# College Admissions Testing Results for Graduating Seniors in Texas Public Schools, Class of 2019 

This report presents SAT and ACT examination participation and performance data for graduating seniors in Texas public schools. College admissions examination results are used by colleges and universities to make admissions decisions, to place students in appropriate freshman courses, and to award scholarships to students. In Texas, moreover, results for public school students are used in the public school accountability system in evaluating the performance of districts and campuses in the assignment of rating labels and in awarding distinction designations, which recognize school districts and campuses for outstanding achievement in specified academic areas (Texas Education Agency [TEA], 2020b; Texas Education Code Chapter 39, Subchapter G, 2019). In addition, results are used in determining eligibility for student exemptions from Texas Success Initiative assessment requirements and in substituting for certain end-of-course assessments to meet graduation requirements (Title 19 of the Texas Administrative Code §101.4002, 2020, amended to be effective February 23, 2020; TEC $\S 39.025,2019$ ).

For the 2020 accountability ratings cycle, all districts and campuses received a label of Not Rated: Declared State of Disaster.

Extraordinary public health and safety circumstances caused by the COVID-19 pandemic led to the closure of schools during the state's testing window and inhibited the ability of the state to measure district and campus performance accurately.

It may be informative to compare a group's performance results over time, but the reliability of such comparisons depends on the sizes of all groups. When a group is small, compared to other groups, reliability is reduced, and caution should be used when interpreting change over time. In general, changes in the performance of a large group, such as White SAT examinees in Texas, are less likely to have occurred by chance than changes in the performance of a small group, such as American Indian or Pacific Islander SAT examinees in Texas. The reliability of between-group comparisons also depends on the sizes of the groups. When groups differ substantially in size, comparisons of performance results between them can be misleading and, generally, are not appropriate. For example, the American Indian and Pacific Islander examinee populations are small in number, compared to other racial/ethnic examinee populations. Therefore, performance results for these groups should not be compared
from year to year or to other racial/ethnic groups.

Texas public school SAT and ACT performance calculations changed with the class of 2018. For the class of 2017 and earlier classes, performance results were based on each examinee's most recent tests. Beginning with the class of 2018, performance results were based on each examinee's best section scores across all tests taken. Those scores were used to calculate SAT total scores and ACT composite scores. These SAT total scores and ACT composite scores are commonly known as "superscores." Because of the changes in how examinee scores were calculated, performance results for the class of 2018 and later classes are not comparable to results for the class of 2017 and earlier classes.

Texas public school SAT and ACT participation rate calculations also changed with the class of 2018. For the class of 2017 and earlier classes, TEA received examinees' scores from the testing companies based on studentreported expected year of graduation. Beginning with the class of 2018, TEA received scores from the testing companies based on year of test administration. Because of the changes in how graduating examinees were
identified, caution should be used when comparing participation results for the class of 2018 and later classes with results for the class of 2017 and earlier classes. The College Board began administering a redesigned version of the SAT in March 2016. Scores for the small percentage of class of 2019 examinees who took the previous version of the test were converted to scores comparable to those for the redesigned version of the test using College Board's concordance tables (College Board, 2016). This made it possible to determine the best scores across the two versions of the test and to summarize data for the class of 2019 SAT examinee population as a whole.

For additional information about SAT and ACT examinations and results reported by the TEA Division of Research and Analysis, including definitions of terms and explanations of calculations, please see College Admissions Testing General Information, Class of 2019 (TEA, 2021a) and College Admissions Testing Glossary of Terms, Class of 2019 (TEA, 2021b). Results for Texas public and nonpublic schools combined are presented in the report College Admissions Testing Results for Graduating Seniors in Texas and the United States, Class of 2019 (TEA, 2020a).

## Highlights

## Comparison of Results Across Years

Beginning with results for the class of 2012, Texas public school SAT and ACT participation rate calculations were changed to include students served in special education programs in the denominators. Consequently, participation results for the class of 2012 and later classes are not comparable to results for the class of 2011 and earlier classes. Texas public school SAT and ACT participation rate calculations changed again with the class of 2018. For the class of 2017 and earlier classes, the Texas Education Agency (TEA) received examinees' scores from the testing companies based on student-reported expected year of graduation. Beginning with the class of 2018, TEA received scores from the testing companies based on year of test administration. Because of the changes in how graduating examinees were identified, caution should be used when comparing participation results for the class of 2018 and later classes with results for the class of 2017 and earlier classes.

Students may take the SAT and ACT more than once. For the class of 2017 and earlier classes, TEA based performance results on each examinee's most recent tests. Beginning with the class of 2018, TEA based performance results on each examinee's best section scores across all tests taken. Those scores were used to calculate SAT total scores and ACT composite scores. An examinee's best scores on the evidencebased reading and writing (ERW) and mathematics sections were summed to calculate the examinee's SAT total score, and an examinee's best English, mathematics, reading, and science section scores were averaged to calculate the examinee's ACT composite score. These SAT total scores and ACT composite scores are commonly known as "superscores." Because of the changes in how examinee scores were calculated, performance results for the class of 2018 and later classes are not comparable to results for the class of 2017 and earlier classes.

## Academic Achievement and Postsecondary Readiness Distinction Designations

- Of the 355,605 Texas public high school graduates in the class of 2019, a total of 266,624 (75.0\%) took the SAT, the ACT, or both examinations (Table 1 on page 9). The overall SAT/ACT participation rate for the class of 2019 was 0.4 percentage points higher than the rate for the class of 2018 (74.6\%).
- For the 224,887 graduates in the class of 2019 who took the SAT, the average English language arts (ELA) score (where ELA score is defined as an examinee's ERW score) was 517, a decrease of 4 points from the class of 2018 (Table 12 on page 21).
- For the 126,323 graduates in the class of 2019 who took the ACT, the average ELA score (where ELA score is defined as the average of an examinee's English and reading scores) was 20.3, unchanged from the class of 2018 (Table 25 on page 42).
- For graduates in the class of 2019 who took the SAT, the average mathematics score was 510 , a decrease of 5 points from the class of 2018 (Table 12 on page 21).
- For graduates in the class of 2019 who took the ACT, the average mathematics score was 20.4 , a decrease of 0.2 points from the class of 2018 (Table 25 on page 42).
- For graduates in the class of 2019 who took the ACT, the average science score was 20.8 , a decrease of 0.1 points from the class of 2018 .
- Of graduates in the class of 2019 who took the SAT, 38.6 percent met the college-ready graduates Texas Success Initiative (TSI) criteria for the SAT in both ELA and mathematics (a score of 480 or higher on the ERW section and a score of 530 or higher on the mathematics section), a decrease of 2.2 percentage points from the class of 2018 (Table 11 on page 20).
- Of graduates in the class of 2019 who took the ACT, 32.3 percent met the college-ready graduates TSI criteria for the ACT in both ELA and mathematics (a score of 19 or higher on the English section and on the mathematics section and a composite score of 23 or higher), a decrease of 0.7 percentage points from the class of 2018 (Table 24 on page 41).

## SAT and ACT Combined

- Among the 355,605 Texas public high school graduates in the class of 2019, a total of 266,624 ( $75.0 \%$ ) took the SAT, the ACT, or both examinations (Table 1 on page 9). Of those examinees, 36.1 percent met the college-ready graduates TSI criteria for the SAT or the ACT in both ELA and mathematics, a decrease of 1.8 percentage points from the class of 2018 (Table 2 on page 10).
- Of the 355,605 graduates in the class of 2019, 27.1 percent met the college-ready graduates TSI criteria for the SAT or the ACT in both ELA and mathematics, a decrease of 1.2 percentage points from the class of 2018 (Table 6 on page 14). Of those examinees, 17.5 percent scored at or above the criterion score on the SAT (a total score of 1180) or the ACT (a composite score of 24), a decrease of 0.6 percentage points from the class of 2018 (Table 7 on page 15).

## SAT

- Of the 355,605 Texas public high school graduates in the class of 2019, a total of 224,887 (63.2\%) took the SAT examination (Table 9 on page 18). The overall SAT participation rate for the class of 2019 was 1.5 percentage points higher than the rate for the class of 2018 (61.7\%).
- Of graduates in the class of 2019 who took the SAT, 38.6 percent met the college-ready graduates TSI criteria for the SAT in both ELA and mathematics, a decrease of 2.2 percentage points from the class of 2018 (Table 11 on page 20).
- For SAT examinees in the class of 2019, the average scores on the separate sections of the test were 517 on the ERW section and 510 on the mathematics section, decreases of 4 points and 5 points, respectively, from the class of 2018 (Table 12 on page 21). The average total score was 1027, a decrease of 9 points from the class of 2018.
- Of graduates in the class of 2019 who took the SAT, 42.9 percent took the test more than once, an increase of 1.1 percentage points from the class of 2018 (Table 15 on page 24). The average number of SAT examinations taken was 1.6.
- Of graduates in the class of 2019 who took the SAT once, 25.8 percent met the college-ready graduates TSI criteria for the SAT in both ELA and mathematics (Table 16 on page 25). Of graduates who took the SAT more than once, 55.6 percent met TSI criteria for the SAT in both ELA and mathematics.
- For graduates in the class of 2019 who took the SAT once, the average scores on the separate sections of the test were 486 on the ERW section and 477 on the mathematics section (Table 17 on page 27). The average total score was 963 . For graduates who took the SAT more than once, the average scores on the separate sections of the test were 557 on the ERW section and 554 on the mathematics section. The average total score was 1112.
- The College Board offers school districts the opportunity to administer the SAT during a regular school day, here referred to as "district testing." The SAT is also offered nationally on several weekend testing dates during the year, here referred to as "national testing." Of graduates in the class of 2019 who took the SAT, 46.5 percent participated in national testing only, 36.7 percent participated in district testing only, and 16.8 percent participated in both national and district testing (Table 18 on page 30).
- Of graduates in the class of 2019 who participated in SAT national testing only, 46.1 percent took the test more than once (Table 19 on page 32). Of graduates who participated in district testing only, 12.6 percent took the test more than once.
- For graduates in the class of 2019 who took the SAT, the percentages meeting the college-ready graduates TSI criteria for the SAT in both ELA and mathematics were 51.0 percent for those who participated in national testing only, 17.0 percent for those who participated in district testing only, and 51.5 percent for those who participated in both national and district testing (Table 20 on page 34).
- For graduates in the class of 2019 who participated in SAT national testing only, the average ERW section score was 551 , the average mathematics section score was 544 , and the average total score was 1094 (Table 21 on page 36). For graduates who participated in district testing only, the average ERW section score was 459 , the average mathematics section score was 452 , and the average total score was 911 . For graduates who participated in both national and district testing, the average ERW section score was 550 , the average mathematics score was 544 , and the average total score was 1094 .

## ACT

- Of the 355,605 Texas public high school graduates in the class of 2019, a total of 126,323 (35.5\%) took the ACT examination (Table 22 on page 39). The overall ACT participation rate for the class of 2019 was 2.2 percentage points lower than the rate for the class of $2018(37.7 \%)$.
- Of graduates in the class of 2019 who took the ACT, 32.3 percent met the college-ready graduates TSI criteria for the ACT in both ELA and mathematics, a decrease of 0.7 percentage points from the class of 2018 (Table 24 on page 41).
- For ACT examinees in the class of 2019, the average scores on the separate sections of the test were 19.3 on the English section, 20.4 on the mathematics section, 21.2 on the reading section, and 20.8 on the science section (Table 25 on page 42). The average composite score was 20.6 .
- Between the class of 2018 and the class of 2019, average scores decreased on the English and science sections of the ACT by 0.1 points each, and on the mathematics section by 0.2 points. The average score on the reading section and the composite score remained the same.
- Of graduates in the class of 2019 who took the ACT, 32.8 percent took the test more than once, a decrease of 1.3 percentage points from the class of 2018 (Table 28 on page 45). The average number of ACT examinations taken was 1.5 .
- Of graduates in the class of 2019 who took the ACT once, 23.4 percent met the college-ready graduates TSI criteria for the ACT in both ELA and mathematics (Table 29 on page 46). Of graduates who took the ACT more than once, 50.7 percent met the college-ready graduates TSI criteria for the ACT in both ELA and mathematics.
- For graduates in the class of 2019 who took the ACT once, the average scores on the separate sections of the test were 17.8 on the English section, 19.4 on the mathematics section, 19.7 on the reading section, and 19.5 on the science section (Table 30 on page 48). The average composite score was 19.2. For graduates who took the ACT more than once, the average scores on the separate sections of the test were 22.5 on the English section, 22.7 on the mathematics section, 24.3 on the reading section, and 23.5 on the science section. The average composite score was 23.4.
- ACT, Inc. offers school districts the opportunity to administer the ACT during a regular school day, here referred to as "district testing." The ACT is also offered nationally on several weekend testing dates during the year, here referred to as "national testing." Of graduates in the class of 2019 who took the ACT, 63.7 percent participated in national testing only, 28.2 percent participated in district testing only, and 8.1 percent participated in both national and district testing (Table 31 on page 51 ).
- Of graduates in the class of 2019 who participated in ACT national testing only, 37.2 percent took the test more than once (Table 32 on page 53). Of graduates who participated in district testing only, 3.6 percent took the test more than once.
- For graduates in the class of 2019 who took the ACT, the percentages meeting the college-ready graduates TSI criteria for the ACT in both ELA and mathematics were 39.1 percent for those who participated in national testing only, 14.0 percent for those who participated in district testing only, and 42.7 percent for those who participated in both national and district testing (Table 33 on page 55).
- For graduates in the class of 2019 who participated in ACT national testing only, the average English section score was 20.7, the average mathematics section score was 21.3 , the average reading section
score was 22.5 , the average science section score was 21.9 , and the average composite score was 21.7 (Table 34 on page 57). For graduates who participated in district testing only, the average English section score was 15.7, the average mathematics section score was 18.0 , the average reading section score was 17.8 , the average science section score was 17.9 , and the average composite score was 17.5. For graduates who participated in both national and district testing, the average English section score was 21.3 , the average mathematics section score was 21.8 , the average reading section score was 23.1 , the average science section score was 22.5 , and the average composite score was 22.3.

## Results for Texas Public Schools: SAT and ACT Combined

## Comparison of Results Across Years

Beginning with results for the class of 2012, Texas public school SAT and ACT participation rate calculations were changed to include students served in special education programs in the denominators. Consequently, participation results for the class of 2012 and later classes are not comparable to results for the class of 2011 and earlier classes. Texas public school SAT and ACT participation rate calculations changed again with the class of 2018. For the class of 2017 and earlier classes, the Texas Education Agency (TEA) received examinees' scores from the testing companies based on student-reported expected year of graduation. Beginning with the class of 2018, TEA received scores from the testing companies based on year of test administration. Because of the changes in how graduating examinees were identified, caution should be used when comparing participation results for the class of 2018 and later classes with results for the class of 2017 and earlier classes.

Students may take the SAT and ACT more than once. For the class of 2017 and earlier classes, TEA based performance results on each examinee's most recent tests. Beginning with the class of 2018, TEA based performance results on each examinee's best section scores across all tests taken. Those scores were used to calculate SAT total scores and ACT composite scores. An examinee's best scores on the evidencebased reading and writing and mathematics sections were summed to calculate the examinee's SAT total score, and an examinee's best English, mathematics, reading, and science section scores were averaged to calculate the examinee's ACT composite score. These SAT total scores and ACT composite scores are commonly known as "superscores." Because of the changes in how examinee scores were calculated, performance results for the class of 2018 and later classes are not comparable to results for the class of 2017 and earlier classes.

Table 1
SAT and/or ACT Participation, Texas Public
Schools, Class of 2009 Through Class of 2019

| Class | Graduates | Examinees | Participation <br> rate $(\%)$ |
| :--- | ---: | ---: | ---: |
| 2009 | 238,346 | 146,648 | 61.5 |
| 2010 | 254,983 | 159,688 | 62.6 |
| 2011 | 264,439 | 182,281 | 68.9 |
| 2012 | 292,636 | 195,682 | 66.9 |
| 2013 | 301,397 | 192,283 | 63.8 |
| 2014 | 303,104 | 200,943 | 66.3 |
| 2015 | 313,387 | 213,939 | 68.3 |
| 2016 | 324,302 | 232,094 | 71.6 |
| 2017 | 334,416 | 245,892 | 73.5 |
| 2018 | 347,883 | 259,546 | 74.6 |
| 2019 | 355,605 | 266,624 | 75.0 |

Source. Primary data from ACT, Inc.; College Board; and Texas Education Agency (TEA).
Note. Because of a change to participation rate calculations, Texas public school SAT and ACT participation results for the class of 2012 and later classes are not comparable to results for the class of 2011 and earlier classes. In addition, because of changes in how graduating examinees were identified, caution should be used when comparing participation results for the class of 2018 and later classes with results for the class of 2017 and earlier classes. See College Admissions Testing General Information, Class of 2019 (TEA, 2021a), and College Admissions Testing Glossary of Terms, Class of 2019 (TEA, 2021b), for additional information.

Source. Primary data from ACT, Inc., College Board and Texas Education Agency (TEA).
Note. The College Board began administering a redesigned version of the SAT in March 2016. Scores for the small percentage of class of 2019 examinees who took the previous version of the test were converted to scores comparable to those for the redesigned version of the test using College Board's concordance tables (College Board, 2016). This made it possible to determine the best scores across the two versions of the test. Students may be counted in more than one category. In the case of either the examinee or the graduate population, sums of student counts by program participation may differ from one another or from the total for that population. See College Admissions Testing General Information, Class of 2019 (TEA, 2021a), for additional information.

## Results for Texas Public Schools: SAT

## Comparison of Results Across Years

Beginning with results for the class of 2012, Texas public school SAT participation rate calculations were changed to include students served in special education programs in the denominators. Consequently, participation results for the class of 2012 and later classes are not comparable to results for the class of 2011 and earlier classes. Texas public school SAT participation rate calculations changed again with the class of 2018. For the class of 2017 and earlier classes, the Texas Education Agency (TEA) received examinees' scores from the College Board based on student-reported expected year of graduation. Beginning with the class of 2018, TEA received scores from the College Board based on year of test administration. Because of the changes in how graduating examinees were identified, caution should be used when comparing participation results for the class of 2018 and later classes with results for the class of 2017 and earlier classes.

Students may take the SAT more than once. For the class of 2017 and earlier classes, TEA based performance results on each examinee's most recent test. Beginning with the class of 2018, TEA based performance results on each examinee's best section scores across all tests taken. Those scores were used to calculate SAT total scores. An examinee's best scores on the evidence-based reading and writing and mathematics sections were summed to calculate the examinee's SAT total score. This SAT total score is commonly known as a "superscore." Because of the changes in how SAT examinee scores were calculated, performance results for the class of 2018 and later classes are not comparable to results for the class of 2017 and earlier classes.

Table 9
SAT Participation, Texas Public Schools, Class
of 2009 Through Class of 2019

| Class | Graduates | Examinees | Participation <br> rate $(\%)$ |
| :--- | ---: | ---: | ---: |
| 2009 | 238,346 | 112,485 | 47.2 |

Source. Primary data from College Board and Texas Education Agency (TEA).
Note. The College Board began administering a redesigned version of the SAT in March 2016. Scores for the small percentages of examinees in the classes of 2018 and 2019 who took the previous version of the test were converted to scores comparable to those for the redesigned version of the test using College Board's concordance tables (College Board, 2016). This made it possible to determine the best scores across the two versions of the test. Because of concordance and rounding, average scores on the evidence-based reading and writing and mathematics sections of the examination may not sum to the average total scores shown. Sums of examinees by race/ethnicity, by economic status, or by gender may differ from one another or from the total of all examinees. See College Admissions Testing General Information, Class of 2019 (TEA, 2021a), for additional information.

Source. Primary data from College Board and Texas Education Agency (TEA).
Note. The College Board began administering a redesigned version of the SAT in March 2016. Scores for the small percentage of class of 2019 examinees who took the previous version of the test were converted to scores comparable to those for the redesigned version of the test using College Board's concordance tables (College Board, 2016). This made it possible to determine the best scores across the two versions of the test. Because of concordance and rounding, average scores on the evidence-based reading and writing and mathematics sections of the examination may not sum to the average total scores shown. Sums of examinees by race/ethnicity, by economic status, or by gender may differ from one another or from the total of all examinees. See College Admissions Testing General Information, Class of 2019 (TEA, 2021a), for additional information.

## Results for Texas Public Schools: ACT

## Comparison of Results Across Years

Beginning with results for the class of 2012, Texas public school ACT participation rate calculations were changed to include students served in special education programs in the denominators. Consequently, participation results for the class of 2012 and later classes are not comparable to results for the class of 2011 and earlier classes. Texas public school ACT rate calculations changed again with the class of 2018. For the class of 2017 and earlier classes, the Texas Education Agency (TEA) received examinees' scores from ACT, Inc., based on student-reported expected year of graduation. Beginning with the class of 2018, TEA received scores from ACT, Inc., based on year of test administration. Because of the changes in how graduating examinees were identified, caution should be used when comparing participation results for the class of 2018 and later classes with results for the class of 2017 and earlier classes.

Students may take the ACT more than once. For the class of 2017 and earlier classes, TEA based performance results on each examinee's most recent test. Beginning with the class of 2018, TEA based performance results on each examinee's best section scores across all tests taken. Those scores were used to calculate ACT composite scores. An examinee's best English, mathematics, reading, and science section scores were averaged to calculate the examinee's ACT composite score. This ACT composite score is commonly known as a "superscore." Because of the changes in how ACT examinee scores were calculated, performance results for the class of 2018 and later classes are not comparable to results for the class of 2017 and earlier classes.

Table 22
ACT Participation, Texas Public Schools, Class of 2009 Through Class of 2019

| Class | Graduates | Examinees | Participation <br> rate $(\%)$ |
| :--- | ---: | ---: | ---: |
| 2009 | 238,346 | 73,938 | 31.0 |
| 2010 | 254,983 | 83,352 | 32.7 |
| 2011 | 264,439 | 91,943 | 34.8 |
| 2012 | 292,636 | 99,710 | 34.1 |
| 2013 | 301,397 | 99,725 | 33.1 |
| 2014 | 303,104 | 106,297 | 35.1 |
| 2015 | 313,387 | 113,765 | 36.3 |
| 2016 | 324,302 | 130,993 | 40.4 |
| 2017 | 334,416 | 133,965 | 40.1 |

Abstract. This report presents SAT and ACT examination participation and performance results in Texas public schools for the class of 2019. Data are provided by student characteristics, including race/ethnicity; gender; and economic, at-risk, dyslexia, English learner, foster care, homeless, immigrant, military-connected, and migrant statuses. Data also are provided by participation in bilingual education or English as a second language, career and technical education, gifted and talented, special education, and Title I programs.

The report is available in PDF format on the agency website at https://tea.texas.gov/reports-and-data/ school-performance/accountability-research/college-admissions-testing-sat-and-act. Additional information about this report may be obtained by contacting the Texas Education Agency Division of Research and Analysis by phone at (512) 475-3523 or by e-mail at Research@tea.texas.gov.
For additional information about the SAT, contact the College Board Southwestern Regional Office at (866) 392-3017 or https://www.collegeboard.org/. For additional information about the ACT, contact ACT, Inc., at (319) 337-1270 or http://www.act.org/.

March 2021

[^0]:    Source. Primary data from ACT, Inc., College Board and Texas Education Agency (TEA).
    Note. The College Board began administering a redesigned version of the SAT in March 2016. Scores for the small percentages of examinees in the classes of 2018 and 2019 who took the previous version of the test were converted to scores comparable to those for the redesigned version of the test using College Board's concordance tables (College Board, 2016). This made it possible to determine the best scores across the two versions of the test. In the case of either the examinee or the graduate population, sums of student counts by race/ethnicity, by economic status, or by gender may differ from one another or from the total for that population. See College Admissions Testing General Information, Class of 2019 (TEA, 2021a), for additional information.
    ${ }^{\text {a }}$ Texas Success Initiative. ${ }^{\mathrm{b}} \mathrm{A}$ score of 480 or higher on the SAT evidence-based reading and writing section or a score of 19 or higher on the English section and a composite score of 23 or higher on the ACT qualifies for an exemption on both the reading and writing sections of the Texas Success Initiative (TSI) assessment. A score of 530 or higher on the SAT mathematics section or a score of 19 or higher on the mathematics section and a composite score of 23 or higher on the ACT qualifies for an exemption on the mathematics section of the TSI assessment. 'English language arts. ${ }^{\text {dEconomically disadvantaged. }}$
