

Custom Dashboards Are in Development

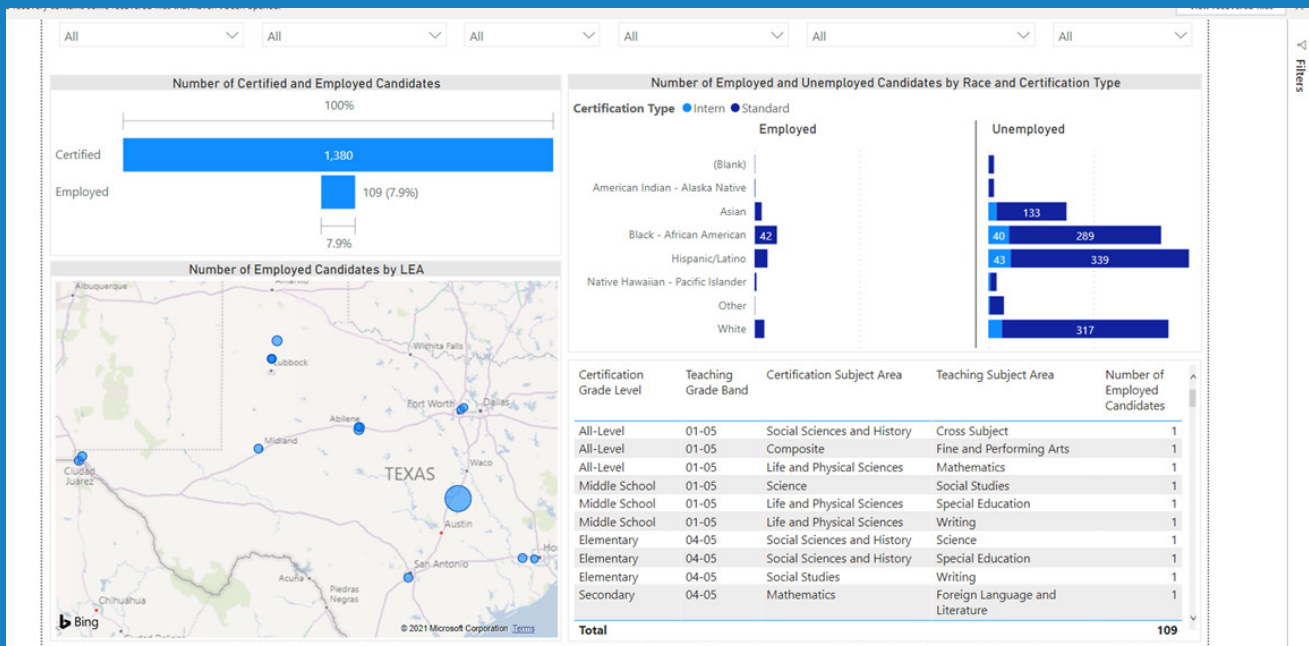

The Texas Education Agency is developing data dashboards for Educator Preparation Programs (EPPs) across Texas. Available at no charge to all Texas EPPs, these online dashboards will provide EPPs with user-friendly access to actionable data about their processes and outcomes. This will help EPPs in making program improvements so they can more effectively train teachers. The ultimate goal is to ensure Texas teachers are ready to inspire and serve all students from day one.

A Collaborative Effort

We have had numerous webinars with an EPP stakeholder group to gather input. EPPs' participation is key in this project to gain their valuable insights and make the dashboards useful and effective resources. This update serves as a preliminary visualization for the future dashboards. We want to keep the EPP community informed about the progress of the project and will continue to do so throughout the duration.

DATA DASHBOARDS MADE JUST FOR TEXAS EPPs

This initiative focuses on providing EPPs with insight about their candidates they may not have had before. The first dashboard specified by the EPP stakeholder groups provides the district and campus characteristics of where EPP candidates are employed in Texas. This will allow EPPs to better understand the local context of where their teachers are employed.
