

## TEST ADMINISTRATOR MANUAL

## GRADE 5 Mathematics STAAR Alternate 2

## Administered April 2016

## RELEASED

## Texas Essential Knowledge and Skills (TEKS) Curriculum Assessed

| Grade 5 Mathematics |  | Cluster $\mathbf{1}$ |
| :--- | :--- | :--- |
| Reporting Category 1 | Numerical Representations and Relationships: The <br> student will demonstrate an understanding of how to <br> represent and manipulate numbers and expressions. |  |
| Knowledge and Skills Statement 5.2 | The student applies mathematical process standards to <br> represent, compare, and order positive rational numbers <br> and understand relationships as related to place value. |  |
| Essence Statement | Uses decimals to demonstrate an understanding of place <br> value. |  |
| Item 1 Prerequisite Skill | use the verbal ordinal terms (P-K) |  |
| Item 2 Prerequisite Skill | use place value to compare whole numbers up to 120 <br> using comparative language (1) |  |
| Item 3 Prerequisite Skill | use place value to compare whole numbers up to 120 <br> using comparative language (1) |  |
| Item 4 Prerequisite Skill | use place value to compare and order whole numbers <br> up to 1,200 using comparative language, numbers, and <br> symbols ( $>,<$, or $=)(2)$ |  |

| Grade 5 Mathematics |  | Data Analysis and Personal Financial Literacy: The student <br> will demonstrate an understanding of how to represent <br> and analyze data and how to describe and apply personal <br> financial concepts. |
| :--- | :--- | :--- |
| Reporting Category 4 | The student applies mathematical process standards to <br> solve problems by collecting, organizing, displaying, and <br> interpreting data. |  |
| Knowledge and Skills Statement 5.9 | Uses graphs to organize and interpret data. |  |
| Essence Statement | draw conclusions from real-object and picture graphs (K) |  |
| Item 5 Prerequisite Skill | draw conclusions and generate and answer questions <br> using information from picture and bar-type graphs (1) |  |
| Item 6 Prerequisite Skill | draw conclusions and generate and answer questions <br> using information from picture and bar-type graphs (1) |  |
| Item 7 Prerequisite Skill | draw conclusions and make predictions from information <br> in a graph (2) |  |
| Item 8 Prerequisite Skill |  |  |

| Grade 5 Mathematics | Geometry and Measurement: The student will <br> demonstrate an understanding of how to represent and <br> apply geometry and measurement concepts. |
| :--- | :--- |
| Reporting Category 3 | The student applies mathematical process standards <br> to classify two-dimensional figures by attributes and <br> properties. |
| Knowledge and Skills Statement 5.5 | Classifies two-dimensional geometric figures by attributes <br> and properties. |
| Essence Statement | classify and sort a variety of regular and irregular two- <br> and three-dimensional figures regardless of orientation or <br> size (K) |
| Item 9 Prerequisite Skill | classify and sort regular and irregular two-dimensional <br> shapes based on attributes using informal geometric <br> language (1) |
| Item 10 Prerequisite Skill | classify and sort regular and irregular two-dimensional <br> shapes based on attributes using informal geometric <br> language (1) |
| Item 11 Prerequisite Skill 12 Prerequisite Skill | classify and sort polygons with 12 or fewer sides <br> according to attributes, including identifying the number <br> of sides and number of vertices (2) |

| Grade 5 Mathematics |  | Cluster $\mathbf{4}$ |
| :--- | :--- | :--- |
| Reporting Category $\mathbf{2}$ | Computations and Algebraic Relationships: The student <br> will demonstrate an understanding of how to perform <br> operations and represent algebraic relationships. |  |
| Knowledge and Skills Statement 5.4 | The student applies mathematical process standards to <br> develop concepts of expressions and equations. |  |
| Essence Statement | Models or solves problems involving whole number <br> relationships or patterns. |  |
| Item 13 Prerequisite Skill | recognize and create patterns (P-K) |  |
| Item 14 Prerequisite Skill | recognize and create patterns (P-K) |  |
| Item 15 Prerequisite Skill | recognize and create patterns (P-K) |  |
| Item 16 Prerequisite Skill | recognize and create patterns (P-K) |  |

| Grade 5 Mathematics |  | Computations and Algebraic Relationships: The student <br> will demonstrate an understanding of how to perform <br> operations and represent algebraic relationships. |
| :--- | :--- | :--- |
| Reporting Category 2 | The student applies mathematical process standards <br> to develop and use strategies and methods for positive <br> rational number computations in order to solve problems <br> with efficiency and accuracy. |  |
| Knowledge and Skills Statement 5.3 | Solves problems using operations. |  |
| Essence Statement | model the action of joining to represent addition and the <br> action of separating to represent subtraction (K) |  |
| Item 17 Prerequisite Skill | model the action of joining to represent addition and the <br> action of separating to represent subtraction (K) |  |
| Item 18 Prerequisite Skill | apply basic fact strategies to add and subtract within 20, <br> including making 10 and decomposing a number leading <br> to a 10 (1) |  |
| Item 19 Prerequisite Skill | explain strategies used to solve addition and subtraction <br> problems up to 20 using spoken words, objects, pictorial <br> models, and number sentences (1) |  |
| Item 20 Prerequisite Skill |  |  |

Additional resources for STAAR Alternate 2, including the STAAR Alternate 2 Test Administrator Manual and the STAAR Alternate 2 Educator Guide, are available online: http://tea.texas.gov/student.assessment/ special-ed/staaralt/

## MATHEMATICS

## Presentation Instructions for Question 1

- Present Stimulus 1.
- Direct the student to Stimulus 1. Communicate: A woman pulls a ticket from a machine at a bakery. The ticket has the number 1 written on it. She is the first in line to buy muffins.
- Communicate: Find the woman who is first in line.

## Stimulus 1

| Scoring Instructions |  |  |
| :---: | :---: | :---: |
| Student Action |  | Test Administrator Action |
| If the student finds the woman who is first in line, | $\square$ | mark A for question 1 and move to question 2. |
| If the student does not find the woman who is first in line, | $\square$ | - remove the stimulus; <br> - wait at least five seconds; and <br> - replicate the initial presentation instructions. |
| After the five-second wait time, if the student finds the woman who is first in line, | $\square$ | mark B for question 1 and move to question 2. |
| After the five-second wait time, if the student does not find the woman who is first in line, | $\square$ | mark $\mathbf{C}$ for question 1 and move to question 2. |

## Presentation Instructions for Question

- Present Stimulus 2a and 2b.
- Direct the student to Stimulus 2a. Communicate: 12 and 22 are in order because 12 comes first when counting.
- Direct the student to each answer choice in Stimulus 2b. Communicate: 15, 55. 55, 15.
- Communicate: Find the pair of numbers that are in order when counting.

## Stimulus 2a

## 12

Stimulus 2b

## Scoring Instructions

| Student Action |  | Test Administrator Action |
| :---: | :---: | :---: |
| If the student finds " 15,55 ," | $\Rightarrow$ | mark $\mathbf{A}$ for question 2 and move to question 3. |
| If the student does not find " 15,55 ," | $\square$ | - model the desired student action by finding 15 and 55 and communicate "Fifteen and 55 are in order because 15 comes first when counting"; and <br> - replicate the initial presentation instructions. |
| After teacher modeling, if the student finds "15, 55," | $\square$ | mark B for question 2 and move to question 3. |
| After teacher modeling, if the student does not find "15, 55," | $\square$ | mark $\mathbf{C}$ for question 2 and move to question 3. |

## Presentation Instructions for Question 3

- Present Stimulus 3.
- Direct the student to each answer choice. Communicate: Thirty-four is three tens and four ones. Forty-two is four tens and two ones. Twenty-three is two tens and three ones.
- Communicate: Find the number that comes first when counting.

## Stimulus 3

| Scoring Instructions |  |  |
| :--- | :--- | :--- | :--- |
| Student Action |  | Test Administrator Action |

## Presentation Instructions for Question 4

- Present Stimulus 4a and 4b.
- Direct the student to Stimulus 4a. Communicate: This number sentence shows $\mathbf{3 0 0}$ plus a missing number plus 5 equals 325 .
- Direct the student to each answer choice in Stimulus 4b. Communicate: 20, 2, 200.
- Communicate: Find the missing number.

## Stimulus 4a

$$
300+\square+5=325
$$

## Stimulus 4b

| Scoring Instructions |  |  |
| :--- | :--- | :--- |
| Student Action |  | Test Administrator Action |
| If the student finds "20," | $\boldsymbol{m}$ | mark A for question 4 and move to question 5. |
| If the student does not find "20," | $\boldsymbol{m}$ | replicate the initial presentation instructions. |
| After the teacher repeats the instructions, if <br> the student finds "20," | $\boldsymbol{m}$ | mark B for question 4 and move to question 5. |
| After the teacher repeats the instructions, if <br> the student does not find "20," | $\boldsymbol{m}$ | mark C for question 4 and move to question 5. |

## Presentation Instructions for Question 5

- Present Stimulus 5.
- Direct the student to Stimulus 5. Communicate: This graph shows how many hot dogs a man sold on Monday and Tuesday.
- Direct the student to each row of the graph. Communicate: Monday. Five hot dogs sold. Tuesday. Seven hot dogs sold. The man sold more hot dogs on Tuesday.
- Communicate: Find the row that shows more hot dogs sold.

## Stimulus 5

## Hot Dogs Sold

| Monday | -0000 |
| :---: | :---: |
| Tuesday | -000000 |

| Scoring Instructions |  |  |
| :---: | :---: | :---: |
| Student Action |  | Test Administrator Action |
| If the student finds any part of the Tuesday row, | $\square$ | mark $\mathbf{A}$ for question 5 and move to question 6. |
| If the student does not find any part of the Tuesday row, | $\cdots$ | - remove the stimulus; <br> - wait at least five seconds; and <br> - replicate the initial presentation instructions. |
| After the five-second wait time, if the student finds any part of the Tuesday row, | $\cdots$ | mark $\mathbf{B}$ for question 5 and move to question 6. |
| After the five-second wait time, if the student does not find any part of the Tuesday row, | $\square$ | mark $\mathbf{C}$ for question 5 and move to question 6. |

## Presentation Instructions for Question 6

- Present Stimulus 6a and 6b.
- Direct the student to Stimulus 6a. Communicate: A man sold more hot dogs on Tuesday than on Monday. He also sold ice-cream cones.
- Direct the student to Stimulus 6b. Communicate: This graph shows that the man sold four ice-cream cones on Monday and two ice-cream cones on Tuesday.
- Communicate: Find the row that shows the day the man sold more ice-cream cones.

## Stimulus 6a

## Hot Dogs Sold

| Monday | Qoeoo |
| :---: | :---: |
| Tuesday | -oooooo |

## Stimulus 6b

Ice-Cream Cones Sold

| Monday | V | V | V |
| :--- | :--- | :--- | :--- |

| Scoring Instructions |  |  |
| :--- | :--- | :--- | :--- |
| Student Action |  | Test Administrator Action |

## Presentation Instructions for Question 7

- Present Stimulus 7a and 7b.
- Direct the student to Stimulus 7a. Communicate: This graph shows the number of students in three classes at school.
- Direct the student to each column of the graph in Stimulus 7a without counting the data. Communicate: Math. Reading. Science.
- Direct the student to each answer choice in Stimulus 7b.
- Communicate: Find the class with the most students.

## Stimulus 7a

School Classes

Stimulus 7b

Scoring Instructions

| Student Action |  | Test Administrator Action |
| :---: | :---: | :---: |
| If the student finds "Reading" in Stimulus 7b, | $\Rightarrow$ | mark $\mathbf{A}$ for question 7 and move to question 8. |
| If the student does not find "Reading" in Stimulus 7b, | $\square$ | provide one of these allowable teacher assists to the student: <br> - Have the student identify the number of students in each class. OR <br> - Have the student tell about what it means to have the most. OR <br> - Have the student replicate the graph using real objects. OR <br> - Highlight the data in the graph. <br> Replicate the initial presentation instructions. |
| After the selected teacher assistance, if the student finds "Reading" in Stimulus 7b, | $\Rightarrow$ | mark $\mathbf{B}$ for question 7 and move to question 8. |
| After the selected teacher assistance, if the student does not find "Reading" in Stimulus 7b, | $\cdots$ | mark $\mathbf{C}$ for question 7 and move to question 8. |

## Presentation Instructions for Question 8

- Present Stimulus 8a and 8b.
- Direct the student to Stimulus 8a. Communicate: This graph shows the number of students in four classes.
- Direct the student to each row of the graph in Stimulus 8a. Communicate: Math. Reading. Science. P.E.
- Direct the student to the math row in the graph in Stimulus 8a. Communicate: Math has the fewest students.
- Direct the student to each answer choice in Stimulus 8b. Communicate the text in each answer choice.
- Communicate: Find the statement that tells how to make the math class have the most students.

## Stimulus 8a

School Classes

| Math | XX |
| :--- | :--- |
| Reading | XXXXXX |
| Science | OXXX |
| X.E. | XI |

Stimulus 8b
Add 6 students to Math.

Subtract 3 students from P.E.

Move 2 students from P.E. to Math.

Scoring Instructions

| Student Action |  | Test Administrator Action |
| :--- | :--- | :---: |
| If the student finds "Add 6 students to Math," | $\Rightarrow$ | mark $\mathbf{A}$ for question 8 and move to question 9. |
| If the student does not find "Add 6 students <br> to Math," | $\Rightarrow$ | replicate the initial presentation instructions. |
| After the teacher repeats the instructions, if <br> the student finds "Add 6 students to Math," | $\Rightarrow$ | mark B for question 8 and move to question 9. |
| After the teacher repeats the instructions, if <br> the student does not find "Add 6 students to <br> Math," | $\boldsymbol{m}$ | mark $\mathbf{C}$ for question 8 and move to question 9. |

## Presentation Instructions for Question 9

- PresentStimulus 9.
- Direct the student to the triangle and each side of the triangle. Communicate: This is a triangle. A triangle has three sides. One, two, three sides.
- Direct the student to the rectangle and each side of the rectangle. Communicate: This is a rectangle. A rectangle has four sides. One, two, three, four sides.
- Communicate: Find the shape that has four sides.

## Stimulus 9

| Scoring Instructions |  |  |
| :---: | :---: | :---: |
| Student Action |  | Test Administrator Action |
| If the student finds the rectangle, | $\square$ | mark $\mathbf{A}$ for question 9 and move to question 10. |
| If the student does not find the rectangle, | $\cdots$ | - remove the stimulus; <br> - wait at least five seconds; and <br> - replicate the initial presentation instructions. |
| After the five-second wait time, if the student finds the rectangle, | $\square$ | mark $\mathbf{B}$ for question 9 and move to question 10. |
| After the five-second wait time, if the student does not find the rectangle, | $\Rightarrow$ | mark $\mathbf{C}$ for question 9 and move to question 10. |

## Presentation Instructions for Question 10

- Present Stimulus 10a and 10b.
- Direct the student to Stimulus 10a. Communicate: This is a rectangle. It has four sides.
- Direct the student to each answer choice in Stimulus 10b. Communicate: This is a triangle. This is a square.
- Communicate: Find the figure that has the same number of sides as the rectangle.

## Stimulus 10a

## Stimulus 10b

## Scoring Instructions

| Student Action |  | Test Administrator Action |
| :---: | :---: | :---: |
| If the student finds the square, | $\square$ | mark $\mathbf{A}$ for question 10 and move to question 11. |
| If the student does not find the square, | $\cdots$ | - model the desired student action by finding the square and communicate "This square has four sides like the rectangle"; and <br> - replicate the initial presentation instructions. |
| After teacher modeling, if the student finds the square, | $\square$ | mark $\mathbf{B}$ for question 10 and move to question 11. |
| After teacher modeling, if the student does not find the square, | $\square$ | mark $\mathbf{C}$ for question 10 and move to question 11. |

## Presentation Instructions for Question 11

- Present Stimulus 11.
- Direct the student to Stimulus 11. Communicate: All of these figures have a different number of sides.
- Communicate: Find the figure that has five sides.

## Stimulus 11

| Scoring Instructions |  |  |
| :---: | :---: | :---: |
| Student Action |  | Test Administrator Action |
| If the student finds the figure that has five sides, | $\Rightarrow$ | mark $\mathbf{A}$ for question 11 and move to question 12. |
| If the student does not find the figure that has five sides, | $\Rightarrow$ | provide one of these allowable teacher assists to the student: <br> - Have the student point to and/or count the sides on each figure. OR <br> - Highlight the sides of each figure. OR <br> - Trace the sides of each figure. <br> Replicate the initial presentation instructions. |
| After the selected teacher assistance, if the student finds the figure that has five sides, | $\Rightarrow$ | mark $\mathbf{B}$ for question 11 and move to question 12. |
| After the selected teacher assistance, if the student does not find the figure that has five sides, | $\Rightarrow$ | mark $\mathbf{C}$ for question 11 and move to question 12. |

## Presentation Instructions for Question 12

- Present Stimulus 12a and 12b.
- Direct the student to Stimulus 12a. Communicate: A student drew this figure.
- Direct the student to each answer choice in Stimulus 12b.
- Communicate: Find the figure that has one more side than the figure the student drew.

## Stimulus 12a

## Stimulus 12b

## Scoring Instructions

| Student Action |  | Test Administrator Action |
| :--- | :--- | :--- |
| If the student finds the figure with six sides in <br> Stimulus 12b, | $\Rightarrow$ | mark $\mathbf{A}$ for question 12 and move to <br> question 13. |
| If the student does not find the figure with six <br> sides in Stimulus 12b, | $\Rightarrow$ | replicate the initial presentation instructions. |
| After the teacher repeats the instructions, if <br> the student finds the figure with six sides in <br> Stimulus 12b, | $\Rightarrow$ | mark $\mathbf{B}$ for question 12 and move to <br> question 13. |
| After the teacher repeats the instructions, if <br> the student does not find the figure with six <br> sides in Stimulus 12b, | $\Rightarrow$ | mark $\mathbf{C}$ for question 12 and move to <br> question 13. |

## Presentation Instructions for Question 13

- Present Stimulus 13.
- Direct the student to Stimulus 13. Communicate: These shapes are in a pattern. Star. Square. Circle. Star. Square. Circle. Star. Square. Circle.
- Communicate: Find the pattern.

## Stimulus 13

| Scoring Instructions |  |  |
| :---: | :---: | :---: |
| Student Action |  | Test Administrator Action |
| If the student finds the pattern, | $\square$ | mark $\mathbf{A}$ for question 13 and move to question 14. |
| If the student does not find the pattern, | $\square$ | - remove the stimulus; <br> - wait at least five seconds; and <br> - replicate the initial presentation instructions. |
| After the five-second wait time, if the student finds the pattern, | $\square$ | mark $\mathbf{B}$ for question 13 and move to question 14. |
| After the five-second wait time, if the student does not find the pattern, | $\square$ | mark $\mathbf{C}$ for question 13 and move to question 14. |

## Presentation Instructions for Question 14

- Present Stimulus 14a and 14b.
- Direct the student to each shape and the blank in Stimulus 14a. Communicate: This is a pattern. Star. Square. Circle. Star. Square. Circle. Star. Square. Circle. A shape is missing. Square. Circle.
- Direct the student to each answer choice in Stimulus 14b.
- Communicate: Find the shape that is missing.

## Stimulus 14a

$$
\star \square O \star \square O \star \square O \_\square O
$$

Stimulus 14b

Scoring Instructions

| Student Action |  | Test Administrator Action |
| :--- | :--- | :--- |
| If the student finds the star in Stimulus 14b, | $\boldsymbol{\theta}$ | $\begin{array}{l}\text { mark A for question 14 and move to } \\ \text { question 15. }\end{array}$ |
| $\begin{array}{l}\text { If the student does not find the star in } \\ \text { Stimulus 14b, }\end{array}$ | $\boldsymbol{m o d e l}$ the desired student action by finding |  |
| the star and communicate "The star is |  |  |
| missing from the pattern"; and |  |  |
| replicate the initial presentation instructions. |  |  |$\}$

## Presentation Instructions for Question 15

- Present Stimulus 15a and 15b.
- Direct the student to Stimulus 15a. Communicate: Cars, trucks, and bikes are parked in a pattern. Car. Truck. Bike. Car. Truck. Bike. Car. Truck. Bike.
- Direct the student to the empty spaces. Communicate: Parts of this pattern are missing.
- Direct the student to each answer choice in Stimulus 15b.
- Communicate: Find the parts of the pattern that are missing.

## Stimulus 15a

Stimulus 15b

| Scoring Instructions |  |  |
| :--- | :--- | :--- | :--- |
| Student Action the student finds the sequence of a car, a <br> truck, and a bike in Stimulus 15b, | $\Rightarrow$ | Test Administrator Action |
| mark A for question 15 and move to |  |  |
| question 16. |  |  |

## Presentation Instructions for Question 16

- Present Stimulus 16a and 16b.
- Direct the student to Stimulus 16a. Communicate: This is an ABC pattern.
- Direct the student to each answer choice in Stimulus 16b. Communicate: Here are three patterns. One of the patterns is an ABC pattern.
- Communicate: Find the ABC pattern.

## Stimulus 16a

Stimulus 16b

## Scoring Instructions

| Student Action |  | Test Administrator Action |
| :--- | :--- | :--- |
| If the student finds the 7, 8,9 pattern, | $\boldsymbol{m}$ | mark $\mathbf{A}$ for question 16 and move to <br> question 17. |
| If the student does not find the 7, 8, 9 pattern, | $\boldsymbol{m}$ | replicate the initial presentation instructions. <br> After the teacher repeats the instructions, if <br> the student finds the 7, 8, 9 pattern, |
| After the teacher repeats the instructions, if <br> the student does not find the 7, 8,9 pattern, | $\boldsymbol{m}$ | mark for question 16 and move to <br> question 17. |
| mark $\mathbf{C}$ for question 16 and move to <br> question 17. |  |  |

## Presentation Instructions for Question 17

- Present Stimulus 17. Communicate: A student is making pancakes.
- Direct the student to the 6 eggs in the carton. Communicate: 6 eggs are in a carton.
- Direct the student to the cracked egg. Communicate: $\mathbf{1}$ egg is needed to make the pancakes. The student cracks the egg and puts it in a bowl.
- Direct the student to the 5 eggs in the carton. Communicate: Now there are 5 eggs left in the carton.
- Communicate: Find the 5 eggs left in the carton.

## Stimulus 17

Scoring Instructions

| Student Action |  | Test Administrator Action |
| :--- | :--- | :--- |
| If the student finds the 5 eggs, | $\boldsymbol{m}$ | mark $\mathbf{A}$ for question 17 and move to <br> question 18. |
| If the student does not find the 5 eggs, | $\boldsymbol{m}$ | remove the stimulus; <br> ewait at least five seconds; and <br> - replicate the initial presentation instructions. |
| After the five-second wait time, if the student <br> finds the 5 eggs, | $\boldsymbol{m}$ | mark $\mathbf{B}$ for question 17 and move to <br> question 18. |
| After the five-second wait time, if the student <br> does not find the 5 eggs, | $\boldsymbol{m}$ | mark $\mathbf{C}$ for question 17 and move to <br> question 18. |

## Presentation Instructions for Question 18

- Present Stimulus 18a and 18b.
- Direct the student to Stimulus 18a. Communicate: This shows that a student had 6 eggs. She used 1 egg. Now she has 5 eggs left.
- Direct the student to each answer choice in Stimulus 18b. Communicate: $\mathbf{6}$ eggs minus 1 egg equals 5 eggs. 6 eggs plus 1 egg equals 7 eggs.
- Communicate: Find 6 eggs minus 1 egg equals 5 eggs.

## Stimulus 18a

## Stimulus 18b

Scoring Instructions

| Student Action |  | Test Administrator Action |
| :---: | :---: | :---: |
| If the student finds "6-1 = 5" in Stimulus 18b, | $\square$ | mark $\mathbf{A}$ for question 18 and move to question 19. |
| If the student does not find " $6-1=5$ " in Stimulus 18b, | $\square$ | - model the desired student action by finding " $6-1=5$ " and communicate "This shows 6 eggs minus 1 egg equals 5 eggs"; and <br> - replicate the initial presentation instructions. |
| After teacher modeling, if the student finds " $6-1=5$ " in Stimulus 18b, | $\square$ | mark $\mathbf{B}$ for question 18 and move to question 19. |
| After teacher modeling, if the student does not find " $6-1=5$ " in Stimulus 18b, | $\square$ | mark $\mathbf{C}$ for question 18 and move to question 19. |

## Presentation Instructions for Question 19

- Present Stimulus 19a and 19b.
- Direct the student to Stimulus 19a. Communicate: This number sentence shows 12 minus 3. The number that completes the number sentence is missing.
- Direct the student to each answer choice in Stimulus 19b.
- Communicate: Find the number that completes the number sentence.

## Stimulus 19a

$$
12-3=\square
$$

Stimulus 19b

$$
12
$$

Scoring Instructions

| Student Action |  | Test Administrator Action |
| :--- | :--- | :--- |
| If the student finds "9," | $\Rightarrow$ | mark $\mathbf{A}$ for question 19 and move to <br> question 20. |
| If the student does not find "9," | $\boldsymbol{m}$provide one of these allowable teacher assists <br> to the student: <br> - Have the student replicate twelve minus three <br> using real objects. OR <br> - Highlight the subtraction symbol in <br> Stimulus 19a. OR <br> - Have the student determine whether the <br> answer should be more or less than 12. OR <br> - Allow the student to use a number line or <br> number chart. |  |
| Replicate the initial presentation instructions. |  |  |

## Presentation Instructions for Question 20

- Present Stimulus 20.
- Direct the student to Stimulus 20. Communicate: These are number sentences. The numbers that complete the number sentences are missing.
- Communicate: Find the number sentence where the missing number is less than 15.

## Stimulus 20

$$
\begin{aligned}
& * 15-5=\square \\
& 15-0=\square \\
& 15+5=\square
\end{aligned}
$$

## Scoring Instructions

| Student Action |  | Test Administrator Action |
| :---: | :---: | :---: |
| If the student finds "15-5 = , ," | $\Rightarrow$ | mark A for question 20. |
| If the student does not find " $15-5=\square$," | $\square$ | replicate the initial presentation instructions. |
| After the teacher repeats the instructions, if the student finds " $15-5=\square$," | $\square$ | mark B for question 20. |
| After the teacher repeats the instructions, if the student does not find " $15-5=\square$," | $\cdots$ | mark C for question 20. |
