Implementation

The self-assessment rubric is organized within a diagnostic framework that addresses areas of compliance across three domains. Within the Implementation domain, the leadership team will consider practices related to the design and implementation of special population programs that meet the requirements of the identified special population programs. In addressing each item of the rubric, the leadership team will consider four guiding questions related to the Implementation domain.

Are the program procedures compliant with state and federal rules and regulations?

Are special population supports and services implemented with fidelity?

Are special populations identified students prepared for the next step in the education experience?

Do policies and procedures ensure the identification of students displaying a need for special populations programs and services?
