpReach team has significant experience in working with students of various backgrounds and learning levels, in virtual and in-person settings. Our program is tailored to each student's needs, is coordinated with the student's primary school curriculum, and is aligned with TEA's standards.

UpReach Learning will provide high-dosage, results-oriented, one-on-one or small-group tutoring to students who have been identified as needing additional support. Student tutoring sessions will be customized, based on achievement data, the student's primary curriculum, teacher recommendations, and parental feedback. Student learning will be monitored by the tutor, and sessions will be adjusted, as needed, to ensure the tutoring is improving academic outcomes.

Tutor Types

Please list the types of tutors your organization has available (e.g., college students, retired teachers, etc.).

College Students. Retired teachers. Teacher Aids, Teacher Candidates, and Paraprofessionals.
