

# State of Texas Assessments of Academic Readiness Alternate 2 (STAAR® Alternate 2) Performance Level Descriptors Grade 8 Mathematics

## Performance Level Descriptors

### Students achieving Accomplished Performance can

- Determine the rate when given a table of related number pairs
- Connect the concepts of reflections and symmetry
- Transfer information shown on a bar graph to a line graph
- Draw conclusions about income and expenses in real-life situations

### Students achieving Satisfactory Performance can

- Identify number pairs based on numerical relationships that apply to a real-life situation
- Determine a multiplication number sentence for a real-life situation
- Recognize a figure with a line or lines of symmetry
- Determine the value of one data point on a line graph
- Calculate the difference between the original price and the sale price of an item

### Students achieving Developing Performance can

- Locate a line of symmetry
- Recognize a line graph
- Identify a deposit
