Comment: All Texas is teaching us how to pass the start test. It has been for years. Why don't you let the teacher actually teach. Bring it down to individual learning. Some of these kids don't understand because these teachers don't have time to bring it down to there individual learning on there level. These kids are getting frustrated. Angry, and

wanting to quit. The students are giving up. they think there stupid and can't learn. Why don't we help these kids. instead we punish them for not passing this state test.

The Texas Education Agency's (TEA) Open Education Resources (OER) were developed to provide educators with tier 1 instructional materials that address appropriate grade-level content. The OER instructional materials align to the Texas Essential Knowledge and Skills (TEKS) and promote the use of research-based instructional strategies (RBIS) that support all learners.

Comment: The scope and sequence of grades 6, 7, and 8 reflect 165 days of instruction - which is exactly the number our students attend school for. However, the STAAR is earlier than the last day of school. We could only realistically use the 150 day scope and sequence in order to afford time to teach the material and even then would have to omit some lessons/flexible learning days.

The instructional materials also include a 150-day scope and sequence option.

Comment: With senate bill 2124, and having students automatically enrolled into 6th grade advanced math class, with the intent to have them prepared for Algebra I by 8th grade, taking 150 days to get through only the 7th grade curriculum would not leave any time for compacting in 8th grade standards into 7th grade.

The Grade 7 materials cover 100% of Grade 6 TEKS through the 165-day or 150-day scope and sequence options.
