

SPPI 3A Calculation

Number of children with IEPs participating in an assessment

Divided by

Total number of children with IEPs enrolled during the testing window

Multiplied by

100

*Calculate separately for reading and math. Calculate separately for grades 4, 8, and high school. The participation rate is based on all children with IEPs, including both children with IEPs enrolled for a full academic year and those not enrolled for a full academic year and included in the attendance record at time of testing.

(Data reported in ED Facts File C185 and C188)

SPPI 3A Calculation Example

Children with IEPs at the Time of Testing	#
a. Participated in regular assessment based on grade-level achievement standards without accommodations	190
b. Participated in regular assessment based on grade-level achievement standards with accommodations	30
c. Participated in alternate assessment based on alternate achievement standards	25
d. Total enrolled during the testing window (inclusive of students who did not participate in testing)	250

Participation Rate Calculation

$$\begin{aligned}
 \text{Percentage} &= [(a + b + c) / d] \times 100 \\
 &= [(190 + 30 + 25) / 250] \times 100 \\
 &= (245 / 250) \times 100 \\
 &= .98 \times 100 \\
 &= 98\%
 \end{aligned}$$
