

Organization Information

Organization Name:

Organization Description:

Braintrust Tutors is a multidisciplinary educational company that offers individualized K-12 academic tutoring and learning interventions for students of all needs and abilities, including those with learning differences. Our leadership team and faculty:

- › Customizes learning for individualized 1-on-1 and small group instruction, based on the specific needs of each child
- › Creates custom learning programs founded in evidence-based teaching methods
- › Collaborates with families, schools, and educational professionals on strategies and resources to support unique student needs; and
- › Works with families and students with educational decision-making, strategic interventions, academic support, and enrichment

Students are paired exclusively with the same tutor(s), based on specific academic struggles and/or diagnosed disabilities. In this way, we can ensure that each educator is uniquely qualified to create a more impactful and consistent experience for each student. And after each lesson, Braintrust provides parents, educators and other professionals in each child's support network with access to session reports and progress reports to monitor gains and facilitate collaboration.

Tutor Types

Please list the types of tutors your organization has available (e.g., college students, retired teachers, etc.).

Every Braintrust tutor is a certified teacher or learning specialist with in-classroom teaching experience. Each is individually vetted and approved to teach specific grades and skills, and support a range of learning differences, according to his or her training.
