"When I was your age, roller skates were all metal, and they fastened onto the bottom of your shoes. Leather straps held the skates around our ankles," Grandma said. "Clamps grabbed on to our toes. You could make the clamps hold better by making them tighter with a key. I used to wear the key around my neck all the time. So I always had it with me when I skated."

Grandma added, "I still have those skates in the attic. You can wear them if you want to go get them. And the wonderful thing about them is that they can be sized to fit anyone."

Grandma sat down next to Jamie on the porch. "You can make the skates fit by loosening them on the back and then moving the front and the back of the skates closer together or farther apart." Grandma held the skates up to Jamie's shoe to get the right fit. Then she tightened the skates with the key.

"Try this," she said.

Jamie put the skates onto the bottom of his shoes. He buckled the leather straps around his ankles. The key helped him tighten the clamps. Then he stood up and started to skate.

"They work! Thanks, Grandma!" Jamie saw his friends down at the corner and started to skate away.

"Wait a minute!" his grandmother called after him. "You forgot the most important part." She held up the key on the string.
