## Section I: Introduction

The *No Child Left Behind Act of 2001* (NCLB) (Public Law 107-110), reauthorizes and amends federal programs established under the *Elementary and Secondary Education Act of 1965* (ESEA). Under NCLB, accountability provisions that formerly applied only to districts and campuses receiving Title I, Part A funds now apply to all districts and campuses. All public school districts, campuses, and the state are evaluated annually for Adequate Yearly Progress (AYP).

### **Amendments to the 2011 AYP Workbook**

The United States Department of Education (USDE) requires a Consolidated State Application Accountability Workbook (Texas AYP Workbook) that describes the current Texas AYP calculations. On December 21, 2010, the Texas Education Agency (TEA) issued an amended version of its 2011 Texas AYP Workbook to the USDE that reflects required regulations and guidance from the USDE.

The Texas AYP Workbook amendments include references to the discontinued use of the Texas Projection Measure (TPM) and the TAKS-Alt growth measure for evaluation of the 2011 Adequate Yearly Progress (AYP) statuses, as stated in the Texas Commissioner of Education's final decision documents released on April 22, 2011. The Texas Workbook amendments also clarify the continued use of the 2010 graduation rate targets and calculations for 2011 AYP. In addition, an amendment to provide AYP evaluations for prekindergarten and kindergarten (PK/K) campuses was included based on a recommendation by the U.S. Department of Education (USDE) following their review of the statewide Title I programs.

The Texas AYP Workbook, approved by the USDE in June 2011, meets the requirements of NCLB and provides a mechanism for evaluating district and campus AYP in 2011. The AYP requirements in NCLB are based on the following principles:

**All Schools:** A single statewide definition of AYP applies to all districts and campuses, including Title I and non-Title I districts and campuses, alternative education campuses, and open-enrollment charter schools.

**All Students:** All students in Grades 3-8 and 10 must be tested and all results must be included in the AYP calculation.

Assessments evaluated for AYP are:

- Texas Assessment of Knowledge and Skills (TAKS) and TAKS (Accommodated) in Reading/English Language Arts and Mathematics;
- Texas Assessment of Knowledge and Skills-Modified (TAKS-M) in Reading/English Language Arts and Mathematics for students receiving special education services who meet participation requirements for TAKS-M and for whom TAKS is not appropriate;

- Texas Assessment of Knowledge and Skills-Alternate (TAKS–Alt) in Reading/English Language Arts and Mathematics for students with significant cognitive disabilities who meet the participation requirements;
- Texas English Language Proficiency Assessment System (TELPAS) Reading for recent immigrant limited English proficient (LEP) students who were exempted in Reading/English Language Arts by the Language Proficiency Assessment Committee (LPAC);
- Linguistically Accommodated Testing (LAT) of the TAKS and TAKS–M Reading/English Language Arts and Mathematics assessments for recent immigrant LEP students who were exempted by the LPAC.

**Standards:** Baseline performance standards for Reading/English Language Arts and Mathematics measures are determined using the methodology required in NCLB. The standards must increase over time to reach 100 percent by 2013–14.

**Performance and Participation:** Districts and campuses must meet test participation standards as well as performance standards for students tested.

**Student Groups:** All students, and African American, Hispanic, White, economically disadvantaged, special education, and LEP student groups must meet the same performance and participation standards. States individually develop minimum size requirements for evaluation of student groups.

**Other Measures:** High schools must meet a Graduation Rate standard set by the state. States individually identify an additional measure for elementary and middle/junior high schools.

## Texas NCLB Report

Section 1111(h)(1) and (2) of the NCLB Act describes the requirements for the annual reporting of student achievement and AYP information for the state, local educational agency, and school. TEA uses a web-based reporting system that generates the required NCLB Report Cards (NCLB RC) which are available at the state, district, and campus level for easy dissemination by school districts. The 2011 NCLB report cards will be available in January, 2012.

The student achievement information required for the NCLB RC is a summary of all TAKS tests and grades. The relationship between the student achievement information and AYP performance results, both of which are reported on the NCLB RC, are described in *Appendix E*. For more information on the distribution requirements of the Texas NCLB Report Card, please contact the Division of NCLB Program Coordination at (512) 463-9374.

## Section II: System Overview

Under the accountability provisions in the *No Child Left Behind Act of 2001* (NCLB), all districts, campuses, and the state are evaluated for Adequate Yearly Progress (AYP). Following is an overview of the process for determining district and campus 2011 AYP Status.

### Key Dates Related to the 2011 AYP Process

<b>Oct., 2010 – June, 2011</b>	<b>Exception to the 1% Federal Cap via RF Tracker</b> Districts with residential treatment facilities (RF) and group foster homes apply for an exception to the federal cap by registering with the Division of Program Monitoring and Interventions' RF Tracker Texas Education Agency Secure Environment (TEASE) application.
<b>December, 2010</b>	<b>TEA Requests for Amendments</b> TEA submits requests for amendments to the Texas Consolidated State Application Accountability Workbook (Texas AYP Workbook).
<b>May/June, 2011</b>	<b>AYP Calculations Approved</b> USDE approves amendments to the Texas AYP Workbook related to the 2011 AYP calculations.
<b>May 19, 2011</b>	<b>Campus Priority List for the 2% Federal Cap available online</b> TEASE Accountability web application available for school districts to view and/or modify their 2011 Campus Priority List for the 2% Federal Cap.
<b>June 24, 2011</b>	<b>Deadline for Campus Priority List for the 2% Federal Cap</b> Changes to the Campus Priority List for the 2% Federal Cap must be submitted by June 24, 2011. School districts that have not provided campus ranking changes by 10:00 p.m. on June 24th agree to accept the TEA Default Campus Ranking for 2011 AYP.

<b>June, 2011</b>	<b>AYP Guide Released</b>
<b>July 27, 2011</b>	<p><b>Release of 2011 Preliminary Data Tables to Campuses and Districts</b> TEA provides 2011 AYP preliminary data tables to school districts on TEASE for Title I and non-Title I districts and campuses, alternative education campuses, and open-enrollment charter schools.</p> <p><b>Appeals Begin</b> Student-level data for submission of appeals are available to districts electronically. Appeal letters for district and campus AYP results are accepted.</p> <p><b>Open Other Circumstance Exceptions Application</b> Districts may submit applications for Other Circumstance Exceptions online via TEASE.</p>
<b>August 4, 2011</b>	<p><b>Public Release of 2011 Preliminary Data Tables</b> TEA releases preliminary 2011 AYP masked data tables, including preliminary AYP status, electronically on public website.</p>
<b>September 2, 2011</b>	<p><b>Appeals Deadline</b> Appeals of district and campus preliminary 2011 AYP Status must be submitted in writing under the signature of the superintendent by Friday, September 2, 2011.</p> <p><b>Exceptions Deadline</b> Online application process for submission of Other Circumstance Exceptions closes.</p>
<b>November/December, 2011</b>	<p><b>Final 2011 AYP Status</b> TEA releases final 2011 AYP masked data tables with final AYP Status electronically on public website.</p>
<b>January, 2012</b>	<b>2011 NCLB Report Card available on public website</b>

## Comparison of 2010 and 2011 AYP Systems

The following changes to specific components of the AYP system will be incorporated in 2011. *Section III* provides more details on the following areas:

- The Texas Projection Measure (TPM) and the TAKS–Alternate growth measure are not used to evaluate 2011 AYP results.
- An increase in AYP Reading/English Language Arts and Mathematics performance standards for 2011 to 80% for Reading/English Language Arts and 75% for Mathematics;
- Prekindergarten and kindergarten campuses, due to a new requirement from the USDE, are evaluated for 2011 AYP based on a pairing relationship assigned by the district or selected by TEA.

## Districts and Campuses Evaluated

### Districts

Regular foundation school program (FSP) districts and special statutory districts are evaluated for AYP. State-administered school districts are not evaluated for AYP. State-administered districts include Texas School for the Blind and Visually Impaired, Texas School for the Deaf, Texas Youth Commission, and Windham School District. Beginning in 2005, charter operators are evaluated for AYP based on aggregate results for the campuses operated by the charter. New districts, including new charter districts, are not evaluated for AYP the first year they report fall enrollment. Districts with no students enrolled in Grades 3–8 and 10 are not evaluated for AYP.

### Campuses

All Title I and non-Title I public school campuses, alternative education campuses, and open-enrollment charter schools are evaluated for AYP with the following exceptions:

***New Campuses:*** New campuses and new open-enrollment charter schools are not evaluated for AYP the first year they report fall enrollment. These campuses will be incorporated automatically the second year they report fall enrollment.

***Campuses that Close Mid-Year:*** Campuses that close before the Texas Assessment of Knowledge and Skills (TAKS) testing date are not evaluated for AYP. Performance measures for which data exist on campuses that close are included in the district AYP evaluation. Campuses that close after the end of the school year are evaluated for AYP for that school year.

***Juvenile Justice Alternative Education Program (JJAEP) and Disciplinary Alternative Education Program (DAEP)***

***Campuses:*** State statute and statutory intent prohibit the attribution of student performance results to JJAEPs and DAEPs. Attendance and performance data for students served in JJAEPs and DAEPs are attributed back to the home campuses.

***Short-Term Campuses:*** Campuses that serve students in the grades evaluated for AYP (Grades 3–8 and 10) and have no students meeting the full academic year (or accountability subset) definition are not evaluated for AYP. This includes alternative education campuses (AECs) with short-term placements. However, these campuses *will be* evaluated if any number of students are included in the accountability subset, and may also be evaluated for graduation rate.

***Charter Campuses with No Students in Grades 3–8 and 10:*** Open-enrollment charter schools that do not serve students enrolled in Grades 3–8 or 10 are not evaluated for AYP.

***Districts and Campuses with Students Enrolled in Grades 3-8 or 10 but have No Test Results:*** Districts and campuses with students enrolled in Grades 3-8 or 10 but with no test results in the accountability subset are not evaluated for AYP.

### **Agreement for Linked Campus Identification Numbers**

If a school district enters into a legal agreement with TEA that requires new district or campus numbers, the AYP status history will be linked to the previous district or campus number. In this case, both the district and campus will be evaluated for AYP the first year under the new number. Data for districts and campuses in these circumstances will not be linked. This includes PEIMS data, assessment data, and AYP indicators that draw on those data. Districts or campuses under a legal agreement with TEA cannot take advantage of Required Improvement/Safe Harbor provisions of AYP in order to meet AYP the first year under a new district or campus number.

## **2011 AYP Status**

Following is an overview of the 2011 AYP indicators. Additional information about each AYP measure is provided in *Section III*. A sample AYP calculation is provided in *Appendix D*.

Districts, campuses, and the state are evaluated on three indicators for AYP: Reading/English Language Arts, Mathematics, and one Other Indicator. Exhibit 1 summarizes the indicators. For Reading/English Language Arts and Mathematics (Grades 3–8 and 10, summed across grades), for all students and each student group that meets minimum size requirements, districts and campuses must meet the performance standard or performance improvement/safe harbor, and the participation standard. The performance standard is based on test results for students enrolled for the full academic year. The participation standard is based on participation in the assessment program of all students enrolled on the day of testing.

In addition to Reading/English Language Arts and Mathematics, districts and campuses are required to meet the AYP standard on one Other Indicator—either Graduation Rate or Attendance Rate. The Other Indicator evaluated for a district or campus is based on the grades offered. *Appendix F* shows the grade ranges included in each campus type.

- Graduation Rate is the Other Indicator for high schools, combined elementary/secondary campuses offering Grade 12, and districts offering Grade 12.
- Attendance Rate is the Other Indicator for elementary schools, middle/junior high schools, combined elementary/secondary schools not offering Grade 12, and districts not offering Grade 12.

Districts and campuses must meet the Graduation Rate or Attendance Rate standard *or* meet the relevant improvement requirement.

Performance on the Other Indicator is also part of performance improvement/safe harbor for the Reading/English Language Arts and Mathematics performance measures. If any student group (or all students) does not meet the performance standard for Reading/English Language Arts or Mathematics, that student group must show both: 1) a 10 percent decrease in the percent counted as not proficient from the prior year **and** 2) meet the absolute standard or meet the relevant improvement criteria on the Other Indicator. Although student groups are not required to meet the Graduation Rate or Attendance Rate standard, they *may* be required to either meet the standard or show improvement on the Graduation Rate or Attendance Rate to meet the performance improvement/safe harbor standard.

A district or campus may be evaluated on as few as 2 or as many as 29 measures to determine 2011 AYP Status. See *Section III* for a discussion of the relationships between indicators and measures.

### **Treatment of Known Compromised Data**

Federal regulations (34 CFR 200.3 and 200.19 *et seq.*) require states to ensure that its academic assessment system and other academic indicators are valid and reliable for the evaluation of AYP. In order to address this requirement, the commissioner of education will determine the AYP outcome of districts and campuses when the accuracy and/or integrity of performance results have been compromised and rendered invalid. Academic assessment or other indicators that have been rendered invalid may be reported on AYP data tables, but will be annotated to indicate the irregularities and that the data could not be used for AYP evaluations. For example, the testing contractor may be asked to invalidate the assessment results used for AYP if district findings are known in time. Annotations on AYP or other federal reports may continue into future years if the compromised data affects longitudinal indicators. Also annotations may be required in future years to explain the lack of data for AYP improvement calculations.

### **2011 AYP Status Labels**

Each district and campus is assigned one of the following 2011 AYP Status labels:

***Meets AYP:*** Designates a district or campus that meets AYP standards on all indicators for which it is evaluated.

***Missed AYP – [reason]:*** Designates a district or campus that does not meet AYP standards on one or more indicator components and which of those components were not met. The *Missed AYP* label may be assigned to a district or campus in the rare situation where the accuracy and/or integrity of performance results have been compromised.

***Not Evaluated AYP:*** Designates a district or campus that is not evaluated for AYP for one of the following reasons:

- the district or campus is new;
- the campus closed mid-year;
- the campus does not have students in attendance for the full academic year;
- Juvenile Justice Alternative Education Program (JJAEP) and Disciplinary Alternative Education Program (DAEP) campuses;
- unusual circumstances (district with no students in grades tested; campus test answer documents lost in shipping); or
- the charter campus does not have students enrolled in the grades tested.

The final 2011 State Accountability Ratings for the standard and Alternative Education Accountability (AEA) procedures will be reported along with the final 2011 AYP Status for each campus and district. See the 2011 Accountability Manual on the Internet at <http://ritter.tea.state.tx.us/perfreport/account/2011/manual/index.html> for definitions of the ratings used in the state accountability system. The status label for each campus and district AYP report will be one of the following combinations of State Rating and AYP Status:

## Standard Procedures

- *Exemplary, Meets AYP*
- *Exemplary, Missed AYP – [reason]*
- *Exemplary, Not Evaluated AYP*
  
- *Recognized, Meets AYP*
- *Recognized, Missed AYP – [reason]*
- *Recognized, Not Evaluated AYP*
  
- *Academically Acceptable, Meets AYP*
- *Academically Acceptable, Missed AYP – [reason]*
- *Academically Acceptable, Not Evaluated AYP*
  
- *Academically Unacceptable, Meets AYP*
- *Academically Unacceptable, Missed AYP – [reason]*
- *Academically Unacceptable, Not Evaluated AYP*
  
- *Not Rated-Other, Meets AYP*
- *Not Rated-Other, Missed AYP – [reason]*
- *Not Rated-Other, Not Evaluated AYP*
  
- *Not Rated-Data Integrity Issues, Meets AYP*
- *Not Rated-Data Integrity Issues, Missed AYP – [reason]*
- *Not Rated-Data Integrity Issues, Not Evaluated AYP*

## AEA Procedures

- *AEA: Academically Acceptable, Meets AYP*

**Exhibit 1: 2011 AYP Indicators**

<p><b>Reading/English Language Arts</b>                  2010–11 tests (TAKS, TAKS (Accommodated), TAKS–M, TAKS–Alt, TELPAS Reading*, and LAT in Grades 3–8 &amp; 10)                  All students and each student group that meets minimum size requirements:                  African American                  Hispanic                  White                  Economically Disadvantaged                  Special Education                  Limited English Proficient</p>	<p><b>Performance Standard :80%</b>                  % counted as proficient on test for students enrolled the full academic year subject to the federal cap**</p>	<p><b>Performance Improvement/Safe Harbor:</b>                  10% decrease in percent not proficient on test and meet the standard <i>or</i> meet the improvement requirement for the relevant other measure (Graduation Rate <i>or</i> Attendance Rate)</p>
	<p><b>Participation Standard: 95%</b>                  Participation in the assessment program for students enrolled on the date of testing</p>	<p><b>Average Participation Rate:</b>                  95% participation based on combined 2009-10 and 2010-11 assessment data</p>
<p><b>Mathematics</b>                  2010–11 tests (TAKS, TAKS (Accommodated), TAKS–M, TAKS–Alt, and LAT in Grades 3–8 &amp; 10)                  All students and each student group that meets minimum size requirements (see above)</p>	<p><b>Performance Standard: 75%</b>                  % counted as proficient on test for students enrolled the full academic year subject to the federal cap**</p>	<p><b>Performance Improvement/Safe Harbor:</b>                  10% decrease in percent not proficient on test and meet the standard <i>or</i> meet the improvement requirement for the relevant other measure (Graduation Rate <i>or</i> Attendance Rate)</p>
	<p><b>Participation Standard: 95%</b>                  Participation in the assessment program for students enrolled on the date of testing</p>	<p><b>Average Participation Rate:</b>                  95% participation based on combined 2009-10 and 2010-11 assessment data</p>
<p><b>Other Indicator****</b>                  All students  <b>Graduation Rate</b>                  Class of 2010 (4-year rate)                  Class of 2009 (5-year rate)  <b>Attendance Rate</b>                  2009–10</p>	<p><b>4-yr Graduation Rate Goal: 90.0% <u>or</u></b>  <b>4-yr Graduation Rate Target: 75.0 <u>or</u></b>  <b>Safe harbor graduation rate Target**** <i>or</i></b>  <b>Improvement of 1.0 % <u>or more</u> <u>or</u></b>  <b>5-yr Graduation Rate Target: 80.0%</b>                  Graduation Rate for high schools, combined elementary/secondary schools offering Grade 12 and districts offering Grade 12</p>	<p><b>Attendance Rate Standard: 90.0%</b>  <b><i>or any improvement</i></b>                  Attendance Rate for elementary schools, middle/junior high schools, combined elementary/secondary schools not offering Grade 12, and districts not offering Grade 12</p>

\* See Performance and Participation in *Section III* for information on the use of TELPAS Reading in AYP.

\*\* No more than 3% of students in the district’s participation denominator can be counted as *proficient* on TAKS–M (2%) and TAKS–Alt (1%).

\*\*\* Safe harbor graduation rate target is defined as a 10.0 percent decrease in difference between the prior year 4-year Graduation Rate and the 90.0 percent statewide goal.

\*\*\*\* Student groups are not required to meet the Graduation Rate or Attendance Rate standards; however, they may be required to meet the standard or meet the improvement requirement on the Graduation Rate or Attendance Rate as part of performance improvement/safe harbor for Reading/English Language Arts or Mathematics

## Section III: Indicators, Components, Measures, and Standards

Data used to determine the 2011 AYP Status is organized into indicators, components, measures, and standards. Exhibit 2 provides a summary of the relationships among AYP indicators, components, measures, and standards.

### **Indicators**

There are three areas that serve as indicators on which a district or campus may be evaluated for AYP: Reading/English Language Arts, Mathematics, and one of the Other Indicators (either Graduation Rate or Attendance Rate). For Title I districts and campuses, missing AYP on the same indicator two years in a row triggers Title I School Improvement Program (SIP) requirements; a district or campus must meet AYP on the indicator that triggered SIP for two years in a row to exit the Title I SIP requirements.

### **Assessments Used for Reading/English Language Arts and Mathematics Indicators**

#### **TAKS and TAKS (Accommodated)**

Assessment results evaluated are the Reading/English Language Arts and Mathematics administration of the Texas Assessment of Knowledge and Skills (TAKS) for students in Grades 3–8 and 10. This includes TAKS results for both the English and Spanish versions of the test. Student performance at or above the Met Standard level adopted by the State Board of Education (SBOE) for the 2010-11 school year is considered proficient for TAKS results.

TAKS includes a test form called TAKS (Accommodated) for students served by special education who meet the eligibility requirements for certain specific accommodations. The TAKS (Accommodated) form includes format accommodations (larger font, fewer items per page, etc.) and contains no embedded field-test items. The decision to administer TAKS (Accommodated) to a student must be made by the student's Admission, Review, and Dismissal (ARD) committee.

#### **TAKS–Modified (TAKS–M)**

The TAKS–Modified (TAKS–M) is an alternate assessment based on modified academic achievement standards and is designed for students served by special education who meet participation requirements. TAKS–M covers the same grade-level content as TAKS but TAKS–M tests have been modified in format (larger format, fewer items per page, etc.) and test design (fewer answer choices, simpler vocabulary and sentence structure, etc.). The decision to administer TAKS–M to a student must be made by the student's ARD committee; it cannot be based solely on disability category or placement setting, nor can it be determined administratively for accountability purposes. TAKS–M is not available in Spanish.

### **Student Success Initiative (SSI) for Grades 5 & 8 Reading and Mathematics**

Current federal regulations implementing No Child Left Behind (NCLB) permit both the first and second administration of the TAKS, TAKS (Accommodated), or TAKS–M Grade 5 Reading and Grade 5 Mathematics, and Grade 8 Reading and Grade 8 Mathematics tests to be included in the AYP calculation for performance and participation.

#### **TAKS–Alternate (TAKS–Alt)**

The TAKS–Alternate (TAKS–Alt) is an alternate assessment based on alternate academic achievement standards and is designed for students with significant cognitive disabilities who meet the participation requirements. TAKS–Alt is not a traditional paper or multiple-choice test. Instead, the assessment involves teachers observing students as they complete instructional activities that link to the grade-level Texas Essential Knowledge and Skills (TEKS) curriculum. Teachers then score student performance using the TAKS–Alt rubric and submit the results and evidence through an online instrument.

#### **Linguistically Accommodated Testing (LAT) for Reading/English Language Arts and Mathematics**

NCLB legislation requires that states assess all LEP students in Reading/English Language Arts and Mathematics for the calculation of AYP. Linguistically Accommodated Testing (LAT) in Mathematics was implemented in the spring of 2005 for recent immigrants who were LEP-exempt and enrolled in Grades 3–8 and 10. In spring 2007, new Reading/English Language Arts LAT procedures were made available for LEP-exempt students in the same grades. The Language Proficiency Assessment Committee (LPAC) makes LEP exemption decisions for LEP students on an individual student basis in accordance with the procedures outlined in the *LPAC Decision-Making Process for the Texas Assessment Program* manual. TAKS–M in Reading/English Language Arts or Mathematics is not offered in Spanish, however, LEP-exempt students receiving special education services may be eligible for a LAT administration of TAKS–M. The decision to administer TAKS–M to LEP students served in special education programs must be made by the student’s ARD committee in conjunction with the LPAC.

Federal regulations require that states assess students in science in at least one elementary, middle school, and high school grade. For this reason, LAT science administrations are available for LEP-exempt students in Grades 5, 8, and 10. Federal regulations do not currently require the use of science results in AYP.

#### **Texas English Language Proficiency Assessment System (TELPAS) Reading**

NCLB legislation requires that states assess all limited English Proficient (LEP) students in Reading/English Language Arts. Texas English Language Proficiency Assessment System (TELPAS) Reading results are used in lieu of TAKS results for first-year recent immigrants who qualify for a LEP exemption in Reading/English Language Arts from TAKS. The Language Proficiency Assessment Committee (LPAC) makes LEP exemption decisions on an individual student basis in accordance with the procedures outlined in the *LPAC Decision-Making Process for the Texas Assessment Program* manual.

## **Data used for the Other Indicator**

### **Graduation Rate**

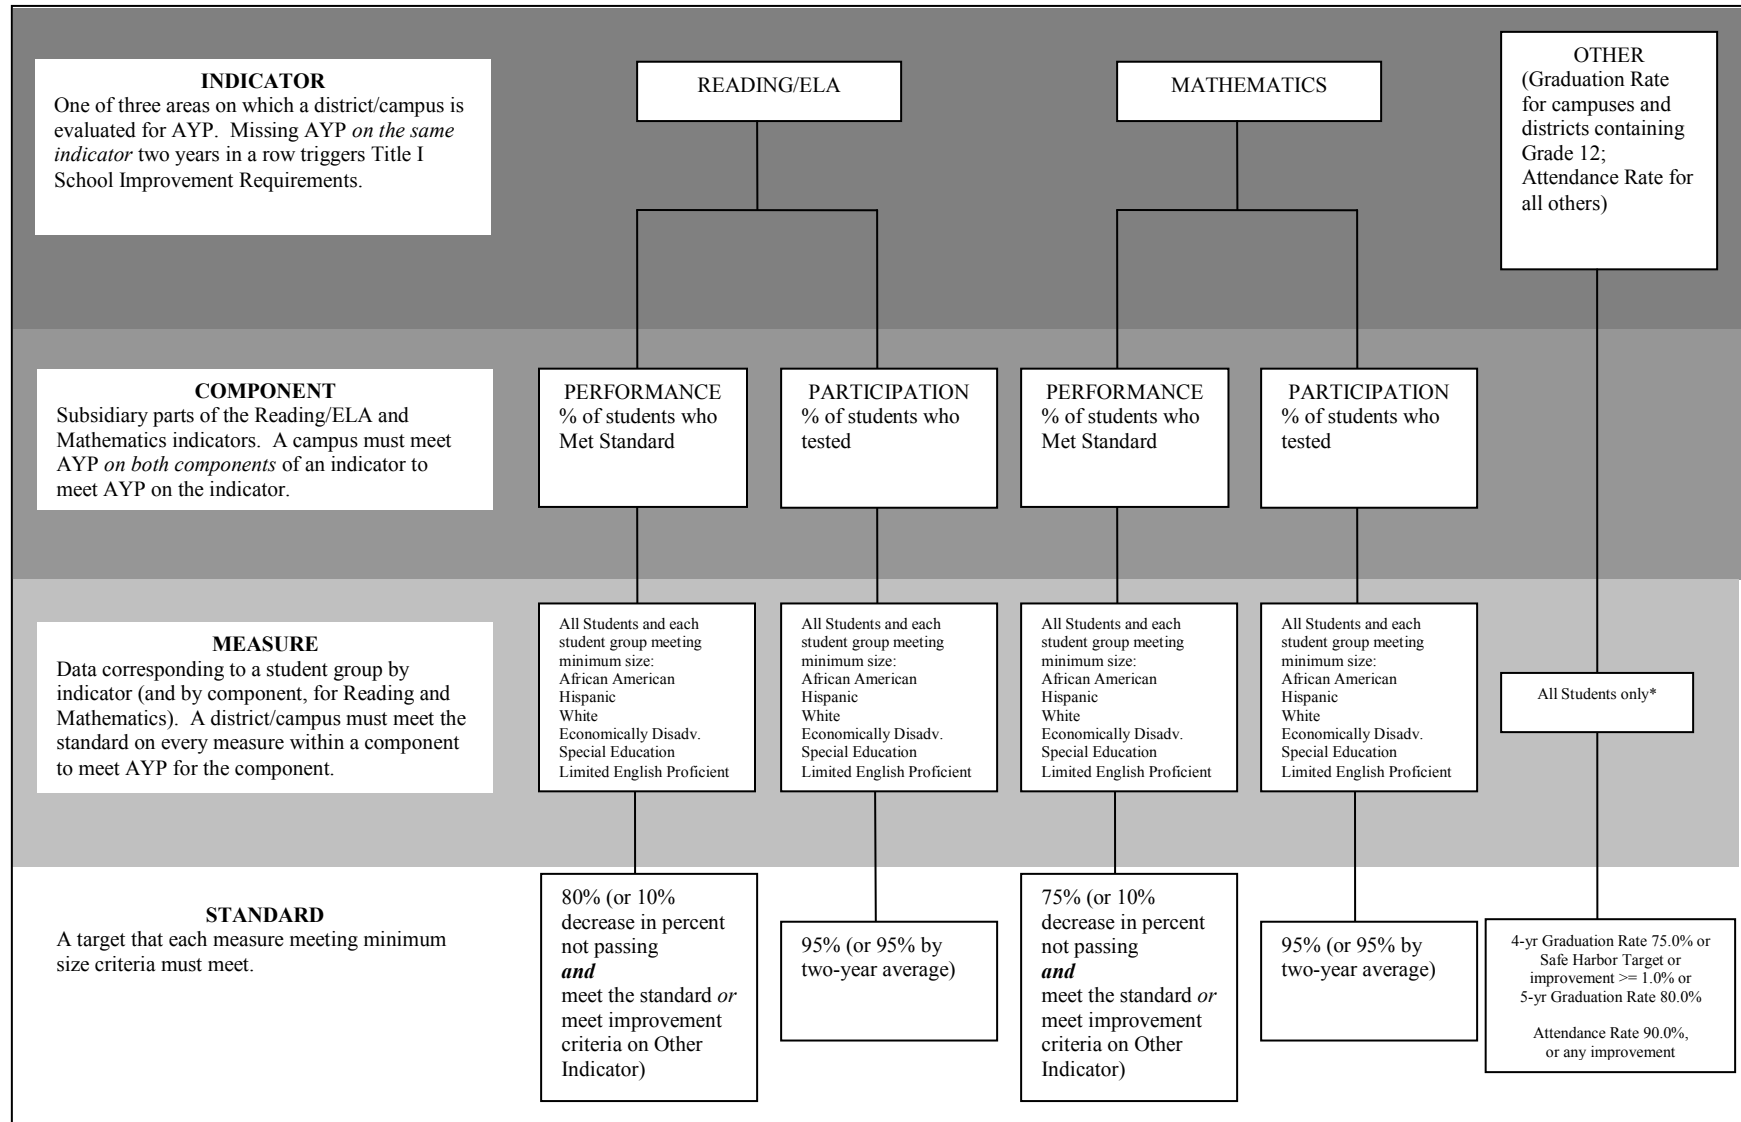

The Graduation Rate is the *graduates* component of the longitudinal secondary school completion rate, the same completion rate used for the Texas state accountability system. A longitudinal completion rate is the percentage of students from a class of beginning ninth graders who complete their high school education by their anticipated graduation date. The completion class has four components: percent graduating (either on time or early); percent continuing in public high schools after the expected graduation year; percent receiving General Educational Development (GED) certificates; and percent dropping out. The graduation rate component of the four-year longitudinal completion rates has been used to determine district and campus AYP status since 2003.

In April, 2010, the USDE approved the Texas graduation rate goal, annual targets, and use of the five-year extended longitudinal cohort graduation rate for AYP evaluations. The Class of 2010 four-year graduation rate and the Class of 2009 five-year graduation rate will be used to evaluate 2011 AYP. TEA calculates the four-year and five-year longitudinal completion rates using information provided by school districts through Public Education Information Management System (PEIMS). The methodology used to calculate five-year rates is identical to the methodology used to calculate four-year rates, with the exception that students are tracked for an additional year. For more information on the longitudinal secondary school graduation rates, see the annual report of *Secondary School Completion and Dropouts in Texas Public Schools* (<http://www.tea.state.tx.us/index4.aspx?id=4080>) and other technical documents at <http://www.tea.state.tx.us/index4.aspx?id=4080#documentation>

### **Attendance Rate**

All public school districts are required to submit student attendance and contact hours at the student detail level, for the entire school year, through PEIMS. The Attendance Rate is based on attendance of all students in Grades 1 through 12 for the entire school year, and is the same rate reported for the Texas Academic Excellence Indicator System (AEIS) Reports. School districts follow the official attendance accounting rules and regulations for all public school districts in Texas as outlined in the *Student Attendance Accounting Handbook (Handbook)*.

## Exhibit 2: Relationships Among AYP Indicators, Components, Measures, and Standards

\* Student groups may be evaluated as part of performance improvement/safe harbor for Reading/English Language Arts or Mathematics

## **Components of the Reading/English Language Arts and Mathematics Indicators**

### **Overview of Participation and Performance**

The Reading/English Language Arts and Mathematics indicators are each comprised of two components: performance and participation. Districts and campuses must meet *both* the performance (or performance improvement/safe harbor) *and* participation component for Reading/English Language Arts and Mathematics. If a district or campus misses the performance component on an indicator in one year and the next year meets the performance component but misses the participation component on the same indicator, the district or campus would be considered to have missed AYP for that indicator two years in a row, potentially triggering Title I School Improvement requirements for the district or campus. The opposite also holds: the district/campus could miss participation on an indicator the first year and meet participation but miss performance the next year for the same indicator, and the district/campus would be considered to have missed AYP for that indicator two years in a row.

Performance and participation components of the Reading/English Language Arts and Mathematics indicators are determined from the same set of assessment information for each school district.

### **Federal Race and Ethnicity Reporting**

Since 1997, the Office of Management and Budget (OMB) and the U.S. Department of Education (USDE) have worked to publish new revised standards for the collection of data on race and ethnicity. The USDE required all states to collect information on the race and ethnicity of public school students by the 2009-2010 school year. The new data collection requirements affected education information systems in school districts, postsecondary institutions, state educational agencies, and other state agencies across the country. The USDE encouraged, but did not require, states to use a data allocation measure, or ‘bridge’ in their transition to the new racial and ethnic reporting categories, particularly for trend analysis. Federal guidance allows states to ‘bridge’ the ‘two or more races’ category into single-race categories in order to address disproportionate representation as a result of changes in the data collection.

The Texas AYP evaluation is based on seven student groups, three of which identify students based on racial and ethnic reporting categories: Hispanic, African American, and White student groups. Students reporting more than one race are included only in the All Students group. Based on a TEA staff review of reported PEIMS data, the number of multiracial students reporting more than one race that includes both Black/African American and White racial categories has the potential to disproportionately affect trend data. As a result, Texas will use a modified bridging technique for state and federal accountability purposes to address potential disproportionate indicator results.

Texas will apply a Federal Race/Ethnicity Provision to the 2011 AYP evaluations in order to address multiracial students reporting more than one race that includes both Black/African American and White racial categories. District and campus 2011 AYP results will be based on the performance and participation results of both the new federal data collection requirements and a ‘bridged’ single-race category based on the former definition reported in the prior year. See the *Participation Student Groups Evaluated* and *Performance Student Groups Evaluated* sections below for more information.

### Selecting Assessment Results

All test results in Reading/ELA and Mathematics for every student in Grades 3 – 8 and 10 are processed for the calculation of AYP. Processing decisions are made to determine the single test result that will be used for the AYP subject indicators. The general steps in determining a student’s test results for the AYP calculation include (1) review all test answer documents for each test subject submitted during Spring 2011, regardless of score code, (2) identify the single test result that will be used in the AYP calculation for Reading, (3) identify the single test result for Mathematics, and (4) include the single test result in the AYP Reading and Mathematics calculations.

The single test result for each student is included in the following AYP data table categories.

- Count of students enrolled on the day of testing, or the **Participation** count of **Total Students** (participation denominator),
- If participant in an assessment, include in Participation calculation of **Number Participating** (participation numerator),
- If a valid, scored test result meets the Full Academic Year (accountability subset) definition, include in **Performance** calculation of **Number Tested** (performance denominator),
- For general assessments, if the student passing standard for the test is met;  
**or**  
for alternate assessments, if the student passing standard for the test is met *and* the test result is selected for inclusion under the federal cap, then include in Performance calculation of **Met Standard** (performance numerator).

The AYP student listings provided to school districts include the student status as reported in AYP. The AYP student status is helpful for determining in which of the AYP data table categories students appear. See *Appendix C* for more information available to school districts that help identify student categories and statuses and explain their use in the AYP calculation.

### Students Tested on a Single Assessment

For students taking only one assessment in reading (or mathematics), the single assessment result is used to evaluate AYP. For example, a student may take the TAKS and no other test. The AYP results will be based on information provided in the TAKS

answer document, such as demographic information and grade level. Please note that the number of school years of enrollment in U.S. schools is only indicated on the TELPAS Reading answer document.

### **Students Tested on More than One Assessment**

The Texas Assessment Program procedures and data used for 2011 AYP remain essentially unchanged from 2009 and 2010. Changes to the 2010 assessment calendar and online processing of test data for the TAKS–Alt and TELPAS greatly reduced the number of duplicate test documents submitted for each student.

There are rare cases in which students are tested on more than one subject assessment. In these cases a hierarchy of assessments is applied in AYP to produce a single test result for AYP. In those cases, the single test result used for calculating AYP is the result used in every student group for which the student is a member.

### **Student Success Initiative (SSI), Grades 5 and 8**

For students in Grades 5 and 8 who are subject to the state Student Success Initiative (SSI) requirements, the TAKS Reading and Mathematics assessment results from the second administration are evaluated for students who do not meet the student passing standard in the first administration. The second administration results considered for AYP calculations include students taking either English or Spanish TAKS assessments to meet the SSI requirements.

There are situations where a student may take the TAKS assessment during the first administration and, after determination by the ARD committee, take TAKS (Accommodated) or TAKS–Modified (TAKS–M) during the second administration. Students in Grades 5 and 8 may meet their SSI requirements in either the first or second administration by passing either TAKS, TAKS (Accommodated), or TAKS–M. In these cases, the passing assessment result will be used for AYP calculations.

For students that take either TAKS, LAT TAKS, or TAKS (Accommodated) in the first administration of Reading/English language arts and Mathematics, and TAKS–M in the second administration, the TAKS–M results will be used for AYP. Note that for 2011 AYP, TAKS–M met standard results are subject to the 2% Federal Cap. The TAKS–M results are included in the AYP performance rates after the federal cap process.

### **TELPAS Reading**

A student may take the TELPAS Reading and TAKS Reading assessment, and both may be appropriately coded scored documents. The scored TAKS assessment results are used in the AYP Reading calculation for this student; the

TELPAS Reading results are not used. If a student takes the TELPAS Reading and any other assessment, the student identifying information on both answer documents must match in order for the AYP results to be accurately processed.

**Assessments Included in 2011 AYP Calculations**

The Exhibits on the following two pages show, by subject and assessment, all tests included in 2011 AYP calculations.

**Exhibit 3: Assessments Included in 2011 AYP Calculations**

<i>Reading/ELA Assessments</i>					
	<b>Participation</b> 95% Standard			<b>PERFORMANCE</b> <b>(ACCOUNTABILITY SUBSET)</b> 80% Standard	
	<b>Total Students</b>	<b>Number Participating</b>	<b>→</b>	<b>Number Tested</b>	<b>Met Standard</b>
<b>TAKS</b>	Yes	If participant	<b>→</b>	If in the Accountability subset	If standard is met
<b>TAKS (Accommodated)</b>	Yes	If participant	<b>→</b>	If in the Accountability subset	If standard is met
<b>TAKS–M / LAT TAKS–M*</b>	Yes	If participant	<b>→</b>	If in the Accountability subset	If standard is met (subject to 2% cap)
<b>TAKS–Alt</b>	Yes	If participant	<b>→</b>	If in the Accountability subset	If standard is met (subject to 1% cap)
<b>TELPAS Reading*</b>	Yes	<b>Non-Participant</b>	<b>N/A</b>	<i>Not Included</i>	<i>N/A</i>
<b>LAT version of TAKS*</b>	Yes	If participant	<b>→</b>	If in the Accountability subset	If standard is met

\* Students in their first year in U. S. schools are counted as participants, but excluded from the performance calculation.

**Exhibit 3 (continued): Assessments Included in 2011 AYP Calculations**

<b>Mathematics Assessments</b>					
	<b>Participation</b> 95% Standard			<b>PERFORMANCE</b> <b>(ACCOUNTABILITY SUBSET)</b> 75% Standard	
	<b>Total Students</b>	<b>Number Participating</b>	<b>→</b>	<b>Number Tested</b>	<b>Met Standard</b>
<b>TAKS</b>	Yes	If participant	<b>→</b>	If in the Accountability subset	If standard is met
<b>TAKS (Accommodated)</b>	Yes	If participant	<b>→</b>	If in the Accountability subset	If standard is met
<b>TAKS-M / LAT TAKS-M*</b>	Yes	If participant	<b>→</b>	If in the Accountability subset	If standard is met (subject to 2% cap)
<b>TAKS-Alt</b>	Yes	If participant	<b>→</b>	If in the Accountability subset	If standard is met (subject to 1% cap)
<b>LAT version of TAKS*</b>	Yes	If participant	<b>→</b>	If in the Accountability subset	If standard is met

\* Students in their first year in U. S. schools are counted as participants, but excluded from the performance calculation.

## **Participation**

The participation component of the Reading/English Language Arts and Mathematics Indicators is required for all districts and campuses to meet AYP. As stated earlier, the performance and participation components are determined from the same set of assessment information for each district and campus. Likewise, the single assessment result determined for each student is used on both the performance and participation components for that subject area. All test results begin in the first AYP data table category, and only if certain criteria are met will the test proceed to the next category. More information on AYP Data Table categories is provided in *Appendix C*. This section describes the first two categories:

- Count of students enrolled on the day of testing, or the **Participation** count of **Total Students** (participation denominator),
- If participant in an assessment, include in Participation calculation of **Number Participating** (participation numerator).

### **Calculating Participation Measures**

Districts are required to submit test answer documents for every student enrolled in the grades tested on the test date. Students are counted as participants (numerator of the participation rate) if they were tested on any of the following assessments. Participants also include students who were tested but the test answer document was not scored for other reasons.

TAKS;

TAKS (Accommodated) for students served by special education who meet the eligibility requirements for certain specific accommodations;

TAKS–M for students served by special education who meet participation requirements for TAKS–M and for whom TAKS is not appropriate;

TAKS–Alt for students served by special education with significant cognitive disabilities who meet the participation requirements;

TELPAS (for Reading only) for recent immigrant LEP students exempted from TAKS or TAKS–M by the LPAC and in their first school year of enrollment in U.S. schools; or

LAT for recent immigrant LEP students exempted from TAKS or TAKS–M by the LPAC.

The participation measures are calculated as the number of students participating divided by the Participation count of students enrolled at the time of testing. Counts are summed across grades for Grades 3–8 and 10 for each subject (Reading/English Language Arts and Mathematics). Participation measures are calculated for all students and each student group. All calculations are rounded to the nearest whole percent.

### **Participation Count of Students Enrolled at the Time of Testing**

Participation measures are based on all students enrolled at the time of testing defined as the total number of assessment documents submitted by each school district (denominator of the participation rate). The calculation is *not* limited to students enrolled for the full academic year. Participation counts include students with answer documents submitted from the first and second administrations of TAKS Grade 5 Reading, TAKS Grade 5 Mathematics, TAKS Grade 8 Reading, and TAKS Grade 8 Mathematics. Students who were administered a make-up test within the testing window are also included in the participation rate calculation. School districts provide student test answer documents for all eligible students enrolled, and are required by oath to follow prescribed testing procedures as described in the *2011 District and Campus Coordinator Manual*. The answer documents are coded to show which test is administered to each student and whether the test is scored.

### **Identification of Participants**

Student test results included as participants are based on the approved amendments to the 2011 Texas AYP Workbook. The test document score code is used to determine whether a student is counted as a participant after determining the single assessment result used for AYP. Students coded as absent on the test answer document are not counted as participants and are therefore not included in the participation numerator. Other situations exist that may cause student test results to be excluded from the participation numerator. Below is a summary of each assessment and unique situations that may cause student test results to be counted as a non-participant and excluded from the participation numerator.

#### **TAKS, TAKS (Accommodated), and TAKS–Modified (TAKS–M)**

Students coded as absent on the test answer document are not counted as participants and are therefore not included in the participation numerator.

#### **TAKS–Alternate (TAKS–Alt)**

Student results for Reading and Mathematics TAKS–Alt online submission are used in AYP. Students in the TAKS–Alt submission who have a TAKS–Alt assessment category of “Not Assessed” are not counted as participants. However, TAKS–Alt student results with an assessment category of “Complete Score”, “Partial Score”, or “No Response Observed” are counted as participants and included in the participation numerator.

#### **Linguistically Accommodated Testing (LAT) for TAKS and TAKS–M**

TAKS and LAT TAKS–M administrations are available to eligible recent immigrant LEP students who have been granted an exemption to the state assessments by the LPAC on the basis of limited English proficiency. Eligible students LEP-exempt from the Reading or Mathematics TAKS or TAKS–M assessment are considered participants for AYP if they were tested with linguistic accommodations and their test answer document indicates such testing.

In order to be considered a participant and included in the participation numerator, one of the following must occur:

- Column B of the LAT INFO section of the TAKS answer document must not indicate that the student was absent,
- Column B indicates that the test was incomplete, or
- At least one bubble is gridded in Column A of the LAT INFO section.

### **TELPAS Reading**

Federal regulations allow recent immigrant students in their first school year of enrollment in U.S. schools and who are LEP-exempt from TAKS to be counted as participants in AYP through TELPAS Reading. In order to remain compliant with the ESEA/NCLB standards and assessment requirements, Texas is not allowed to use TELPAS Reading for recent immigrant students in their second or third year of enrollment in U.S. schools for AYP purposes. Recent immigrant students enrolled in their second or third school year in U.S. schools will not be counted as participants in AYP if TELPAS Reading is the only test taken. Any other TAKS test taken along with TELPAS Reading will be subject to AYP assessments processing rules. The use of other assessments in AYP for recent immigrant students is based on matching student identification information on both test answer documents.

LEP students who arrived in the United States for the first time during the second semester of the current school year and are deemed to be non-English readers by the LPAC are coded on the TELPAS Reading answer document (“N”). These students receive a Beginning proficiency rating on TELPAS Reading, are considered participants, and are included in the participation numerator. Students coded as absent on the test answer document are not counted as participants and are therefore not included in the participation numerator.

The following Exhibit shows how the TELPAS Reading results are required to be included in the 2011 AYP calculations.

**Exhibit 4: TELPAS Reading and LAT TAKS Included in 2011 AYP Calculations**

<b>Texas English Language Proficiency Assessment System (TELPAS) Reading</b>					
	<b>Participation 95% Standard</b>			<b>Performance/Accountability Subset 80% Standard</b>	
	<b>Total Students</b>	<b>Number Participating</b>		<b>Number Tested</b>	<b>Met Standard</b>
<b>First year of enrollment in U.S. schools</b>	Yes	If participant	➔	<i>Not Included</i>	<i>Not Included</i>
<b>Second or Third year (or more) of enrollment in U.S. schools</b>	Yes	<b>Non-Participant</b>	<b>N/A</b>	<i>Not Included</i>	<i>Not Included</i>

<b>Linguistically Accommodated Testing (LAT) for TAKS Reading/ELA and Mathematics</b>					
	<b>Participation 95% Standard</b>			<b>Performance/Accountability Subset Reading/ELA: 80% Standard Mathematics: 75% Standard</b>	
	<b>Total Students</b>	<b>Number Participating</b>		<b>Number Tested</b>	<b>Met Standard</b>
<b>First year of enrollment in U.S. schools *</b>	Yes	If participant	➔	<i>Not Included</i>	<i>Not Included</i>
<b>Second or Third year (or more) of enrollment in U.S. schools</b>	Yes	If participant	➔	If in the Accountability subset	If standard is met

\* Student test results are only excluded if there is a matching TELPAS Reading answer document indicating first year in U. S. schools.

### **Participation Student Groups Evaluated**

In addition to all students, the student groups for which AYP participation measures are calculated are African American, Hispanic, White, economically disadvantaged, special education, and LEP students. Student information coded on the test answer documents is used to assign students to groups. Student groups are presented as a percentage of all students on AYP data tables rounded to the nearest whole percent.

### **Federal Race/Ethnicity Provision**

Texas will apply a Federal Race/Ethnicity Provision to the 2011 AYP evaluations in order to address possible disproportionate representation in the trend data for accountability purposes only. Under this provision, students who indicate their ethnicity is not Hispanic/Latino and who select multiple races that include both the Black/African American and White racial categories will be distributed into either the African American or White groups based on the information submitted on the 2009-10 TAKS answer documents for these same students under the former definitions. See the section below, *Performance Student Groups Evaluated*, for detailed information regarding this provision.

### **All Students**

#### **Minimum Size Requirements**

For the participation measure to be included in the AYP calculation at the all students level, the district or campus must have at least 40 students enrolled at the time of testing. Districts and campuses with fewer than 40 students enrolled at the time of testing are not required to meet the participation rate measures.

### **Student Groups**

#### **Minimum Size Requirements**

For student groups' participation measures to be evaluated for AYP, a district or campus must have:

- 50 or more students in the group enrolled on the test date (summed across Grades 3–8 and 10) for the subject, and the student group must comprise at least 10 percent of all students enrolled on the test date; *or*
- 200 or more students in the group enrolled on the test date, even if that group represents less than 10 percent of all students enrolled on the test date.

### **Special Education**

If a test document for TAKS (Accommodated), TAKS–M, LAT TAKS–M, or TAKS–Alt is submitted for a student for any subject, the student is included in the special education student group for both subjects. If a student is identified as a special education student on *any* test document, including TAKS, for any subject, the student is included in the special education student group for both subjects.

### **LEP**

Only students identified as LEP in 2010-11 are included in the LEP group for participation. If a student is identified as a current year LEP student on the TAKS answer documents for either Reading/English Language Arts or Mathematics, the student is included in the LEP group for both subjects. If a TELPAS test document is submitted for any TELPAS component, the student is included in the LEP student group for both subjects. If a TELPAS test document is not submitted and the LEP field is blank on the TAKS answer documents, the student is assumed to be non-LEP.

## **Participation Target**

### **95% Standard**

For each district and campus, measures meeting the minimum size requirement for students enrolled on the test date must have **95 percent** of students participating for Reading/English Language Arts and Mathematics.

### **Average Participation Rate**

For each district and campus, measures meeting minimum size requirements for students enrolled on the test date that do not meet the 95 percent participation standard will be reevaluated using the aggregate participation results for two years. Reading/English Language Arts and Mathematics participation results for 2010-11 will be combined with the 2009-10 participation results. The numerators of both school years are summed and the denominators of both school years are summed and the resulting totals are divided to get the average participation rate for two years.

## **Performance**

Like participation, the performance component of the Reading/English Language Arts and Mathematics Indicators is required for all districts and campuses to meet AYP. The performance and participation components are determined from the same set of assessment information for each district and campus, therefore, the single assessment result determined for each student is used on both the performance and participation components for that subject area. The previous Participation section described the first two AYP data table categories that make up the participation component of AYP. Test results included as participants (in the participation numerator) are the only results considered for the performance component. This section describes the next two categories:

- If a valid, scored test result meets the Full Academic Year (accountability subset) definition, include in **Performance** calculation of **Number Tested** (performance denominator),
- For general assessments (TAKS, TAKS (Accommodated), or LAT TAKS), if the test met standard;  
**or**  
for alternate assessments (TAKS–M, TAKS–Alt), if the test met standard *and* is selected for inclusion under the federal cap, **then** include in **Performance** calculation of **Met Standard** (performance numerator).

### **Calculating Performance Measures**

In order to meet the AYP performance component of the Reading/English Language Arts and Mathematics indicators, all districts and campuses must meet the performance standard for percent proficient or the performance improvement/safe harbor provision for all students and each student group meeting minimum size requirements.

The Reading/English Language Arts and Mathematics performance measures are defined as the percent of students counted as proficient for AYP. The measure is calculated as the number of students counted as proficient divided by the performance count of total students tested, by subject. All calculations are rounded to the nearest whole percent.

#### **Performance Count of Total Students Tested**

Performance measures are based on the number of student test results included as participants for AYP (in the participation numerator). The count of the total number of students tested include valid, scored test results for AYP participants who meet the definition of full academic year, or accountability subset.

#### **Performance Full Academic Year**

Only participating students enrolled in the district or on the campus for the full academic year are included in the performance measure. TELPAS Reading assessment results are excluded from performance measure calculations (refer to the Assessments Included in 2011 AYP Calculations chart for more information). Foreign exchange students with scored test results on TAKS or other assessments are not excluded from the performance measure.

*Districts* Test results are included in the district-level measure for students enrolled in the district on the PEIMS fall enrollment snapshot date. For 2010-11, the snapshot date was October 29, 2010.

*Campuses* Test results are included in the campus-level measure for students enrolled on the campus on the PEIMS fall enrollment snapshot date.

## Identification of Proficient Students

### **TAKS and TAKS (Accommodated)**

The student passing standard used for the 2011 AYP calculation is based on the vertical scale score standard for students in grades 3-8 and the *Met Standard* level (scale score of 2100) for grade 10 students. TAKS and TAKS (Accommodated) student test results included as participants for AYP (in the participation numerator) are the only results considered for the performance component.

### **TAKS–Modified (TAKS–M)**

The student passing standard for TAKS–M was determined in August, 2008. The *Met Standard* student passing level for students in grades 3-8 and 10 will continue to be applied for 2011 AYP. TAKS–M student test results included as participants for AYP (in the participation numerator) are the only results considered for the performance component.

TAKS–M student passing results are subject to the 2% Federal Cap and are included in the performance numerator only after the federal cap process determines that the result can be counted for AYP.

### **SSI Requirements**

Beginning in 2009, students taking TAKS–M are subject to SSI requirements.

#### *Grades 5 & 8 Reading and Mathematics*

Grades 5 & 8 Reading performance is the cumulative percent passing calculated by combining the April and May administrations of TAKS, TAKS (Accommodated), and TAKS–M. Grades 5 & 8 Mathematics performance is the cumulative percent passing calculated by combining the April and May administrations of TAKS, TAKS (Accommodated), and TAKS–M. For more information, see *Students Tested on More than One Assessment* in this section.

TAKS–M student passing results are subject to the 2% Federal Cap and are included in the performance numerator only after the federal cap process determines the result can be counted as proficient for AYP.

### **TAKS–Alternate (TAKS–Alt)**

Student results from the Reading and Mathematics TAKS–Alt online submission with a TAKS–Alt assessment category of “Complete Score” and “Partial Score” are included in the performance measure. TAKS–Alt student test results included as participants for AYP (in the participation numerator) are the only results considered for the

performance component. TAKS–Alt student results with an assessment category of “No Response Observed” are counted as participants but are not considered scored tests; the results are not included in the performance measure (denominator of the performance rate).

TAKS–Alt student passing results are subject to the 1% Federal Cap and are included in the performance numerator only after the federal cap process determines the result can be counted for AYP.

### **Linguistically Accommodated Testing (LAT) for TAKS and TAKS–M**

The LAT TAKS and LAT TAKS–M administrations for Reading/ELA and Mathematics are available to recent immigrant LEP students who have been granted an exemption by the LPAC on the basis of limited English proficiency. The LAT TAKS Reading/ELA and Mathematics results are used for AYP performance for students in their second or third year of enrollment in U.S. schools who are LEP-exempt from the TAKS and TAKS–M by the LPAC.

The LAT TAKS Mathematics tests results for students in their first year in U.S. schools are not included in the performance measure calculation as allowed by federal regulation. Student information on the number of school years of enrollment in U.S. schools is found on the TELPAS Reading answer document. In order for student LAT results to be excluded from the AYP performance measure based on the number of years of enrollment in U.S. schools, the student identification information on the TELPAS Reading answer document must match the TAKS/TAKS–M answer document used for the LAT administration. The only LAT TAKS results excluded from AYP performance measures are those with matching TELPAS Reading answer documents with Years in U.S. Schools values indicating “Enrolled in 1st semester” or “Enrolled in 2nd semester” of the 2010-11 school year.

Student LAT TAKS and LAT TAKS–M test results included as participants for AYP (in the participation numerator) are the only results considered for the performance component. In order to be included in the performance calculation, the LAT INFO section of the TAKS answer document must have a value and column B must not indicate that the student was absent or that the test was incomplete. See the Participation discussion in this section for more information on determining the participation status of students with LAT results.

### **TELPAS Reading**

Federal regulations allow recent immigrant students in their first school year of enrollment in U.S. schools and who are exempted from TAKS to be counted as participants in AYP through TELPAS Reading, and excluded from the performance measures. However, Texas is not allowed to use TELPAS Reading for recent immigrant students in their second or third year of enrollment in U.S. schools for AYP purposes; therefore, if this is the student’s only test, the

student will be considered a non-participant. As in 2010, the TELPAS Reading assessment results for students in their first school year of enrollment in U.S. schools will be counted appropriately for participation and will not be included in the *performance* component. See the Participation discussion in this section for more information on determining the participation status of students with TELPAS Reading results.

### **Federal Cap on Alternate Assessments (TAKS–M and TAKS–Alt)**

NCLB regulations limit the number of proficient assessment results from alternate assessments that may be counted as such in evaluating AYP. The limit on proficient alternate assessment results is referred to as the AYP federal cap. The federal cap is applied to two types of assessment results: alternate assessments based on modified academic achievement standards that are subject to a 2% cap, and alternate assessments based on alternate achievement standards for students with the most significant cognitive disabilities that are subject to a 1% cap. In the following section, the term “proficient” is defined as alternate assessments used for AYP evaluations that have been included in the federal cap limit. Results that “exceed the cap” are those that are not included within the limit by the federal cap process.

#### **General Guidelines Related to the Federal Cap**

USDE final federal regulations issued on April 9, 2007, require two separate caps for including the results of students taking alternate assessments. The number of proficient students taking alternate assessments based on *alternate achievement standards* may not exceed 1% of each district’s total participation. The number of students taking alternate assessments based on *modified achievement standards* and being counted as proficient for AYP may not exceed 2% of each district’s total participation plus any unfilled 1% cap slots.

For Texas, the alternate assessments with modified achievement standards are the TAKS–Modified (TAKS–M). The TAKS–Alternate (TAKS–Alt) assessments are for students with the most significant cognitive disabilities. The federal cap limit is calculated for each school district and applies to results on TAKS–M and TAKS–Alt only. If the number of TAKS–Alt student passing results in a school district falls below the 1% cap, the unfilled slots may be used by student passing results from TAKS–M. The TAKS–M 2% cap limit is calculated as 2% plus any unused slots from TAKS–Alt. The overall federal limit on student passing results from both TAKS–M and TAKS–Alt must be no more than 3%. The district limit on TAKS–Alt student passing results must not exceed the 1% cap and unfilled slots below the 2% cap may not be added to the 1% cap. After the federal cap process is completed, the student passing results over the district federal cap limit are reclassified as *non-proficient* and reported as such in AYP performance results in the AYP campus, district, and state levels data tables. Texas school districts with results from TAKS–Alt and TAKS–M that do not exceed the district limit are not affected by the cap and all results remain unchanged. Maintaining the federal cap limits is not required in order to Meet AYP. School districts with student passing results from TAKS–Alt and TAKS–M that exceed the district limit may meet AYP based on their performance

on all other assessments. Even with reclassified students included as non-proficient, a district or campus may still have sufficient performance results to meet the standards and receive a designation of *Meets AYP*.

### **How to calculate the 1% and 2% Federal Cap Limit**

A school district's federal cap limit is based on the total number of students enrolled in the district in Grades 3 – 8 and 10 on the day of testing, reported as the AYP District Participation denominator by subject. The participation denominator can be found in the participation section of the school district AYP data table (Total Students in All Students column; see *Appendix C*). The federal cap limit is calculated by subject area for Reading/English Language Arts (ELA) and Mathematics and each subject may have a different participation denominator.

The federal cap limits are calculated for each type of alternate assessment, as shown below.

### **District Participation Denominator x .01 = TAKS–Alt Federal Cap Limit**

### **District Participation Denominator x .02 = TAKS–M Federal Cap Limit**

Note that the federal cap does not limit the number of students with disabilities who can take alternate assessments. Decisions regarding the appropriate assessment for students with disabilities should be made based on state policies and procedures outlined in the *Admission, Review, and Dismissal (ARD) Committee Decision-Making Process for the Texas Assessment Program*. Also note that student passing results that exceed the cap limits are reclassified to non-proficient for use in AYP proficiency rates that are used to evaluate AYP status. There is no effect on the AYP participation calculations. Other state performance results and state accountability ratings are not affected by the federal cap. There are no student level consequences (for graduation or other assessment requirements) for exceeding the cap limit.

It should be emphasized that the federal cap relates to counting students as proficient for AYP purposes only and **does not** provide direction to ARD committees regarding how students with disabilities should be assessed. **It is important that local school districts ensure that appropriate assessments are selected and administered to students with disabilities.**

### **1% Cap on TAKS–Alt**

*Selection of Students: Random Selection of TAKS–Alt results*

For 2011, the TAKS–Alt student passing results are limited to the federal cap level by applying a random assignment of results to be included in the 1% cap. School district TAKS–Alt met standard results are given priority and are randomly selected until

the 1% limit is reached. Selecting students for the 1% federal cap is not dependent on whether the campus or district will meet AYP. Therefore, district TAKS–Alt passing results are selected up to the 1% federal cap limit and are counted as proficient for AYP. Student results that remain unselected are considered over the federal cap limit and reclassified as non-proficient. Note that the random assignment of proficient results for AYP makes it impossible for districts to project the outcome of this selection process. After determining the number of students in each campus included in the 1% federal cap, TEA begins the cap processing for the 2% cap.

### **Exceptions Applied prior to the Preliminary Release**

Before preliminary release of 2011 AYP information, exceptions to the 1% cap will be processed for districts who registered facilities through the TEA Residential Facilities (RF) Monitoring system, using the application known as RF Tracker. Exceptions to the 1% cap will also include districts identified and included in the *2010-2011 Directory for Services for the Deaf in Texas, Regional Day School Programs for the Deaf (RDSPD)*. This directory includes school districts that serve students who are referred to the RDSPD in their school district.

Districts identified through RF Tracker or the RDSPD Directory will be initially granted an exception to the 1% cap, which will increase the district's cap by the total number of TAKS–Alt students passing and that exceed the 1% cap limit. Federal regulation allows school districts to exceed the overall 3% federal cap only if granted an exception to the 1% cap and only by the amount of the exception. Therefore, districts that are granted an exception prior to the preliminary release must be limited to the 2% federal cap on TAKS–M proficient results. The overall district cap on both the TAKS–Alt and TAKS–M proficient results may exceed 3% only by the amount of the exception to the 1% cap.

Please see *Section IV: Exceptions* for more information on the exception process applied prior to the preliminary release of AYP.

### **Federal Cap Recapture**

Federal regulations clearly indicate that the state as a whole cannot exceed the 1% cap under any circumstances. Therefore, a statewide comparison of the number of students counted as proficient in AYP must be conducted before the federal cap process is concluded.

### **2% Cap on TAKS–M**

The 2% federal cap on TAKS–M student passing results requires two steps: 1) a campus priority or ranking, and 2) the selection of students from each campus only to the extent needed for the campus to meet AYP. School districts have

the opportunity to review and modify the campus priority that will direct the selection of students. Once the list is finalized, the process begins with the campuses assigned the highest priority. Student results are selected in order to maximize the number of campuses that Meet AYP.

### **Campus Rankings**

The campus priority or ranking list is originally developed by TEA and provided to school districts for review and modification. The TEA campus ranking prioritizes campuses by grades served and proportion of students with disabilities enrolled. The TEA campus ranking order is specifically sorted by the following Fall 2010-11 PEIMS information for each campus. These data will match the information reported in the 2010-11 AEIS Reports issued in November 2011.

1st Sort: School Type

(sort order: Secondary, Both, Middle, Elementary)

2nd Sort: Highest Grade Served on the Campus

(as shown by the grade span value, with sort order: highest to lowest)

3rd Sort: Student Enrollment in Special Education Program

(percent special education, sort order: highest to lowest)

The TEA campus ranking is provided to school districts in late May, 2011, through the Texas Education Agency Secure Environment (TEASE) Accountability Website. School districts have the opportunity to review and modify the campus ranking using any method they wish without justification provided to TEA. Instructions are provided to school districts on the TEASE Accountability Campus Ranking application. The school district deadline for providing modified campus rankings for 2011 AYP evaluations to TEA is June 24, 2011. **School districts that have not provided any campus ranking changes by the June 24, 2011 deadline agree to accept the TEA campus ranking.** After June 24, 2011, there are no further opportunities to change the campus priority rankings that are used to select students to be included in the 2% federal cap.

### **Student Selection Process**

The 2011 AYP federal cap process is designed to maximize the number of campuses in the district that Meet AYP and include the maximum number of TAKS–M student passing results in the allowable cap limit for each school district. The 2% federal cap process begins after completion of the 1% cap process in which TAKS–Alt results have been assigned to the campuses and school districts. School districts have either provided their campus rankings or have chosen to accept the TEA default ranking.

For each school district, TAKS–M student passing results form a ‘pool’ from which students’ results are selected to be included in the 2% cap. If the total pool count is less than or equal to the district cap limit, then all TAKS–M student passing results will be classified as proficient for AYP. If the total pool count is larger than the cap, then some student passing results will have to be reclassified as non-proficient or exceeding the cap for AYP, while the student results that can be included up to the 2% limit are classified as proficient. The student passing results from TAKS–M, referred to as the “pool” of proficient results, are the only student results considered for inclusion in the 2% federal cap. The student selection process is conducted by subject. The process to select students from each campus within a school district is conducted in three stages. Student results selected at each stage that are included in the federal cap will increase the AYP proficiency rates of both the campus and district. For each of the stages described below, students are only selected up to the federal cap limit. Once the cap limit is reached, the process ends and the 2011 AYP results are determined for the campus and school district.

### ***Stages of student selection***

- I. Students are selected beginning with the first campus in the campus ranking to the extent needed for the campus to Meet AYP.
- II. If additional students can be included under the federal cap, students are selected to the extent needed for the district to Meet AYP.
- III. If additional students can be included under the federal cap, students are selected randomly up to the federal cap limit.

*Stage I: Students are selected beginning with the first campus in the campus ranking to the extent needed for the campus to Meet AYP.*

The federal cap student selection process will select TAKS–M student passing results in campus ranking priority order only to the extent needed for the campus to meet AYP. To optimize the space available in the cap, students from the TAKS–M pool are selected only when doing so will make a difference in whether or not the campus meets AYP for the subject. The decision to select student results from a given campus is determined by a comparison of two AYP outcome scenarios.

### **AYP Scenarios**

Scenario 1 treats all TAKS–M results as *non-proficient (exceeders)*; Scenario 2 treats all TAKS–M results as proficient originally reported to the district. The table below describes how these two AYP scenarios provide information on the extent to which the school district and each campus will Meet AYP through the assignment

of TAKS–M results within the federal cap. Campuses identified in Group B in the table below are campuses for whom TAKS–M results will make the difference in whether or not the campus meets AYP for the subject. The first stage of the student selection process will only select students from these campuses and will only select TAKS–M results that are necessary for the campus to Meet AYP. Group A includes campuses that meet AYP for the subject even if all TAKS–M results are counted as non-proficient—they do not need any TAKS–M results in order to meet AYP for the subject. Group C includes campuses that will not meet AYP for the subject even if all TAKS–M passers are counted as proficient—TAKS–M proficient results will not help these campuses meet AYP for the subject.

**Exhibit 5: AYP 2% Federal Cap Scenarios**

<b>AYP Outcome Comparison</b>			
	Scenario 1: All TAKS–M passers assigned <i>non-proficient exceeders</i>	Scenario 2: All TAKS–M passers remain <i>proficient (passing)</i>	Priority Given to Campus or District for student selection within the federal cap
Group A	Subject meets AYP	Subject meets AYP or Subject missed AYP	Students are not selected
<b>Group B</b>	<b>Subject missed AYP</b>	<b>Subject meets AYP</b>	<b>Students are selected</b>
Group C	Subject missed AYP	Subject missed AYP	Students are not selected

Within each Group B campus, students are sorted in an order that prioritizes students based on the number of students and student groups needed for the subject to meet AYP. Students are selected until the campus meets AYP for the subject, or the district cap limit is reached.

In order to maximize the space available in the cap, campuses will not initially be assigned proficient students (in Stage I) if:

- the campus fails participation for the subject,

- the campus misses AYP for the subject even if all its TAKS–M results are counted as proficient,
- the campus meets AYP for the subject without any of its TAKS–M results counted as proficient, or
- the campus is not evaluated.

If meeting AYP through performance improvement/safe harbor requires fewer students to be selected than meeting the standard, safe harbor will be employed. The processes described above optimize the use of the cap to positively affect the most campuses in the district.

*Stage II: If additional proficient students can be included under the federal cap, students are selected to the extent needed for the **district** to Meet AYP.*

The student selection process for both the campus and school district stages are similar. The AYP outcome comparison is conducted for the school district to determine whether the district benefits from the use of TAKS–M results. Only school districts in AYP outcome comparison Group B (see table above) will have students selected at this stage. Students are not selected for a school district that may have the same conditions described above:

- the district fails participation for the subject,
- the district misses AYP for the subject even if all its TAKS–M results are counted as proficient,
- the district meets AYP for the subject without any of its TAKS–M results counted as proficient, or
- the district is not evaluated.

As in Stage I, if meeting AYP through performance improvement/safe harbor requires fewer students to be selected than meeting the standard, safe harbor will be used.

All previously unselected TAKS–M results are sorted in an order that prioritizes students based on the number of students and student groups needed for the district to meet AYP for the subject. However, once the cap limit is reached, the student selection process ends and the 2011 AYP results are determined for the school district. If student passing results are selected for the federal cap, the TAKS–M results are considered proficient for AYP for both the campus and district. Each student result is only selected once for the federal cap, so any remaining previously

unselected student passing results in the “pool” of TAKS–M tests are available for selection in the final stage of the selection process.

*Stage III: Students are selected randomly **up to the federal cap limit.***

The final stage of the student selection process will occur only for school districts that have not yet reached the federal cap limit. Of the remaining previously unselected student results in the pool of TAKS–M tests, student results are selected randomly up to the 2% federal cap limit. Once the cap limit is reached, the student selection process ends. Student results that remain unselected at this final stage are considered over the federal cap limit and reclassified as *non-proficient* for AYP.

At the completion of the student selection process for the 2% cap, student results for the federal cap processes are reported as assigned in AYP performance rates for the AYP campus, district, and state levels data tables.

### **Final Federal Cap Recapture**

The final statewide results are evaluated to determine if the state as a whole exceeds the 3% cap limit on both TAKS–Alt and TAKS–M proficient results. If it is determined that the state exceeds the 3% cap, a recapture process will be initiated. Recapture to meet the 3% cap limit will identify TAKS–M proficient student results that were selected in the final stage of the student selection process. Stage III TAKS–M proficient results are selected randomly and removed from the federal cap until the statewide 3% cap is reached. Results selected during the recapture process will be counted as non-proficient (exceeding the cap) in all AYP calculations for campus, district, and state level results. If the number of proficient scores in the state is less than the statewide cap, all results within the district cap remain unchanged. The recapture process is necessary to ensure that the state will not exceed the 3% cap on proficient results.

### **Performance Student Groups Evaluated**

In addition to all students, performance measures are calculated for the African American, Hispanic, White, economically disadvantaged, special education, and LEP student groups. Student information coded on the test answer documents is used to assign students to groups. Student groups are reported as a percentage of all students, rounded to the nearest whole percent.

The Texas federal cap process limits the number of proficient alternate assessments that may be counted as such in evaluating AYP, and the assignment of proficient or non-proficient for both TAKS–Alt and TAKS–M is the same result used in every student group of which the student is a member. Similarly, for students tested on TAKS and TAKS (Accommodated) who meet the passing standard and are therefore included in the AYP performance numerator, the student is included in the numerator for every student group for which the student is a member.

### **Federal Race/Ethnicity Provision**

Texas will apply a Federal Race/Ethnicity Provision to the 2011 AYP evaluations in order to address possible disproportionate representation in the trend data for accountability purposes only. Under this provision, students who indicate their ethnicity is not Hispanic/Latino and who select multiple races that include both the Black/African American and White racial categories will be distributed into either the African American or White groups based on the information submitted on the 2009-10 TAKS answer documents for these same students under the former definitions. Only those multiracial students reporting more than one race that includes both Black/African American and White racial categories will be redistributed to the Black/African American or White single racial categories. If the recalculated African American and White accountability student group participation or performance rate results in the campus or district meeting AYP, the AYP outcome of *Meets AYP* will be assigned.

A message will appear on the campus or district AYP data table indicating the Federal Race/Ethnicity Provision was used; however, the originally reported assessment results will not be changed. The official AYP data for the Reading and Mathematics Performance and Participation indicators will be the data that does not include the multiracial students in the separate student groups. The provision offers the benefit of AYP outcomes based on two student group data collection options, therefore appeals related to the race/ethnicity student groups for the 2011 AYP Reading and Mathematics Performance and Participation indicators will not be considered. See *Section V: Appeals* for more information. Also see Appendix J of the *2011 Accountability Manual* for additional details about the Federal Race/Ethnicity Provision.

### **All Students**

Small districts and campuses, even those with very few students tested in Grades 3–8 and 10, are evaluated based on their own assessment results to the greatest extent possible.

### **Student Groups**

#### **Special Education**

If a student is tested on TAKS (Accommodated), TAKS–M, LAT TAKS–M, or TAKS–Alt for any subject (Mathematics, Reading/English Language Arts, Science, Social Studies, or Writing), the student is included in the special education student group for both subjects. If a student is identified as a special education student on *any* test document, including TAKS, for any subject, the student is included in the special education student group for both subjects.

## **LEP**

If a student is identified as a current year LEP student on the TAKS answer documents for either Reading/English Language Arts or Mathematics, the student is considered current year LEP for both subjects. If the student is tested on TELPAS Reading, the student is considered current year LEP for both subjects. If the student is not tested on TELPAS Reading and the LEP field is blank on the TAKS answer documents, the student is assumed to be non-LEP.

In addition, students remain in the LEP student group for two years after they enter a regular, all-English instructional program. For all students included in the AYP Reading/English Language Arts and Mathematics performance measures for 2011, performance is included in the LEP student group if the student has been identified as a current or monitored LEP student and has been appropriately coded on the assessment answer document.

Students are coded as either 1) a currently identified LEP student (“C”), or 2) the student has met the criteria for bilingual/ESL program exit, is no longer classified as LEP in PEIMS and is in the first or second year of monitoring as required by statute (“M1” or “M2”).

### **Minimum Size Requirements**

For student groups to be included in the AYP performance calculation, a district or campus must have:

- Test results for 50 or more students in the student group (summed across Grades 3–8 and 10) for the subject, and the student group must comprise at least 10 percent of all test takers in the subject, *or*
- Test results for 200 or more students in the student group, even if that group represents less than 10 percent of all test takers in the subject.

For the LEP student group, minimum size is evaluated based on students currently identified as LEP in 2010–11 only. If the LEP student group meets the minimum size requirement based on current-year identification, the performance evaluated will include additional students who were identified as LEP in the prior two years as described above.

## **Performance Target**

### **Reading and Mathematics Standards**

For each district and campus, performance measures for all students and each student group meeting the minimum size requirement for students enrolled the full academic year must meet the following performance standards for Reading/English Language Arts and Mathematics.

- Reading/English Language Arts: **80** percent of students counted as proficient
- Mathematics: **75** percent of students counted as proficient

### **Performance Improvement/Safe Harbor**

For Reading/English Language Arts and Mathematics, performance measures for all students and each student group must meet *either* the performance standard *or* performance improvement/safe harbor. For measures that meet the performance standard, it is not necessary for these measures to also demonstrate performance improvement/safe harbor. For this reason, performance improvement/safe harbor is considered a “safe harbor” for measures that do not meet the performance standard. The safe harbor requires 1) that measures show performance improvement/safe harbor for the student group on which they do not meet the standard (Reading/English Language Arts or Mathematics) and 2) the relevant other measure requirement for the student group. In 2008, the USDE approved an amendment to the requirement of the other measure in Safe Harbor for AYP that allows districts and campuses to meet the absolute standard for the other measure in order to satisfy performance improvement/safe harbor.

### **Calculating Performance Improvement/Safe Harbor**

Performance Improvement/Safe Harbor for the measure is met if there is:

- a 10 percent decrease from the prior year in percentage of students counted as not proficient in the subject (Reading/English Language Arts or Mathematics), *and*
- meet the absolute goal or standard for the pertinent other measure  
*or*  
achieve the required improvement for the relevant indicator. Required student group improvement for Graduation Rate means meeting or exceeding the graduation rate goal, annual targets, or alternatives (see the Graduation Rate discussion in this section for more information). Required student group improvement for the Attendance Rate is at least one-tenth of a percent (0.1).

The performance improvement portion of the Safe Harbor calculation requires the calculation of Actual Change, defined as:

$$\frac{\text{2011 AYP Proficiency Rate}}{\text{Total Number of Students Tested}} - \frac{\text{2010 AYP Proficiency Rate}}{\text{Total Number of Students Tested}}$$

Students who Met the Passing Standard (subject to the 1% and 2% caps)

The actual change must be equal to or greater than the minimum Required Improvement needed to reach a standard of 100 percent over a ten-year period. In this case, the methodology may be illustrated as the following:

$$[\text{Actual Change}] - [\text{prior year proficiency}] \geq \frac{[\text{AYP Required Improvement}] - [\text{prior year proficiency}]}{10}$$

**Minimum Size Requirements**

Performance improvement/safe harbor is calculated even if the performance measure does not meet the minimum size requirement the prior year. However, performance improvement/safe harbor cannot be calculated if there are no prior-year test results for the measure. If performance improvement/safe harbor cannot be calculated due to lack of prior-year results, the campus or district cannot use safe harbor to meet the performance requirement and receives an AYP status of *Missed AYP* for that measure.

Due to the federal requirements for graduation rate, adjustments were made to the 2011 AYP calculations for minimum size for both graduation and attendance rate. The other measurement requirement for Graduation Rate or Attendance Rate is calculated at the student group level for the purpose of applying performance improvement/safe harbor only. If the other measure does not meet the minimum size requirement for the Graduation Rate or Attendance Rate for the current year alone, the other measure requirement is not evaluated. The other measure requirement is calculated even if the measure does not meet the minimum size requirement the prior year. However, improvement calculations cannot be conducted if there are no prior-year results for the measure.

**District Level Performance Results**

By state statute, the performance of students served in certain campuses cannot be used in evaluating the district where the campus is located. Texas statute TEC §39.072(d) and §39.073(f) require that performance data reported on any campuses designated as TYC or

Texas Juvenile Probation Commission (TJPC) campuses not be included in the district results for the district where the campus is located. As approved by the USDE, the district evaluation of AYP results allows the exclusion of performance data reported on campuses designated as TYC or TJPC campuses from the district results in the same manner as the state accountability results. For more information, see the 2011 State Accountability Manual, Chapter 6 – Special Issues and Circumstances, Table 11, Inclusion or Exclusion of Performance Data. Please note that the statutory citations reference TEC as it existed prior to the changes made by the 81st legislative session in 2009. The citations are in effect through the 2011 accountability year.

For 2011 AYP evaluations, the exclusion of 2011 performance data from a school district occurs after the evaluation of the federal cap process. The federal cap process will continue to include the results of all campuses located within the school district boundaries.

## **The Other Indicator**

In addition to Reading/English Language Arts and Mathematics, each district and campus is required to meet AYP standards on one additional Other Indicator—Graduation Rate or Attendance Rate. The Other Indicator evaluated for a district or campus is based on the grades offered. The Graduation Rate is the Other Indicator used in AYP for high schools, combined elementary/secondary campuses offering Grade 12, and districts offering Grade 12. Attendance Rate is the Other Indicator for elementary schools, middle/junior high schools, combined elementary/secondary schools not offering Grade 12, and districts not offering Grade 12.

## **Graduation Rate**

### **Calculating Graduation Rate Measures**

Title I Regulations issued in October, 2008, required states to develop a statewide graduation rate goal and annual targets of improvement. States were required to identify annual targets that districts and campuses must meet in order to demonstrate continuous and substantial improvement from the prior year toward meeting or exceeding the state's goal. Title I regulations also allow states to use a five-year graduation rate for evaluation in AYP.

In April, 2010, the U.S. Department of Education concluded a peer review of the Texas longitudinal completion rates which were found to meet the federal definition of the adjusted cohort graduation rate. The approved AYP criteria for graduation rate will include the evaluation of the four-year graduation and a five-year longitudinal graduation rate.

The high school Graduation Rate is the *graduates* component of the longitudinal completion rate. The longitudinal completion rate is the same rate used for the Texas state accountability system. For more information about the longitudinal completion rate calculation, see *Secondary School Completion and Dropouts in Texas Public Schools* at <http://www.tea.state.tx.us/index4.aspx?id=4080>. Due to the timing of the availability of data, the longitudinal completion rate is a prior-year measure. For example, the Graduation Rate

evaluated as part of the 2011 AYP calculations is the rate for the class of 2010. In accordance with federal regulations, the five-year longitudinal Graduation Rate used for the 2011 AYP calculations is based on the class of 2009. Information on the five-year longitudinal Graduate Rates for the class of 2009 may also be found in the report referenced above.

The graduation rate criteria approved by the USDE applies to both the Graduation Rate and the Performance Improvement/Safe Harbor calculation if graduation rate is used as the other measure. Districts and campuses that do not meet the 90.0% goal may meet any one of the alternative graduation rate targets in order to meet the AYP standards. Note that the four-year and five-year Graduation Rates are rounded to one decimal place before comparison to the statewide goal or annual targets, and before calculating actual change or improvement. For more information, see the Rounding discussion in this section.

The Graduation for the additional Other Indicator and the Performance Safe Harbor other measure are shown below.

### **Graduation Rate Goal**

A Graduation Rate goal of **90.0** percent represents the four-year graduation rate expected of all high schools and districts in Texas. The Graduation Rate is defined as the graduates component of the longitudinal completion as a percent of all four components (graduates, continuers, GED recipients, dropouts) of the class of 2010. Graduation Rates are rounded to one decimal place before comparison to the goal. Districts and campuses that meet the 90.0% goal on the four-year Graduation Rate are not required to meet the alternative targets for graduation rate.

### **Annual Targets for Graduation Rate**

Federal regulations allow states to define interim annual targets or performance gains which are designed to demonstrate continuous improvement from the prior year. District and campuses that did not meet the statewide goal may demonstrate continuous improvement through any one of the following alternative graduation rate targets.

- four-year 2011 Annual Graduation Rate Target of 75%
- four-year Graduation Rate Alternatives:
  - Safe Harbor Target of a 10% decrease in difference from the prior year rate and the Goal
  - Improvement Target of 1.0 percent from the prior year four-year Graduation Rate
- five-year Annual Graduation Rate Target of 80%

### **2011 Four-year Graduation Rate Target**

Districts and campuses may meet the target of **75.0** percent of students classified as four-year graduates for the class of 2010.

### Four-year Graduation Rate Alternative Targets

For districts and campuses that did not meet the four-year Graduation Rate target, the AYP criteria for Graduation Rate may be met by alternative targets based on the Actual Change in the four-year Graduation Rate from the prior year.

#### Calculating Graduation Rate Actual Change

For 2011 AYP evaluations, the Actual Change in Graduation Rate is defined as:

$$\frac{\text{Class of 2010 4-year Graduation Rate}}{\text{Total in Class of 2010}} - \frac{\text{Class of 2009 4-year Graduation Rate}}{\text{Total in Class of 2009}}$$

#### Calculating Graduation Rate Alternative Safe Harbor Target

Districts and campuses may meet the Graduation Rate Alternative Safe Harbor Target if there is a 10.0 percent decrease in difference between the prior year four-year Graduation Rate and the 90.0 percent statewide goal, illustrated as the following:

$$\frac{\text{Actual Change in Graduation Rate}}{10} \geq \frac{\text{AYP Graduation Rate Safe Harbor Requirement}}{10}$$

[current 4-year Graduation Rate - prior 4-year Graduation Rate] ≥ [Goal of 90 % - prior 4-year Graduation Rate]

#### Calculating Graduation Rate Alternative Improvement Target

For districts and campuses not meeting the four-year Graduation Rate goal, target, or safe harbor target, the AYP criteria for Graduation Rate is met if there is a 1.0 percent improvement from the prior year on the four-year Graduation Rate. The district or campus meets the 1.0 percent improvement on the Graduation Rate if the class of

2010 four-year Graduation Rate is 1.0 percentage points or greater than the class of 2009 Graduation Rate, as shown below:

$$\begin{array}{rcccl} & \textit{Actual Change in Graduation Rate} & & \textit{AYP Graduation Rate} & \\ & & & \textit{Improvement Target} & \\ [ \text{ current 4-year} & & \text{ prior 4-year} & & \\ \text{ Graduation Rate} & - & \text{ Graduation Rate } & \geq & 1.0 \end{array}$$

### **Five-year Graduation Rate Target**

As a final alternative for districts and campuses that did not meet the alternative targets for the four-year Graduation Rate, the 2011 AYP criteria for Graduation Rate is met if the five-year Graduation Rate meets a target of **80.0** percent of students classified as graduates from the class of 2009.

### **Graduation Rate Minimum Size Requirement**

#### **All Students**

For the Graduation Rate to be evaluated as the additional Other Indicator for AYP at the all students level, the district or campus must have at least 40 students in the four-year longitudinal completion total in class for the most recent year. Districts and campuses with fewer than 40 students in the longitudinal completion rate class are not required to meet the AYP Graduation Rate measures. If a district or campus meets the minimum size requirement for the four-year Graduation Rate, the statewide goal, four-year annual target, and five-year annual target may be used to meet AYP graduation rate criteria.

If a district or campus meets the minimum size requirement for the four-year Graduation Rate for the most recent year, improvement from the prior year is calculated even if the district or campus does not meet the minimum size requirement on the Graduation Rate for the prior year. Improvement is *not* calculated if the district or campus *does not* have a Graduation Rate for the prior year. If Graduation Rate Improvement cannot be calculated due to lack of prior year results, the district or campus cannot use the alternative safe harbor or improvement targets to meet the Other Indicator requirement.

#### **Student Groups**

Districts and campuses are not required to meet the Graduation Rate standard for student groups for the additional Other Indicator. Graduation Rates for student groups are only included in the AYP calculation in the event they are evaluated as part

of performance improvement/safe harbor.

### **Performance Improvement/Safe Harbor**

For Reading/English Language Arts and Mathematics performance improvement/safe harbor, the district or campus is not required to show improvement on the Graduation Rate unless minimum size requirements are met for the most recent year alone. If a district or campus meets the minimum size requirement for the four-year Graduation Rate for the most recent year, the performance improvement/safe harbor other measure criteria is evaluated, which includes the statewide goal, four-year annual target, four-year alternatives, and five-year annual target.

#### **All Students**

For the Graduation measure to be included in the AYP calculation at the all students level for performance improvement/safe harbor, the district or campus must have at least 40 students in the longitudinal completion rate class.

#### **Student Groups**

Student group identifications are based on student characteristics and program participation used to report the longitudinal secondary school completion rates for the state. Where student groups are reported as a percentage of all students for Graduation Rate, the percentages are rounded to the nearest whole percent.

For student groups' graduation measure to be evaluated for AYP, a district or campus must have:

- 50 or more students in the student group in the longitudinal completion rate class, and the student group must comprise at least 10 percent of all students in the longitudinal completion rate class; *or*
- 200 or more students in the student group in the longitudinal completion rate class, even if that group represents less than 10 percent of all students in the longitudinal completion rate class.

#### **Special Education**

The longitudinal rate calculation requires linking individual student records from multiple sources across five or seven years. Student characteristics and program participation statuses are assigned based on a student's final record in the cohort. If a student is identified as participating in a Special Education program in the final record in the cohort, the student is included in the Special Education graduation rate student group.

#### **LEP**

If a student is identified as limited English proficient (LEP) at any time while attending Grades 9-12 in Texas public schools,

the student is included in the LEP student group for evaluation of graduation rate. The LEP student group is determined in this manner for the four-year longitudinal graduation rate of the class of 2010, the four-year longitudinal graduation rate of the class of 2009, and the five-year longitudinal graduation rate of the class of 2009.

Minimum size criteria for the graduation rate LEP student group is based on the number of students identified as LEP in the four-year longitudinal graduation/completion total in class for the class of 2010. Student characteristic and participation statuses are assigned based on a student's final record in the cohort. If the number of LEP students in the four-year longitudinal graduation/completion total in class for the class of 2010 meets the minimum size requirement, the LEP student group graduation rate evaluated will include additional students who were identified as LEP at any time while attending Grades 9-12 in Texas public schools. The graduation rate is calculated to include students who were identified as LEP students based on PEIMS attendance information.

### **Special Provision for Residential Treatment Facilities (RTF)**

The USDE approved amendment to the 2010 AYP evaluation simplified the federal accountability system for a small number of districts and campuses serving students in residential facilities. Beginning with the 2010 AYP evaluation, residential facilities serving secondary grades in alternative settings are not evaluated on graduation rate as the additional indicator. The AYP Graduation Rate for the additional Other Indicator and the Performance Improvement/Safe Harbor other measure is not evaluated for districts and campuses that are 1) identified as residential facilities, and 2) registered for evaluation under 2011 Alternative Education Accountability (AEA) procedures. AEA registration for 2011 state accountability AEA procedures is required in order to apply the special provision. The provision does not apply to district and campuses serving students in residential facilities that are eligible for AEA registration but have chosen not to register.

## **Attendance Rate**

### **Calculating Attendance Rate Measures**

The Attendance Rate is based on attendance of all students in Grades 1 through 12 for the entire school year. Due to the timing of the availability of data, the Attendance Rate is a prior-year measure. For example, the Attendance Rate evaluated as part of the 2011 AYP calculation is the 2009–10 Attendance Rate. The Attendance Rate is calculated as follows:

$$\frac{\text{Total number of days students were present in 2009–10}}{\text{Total number of days students were in membership in 2009–10}} \times 100$$

The primary source of student group identification for the Attendance Rate is the demographic record submitted with the PEIMS attendance record. Student race/ethnicity is reported for each student as part of the attendance data submission. Students are included in the special education student group if they have special education attendance reported for any six-week reporting period. Students are included in the LEP student group if they are identified as LEP for any six-week reporting period. Students are included in the economically disadvantaged student group if they have a matching fall enrollment record coded as economically disadvantaged. Attendance rates will not be calculated for PK/K campuses.

#### **Attendance Rate Standard**

The standard for Attendance Rate is an average attendance rate of **90.0** percent. Districts and campuses are required to meet the 90.0 percent standard at the all students level only. Student group Attendance Rates are not evaluated for the additional Other Indicator.

#### **Attendance Rate Improvement Standard**

For districts and campuses that do not meet the Attendance Rate standard at the all students level, the AYP requirements for Attendance Rate are met if there is improvement from the prior year on the Attendance Rate. The district or campus shows improvement on the Attendance Rate if the 2009–10 Attendance Rate is higher than the 2008–09 Attendance Rate at the all students level. Attendance rates are rounded to one decimal place before improvement is calculated. Therefore, 0.1 is the minimum improvement required. Improvement on the Attendance Rate is not required for districts and campuses that meet the 90.0% standard.

#### **Attendance Rate Minimum Size Requirement**

The minimum size requirements for Attendance Rates are based on total days in membership rather than individual student counts.

#### **All Students**

For the Attendance Rate to be evaluated as the additional Other Indicator for AYP at the all students level, the district or campus must have at least 7,200 total days in membership (40 students x 180 school days). Districts and campuses with fewer than 7,200 total days in membership are not required to meet the Attendance Rate standard. If a district or campus meets the minimum size requirement for the Attendance Rate for the current year, improvement from the prior year is calculated even if the district or campus does not meet the minimum size requirement on the Attendance Rate for the prior year. Improvement is not calculated if the district or campus does not have an Attendance Rate for the prior year. If Attendance Rate Improvement cannot be calculated due to lack of prior year results, the district or campus cannot use the improvement standard to meet the Other Indicator requirement and receives an AYP status of *Missed AYP* for that measure.

### **Student Groups**

Districts and campuses are not required to meet the Attendance Rate standard for student groups for the additional Other Indicator. Attendance Rates for student groups are only included in the AYP calculation in the event they are evaluated as part of performance improvement/safe harbor.

### **Performance Improvement/Safe Harbor**

For Reading/English Language Arts and Mathematics performance improvement/safe harbor, the district or campus is not required to show improvement on the Attendance Rate for all students unless minimum size requirements are met for the current year alone. If a district or campus meets the minimum size requirement for the Attendance Rate for the current year, the performance improvement/safe harbor other measure criteria is evaluated. The prior year minimum size is not required.

### **All Students**

For the Attendance Rate to be included in the AYP calculation at the all students level for performance improvement/safe harbor the district or campus must have at least 7200 total days in membership (40 students x 180 days).

### **Student Groups**

Student group identifications are based on student characteristics and program participation used to report attendance rates for the state. Where student groups are reported as a percentage of all students for Attendance Rate, the percentages are rounded to the nearest whole percent.

For student groups' attendance rate measure to be evaluated for AYP, a district or campus must have:

- 9,000 or more total days in membership (50 students x 180 school days), and the student group must comprise at least 10 percent of total days in membership for all students; *or*
- 36,000 or more total days in membership (200 students x 180 school days), even if the group represents less than 10 percent of total days in membership for all students.

## **Rounding**

The rules for rounding measures are delineated below.

### **Performance**

Performance-related measures are rounded to the nearest whole percent. For example, a school obtaining a 59.5% on Reading/English Language Arts will have its performance rounded up to 60%. On the other hand, another school obtaining a 59.4% on the same measure will have its performance rounded down to 59%. It is the rounded performance number that is compared to performance standards.

Performance improvement/safe harbor calculations are performed *after* rounding each year's performance. For example, a school obtaining 32.4% on a Mathematics Performance measure in 2011 and 28.5% on the same measure in 2010 would achieve a performance improvement of 3% (32% in 2011 minus 29% in 2010; note that if the subtraction was performed before the rounding, we would get  $32.4 - 28.5 = 3.9\%$ , which rounds to a performance improvement of 4%).

### **Participation**

As with performance, participation-related measures are rounded to the nearest whole percent. For example, a school obtaining a 94.5% on Mathematics participation will have its participation rounded up to 95%, while another school obtaining a 94.4% on the same measure will have its participation rounded down to 94%. The participation measure is compared to the participation standard after rounding.

The average participation is calculated based on the total number of students in the combined results of both years. The total number of students participating is divided by the total number of students in the participation measure for both 2009-10 and 2010-11 combined. The resulting rate is rounded to the nearest whole percent.

### **Federal Cap**

Since 2004, the federal cap calculation has been based on the percentage of total students enrolled on the day of testing in Grades 3 - 8 and 10 for Reading and Mathematics rounded up to the next whole number for any decimal value.

### **Other Indicator**

Unlike performance and participation, measures related to the Other Indicator are rounded to the nearest one-tenth of a percent.

#### **Graduation Rate**

The Graduation Rate is rounded to the nearest one-tenth of a percent. For example, a high school with a Graduation Rate of 74.95% would have its other measure rounded up to 75.0%, while another high school with a Graduation Rate of 74.94% would have its other measure rounded down to 74.9%. The other measure is compared to the goal or target *after* rounding. Also note that actual change or improvement calculations are made after rounding.

### **Attendance Rate**

The Attendance Rate is rounded to the nearest one-tenth of a percent. For example, an elementary school obtaining a 90.95% Attendance Rate in 2010 and having a 90.94% Attendance Rate in 2009 would achieve an Attendance Rate improvement of 0.1% (91.0% minus 90.9%; note that if the subtraction was performed before rounding, we would get  $90.95 - 90.94 = 0.01\%$ , which rounds to an improvement of 0.0%).

### **Student Groups for all Indicators**

Student group percentages are rounded to the nearest whole percent for all measures prior to determining whether the student group meets the minimum size requirement. The *Student Group* percentage is calculated as the number of students in the student group measure divided by the number of students in the All Students measure, then rounded to the nearest whole percent. For example, to determine the rounded whole percent of 40 students in a group out of a total of 421 students, 40 is divided by 421 ( $40 / 421 = 0.09501$ ), then multiplied by 100 to determine the percentage ( $0.09501 \times 100 = 9.501$ ). Rounding is then applied to the nearest whole percent, in this case 9.501 rounds to the whole percent 10 and therefore the student group will be evaluated.

## **Special Circumstances**

Under the NCLB accountability provisions, all districts, campuses, and the state are evaluated for AYP. Each district or campus is evaluated based on its own data to the greatest extent possible. However, special circumstances exist that may require additional analysis or rules in order to determine an AYP outcome, and they are described in the following section.

### **Small Districts and Campuses**

#### **Reading and Mathematics Indicators**

##### **Performance**

Small districts and campuses, those with fewer than 50 total students tested in Grades 3–8 and 10, are evaluated based on their own assessment results to the greatest extent possible. Small districts and campuses are evaluated first against the same standards (performance standard or performance improvement/safe harbor) as larger districts and campuses. If a small district or campus meets AYP under either the performance standard or performance improvement/safe harbor, the district or campus is rated as *Meets AYP* and no further special analyses are employed. On the other hand, if a small district or campus misses AYP under both the performance standard and performance improvement/safe harbor, additional special analyses are employed.

For 2011 AYP, additional analysis for campuses is conducted through the application of uniform averaging and pairing. Note that small district performance results are not included nor modified in the pairing process.

### **Uniform Averaging**

For small districts and campuses, uniform averaging involves combining the 2010-11 AYP results for the district or campus with its 2009-10 AYP results and determining AYP status using data aggregated over the two years.

### **Pairing**

Campuses that miss AYP with fewer than 50 total students tested in Grades 3–8 and 10 are evaluated based on the all students performance results of an assigned pairing relationship for the subject if available. Campuses that have a pairing relationship established with another campus or the district for state accountability ratings will use that pairing relationship for AYP. Results at the all students level will be applied to the paired campus. Campuses that do not have such a pairing relationship will have their district's performance (again, at the all students level) applied to the campus. If the district or campus with which it is paired is not evaluated for AYP, the paired campus receives a 2011 AYP Status of *Not Evaluated*.

### **AYP Special Analysis**

Small districts with fewer than 50 total students tested in Grades 3–8 and 10 that miss AYP under both the performance standard and performance improvement/safe harbor and campuses that miss AYP as a result of pairing undergo AYP special analysis. Similar to the state accountability special analysis, AYP special analysis consists of a professional review of historical performance data to determine if the AYP performance measure outcome is an indication of consistent performance. TEA professional staff review the data from 2003 to the current year on AYP performance measures both with and without the federal cap, AYP and SIP statuses, and other statistical information. AYP special analysis provides an AYP outcome for the Reading/English Language Arts or Mathematics performance measure alone.

### **Participation**

Districts and campuses with fewer than 40 total students enrolled in the grades evaluated for AYP (summed across Grades 3–8 and 10) on the test date are not required to meet the test participation standard. The AYP status for these districts and campuses is based on meeting the performance standards for the Reading/English Language Arts and Mathematics measures and for the Graduation Rate or Attendance Rate measures if minimum size requirements for those measures are met.

Districts and campuses with at least 40 total students enrolled in Grades 3–8 and 10 on the test date are required to meet the participation standard.

## **Other Indicators**

Small districts and campuses are required to meet AYP for the Other Indicator (Graduation Rate or Attendance Rate) if they meet the minimum size requirement for the all students measure. Districts and campuses not meeting the minimum size requirement for the all students measure are not evaluated on the Other Indicator. AYP Status for these campuses is based on the Reading/English Language Arts and Mathematics Indicators.

## **AYP Status for Small Districts and Campuses**

As required by federal regulation, the AYP status for districts and campuses is based primarily on the Reading/English Language Arts and Mathematics Indicators. Therefore, if the performance measures cannot be evaluated due to small numbers of students for a district or campus resulting in Reading/English Language Arts and Mathematics Performance of *Not Evaluated*, the overall AYP status is *Not Evaluated*.

## **Districts and Campuses with No Students in Grades Evaluated For AYP**

### **Districts**

Districts with no students in grades evaluated for AYP (Grades 3–8 and 10) receive a 2011 AYP Status of *Not Evaluated*.

### **Campuses**

#### **Prekindergarten and Kindergarten (PK/K) Campuses**

As a result of the U.S. Department of Education (USDE) review of the Title I program, Texas will provide AYP evaluations for prekindergarten and kindergarten (PK/K) campuses beginning with 2011 AYP. To meet this requirement, the state accountability pairing application available for the 2011 accountability ratings cycle was expanded to request campus pairing assignments for PK/K campuses for federal accountability AYP purposes only. TEA will assign pairing relationships for PK/K campuses in school districts that did not provide campus pairing decisions through the TEASE pairing application. The pairing assignments are based on the pairing guidelines provided to school districts in conjunction with analysis of attendance and enrollment patterns using Public Education Information Management System (PEIMS) data.

#### **Performance**

Campuses with students in Grades 1–12 but no students in the grades evaluated for AYP (Grades 3–8 and 10) are evaluated based on the all students performance results of an assigned pairing relationship for the subject. Campuses that have a pairing relationship established with another campus or the district for state accountability ratings will use that pairing relationship for AYP. For campuses that are paired (including PK/K campuses), only the all students performance results are shared. If the

district or campus with which it is paired meets the performance standard or performance improvement/safe harbor at the all students level, the paired campus is considered to have met the performance standard for the subject. In order to ensure that all campuses that are paired (including PK/K campuses) receive a 2011 AYP evaluation, if the all students performance results of the campus with which it is paired cannot be evaluated for AYP, the campus will have their district's performance results applied to the campus. If the all students performance results of the district cannot be evaluated for AYP, the paired campus receives a 2011 AYP Status of *Not Evaluated*.

### **Participation**

Campuses with no students in Grades 3–8 and 10 are not required to meet the AYP participation standard for 2011.

### **Other Indicators**

Campuses with no students in Grades 3–8 and 10 are required to meet AYP for the Other Indicator (Graduation Rate or Attendance Rate) if they meet the minimum size requirement for the all students measure. Campuses with no data or those not meeting the minimum size requirement for the all students measure are not evaluated on the Other Indicator. AYP Status for these campuses is based on the Reading/English Language Arts and Mathematics Indicators.

## Section IV: Exceptions

Federal regulations issued in December, 2003 (34 CFR 200.13 *et seq.*) requiring TEA to apply a cap to proficient alternative assessment results also allow each state to permit an exception in limited circumstances to school districts that may exceed this cap. AYP exceptions to the federal cap continue to be processed in two stages: before the preliminary AYP Status release and during the appeals window.

### **Exception to the 1% Federal Cap on TAKS–Alt**

Federal regulations governing exceptions to the cap on proficient results that may be included in AYP determinations apply only to the 1% cap on TAKS–Alt results. The federal regulation allows school districts with a granted exception to exceed the 1% cap. Districts must maintain a 2% cap on TAKS–M proficient results, however, if the state does not fully use the 1% cap, then the district may exceed the 2% cap up to a total of 3% on both TAKS–Alt and TAKS–M. Each school district may only exceed the overall 3% cap on both TAKS–Alt and TAKS–M proficient results by the amount of the exception to the 1% cap.

At the state level, Texas cannot exceed the 1% cap on TAKS–Alt proficient results; however, if the state does not fully use the 1% cap, then the state may exceed the 2% cap up to a total of 3% on both TAKS–Alt and TAKS–M. These state limits must be maintained even with school district exceptions to the 1% cap.

### **Exception Applications Prior to Preliminary Release**

Districts with residential treatment facilities (including group foster homes that serve students with disabilities) in their attendance zones must register those facilities with the Division of Program Monitoring and Intervention’s residential facilities data collection application (called “RF Tracker”) on the agency’s secure website. RF Tracker was available to districts to complete this registration from October, 2010 through early June, 2011. A district that registered facilities on RF Tracker is automatically assumed to be applying for an exception to the 1% cap for AYP purposes. No separate exception application needs to be filled out for districts registered through RF Tracker.

TEA recognizes that the existence of a Regional Day School Program for the Deaf (RDSPD) within school district boundaries requires districts to provide educational services for higher numbers of students with auditory impairments or other areas of disability. Therefore, in addition to school districts registered in the RF Tracker system, school districts with RDSPD that are included in the 2010-2011 Directory for Services for the Deaf in Texas automatically apply for an exception. A district that provides deaf services in Texas through a RDSPD recognized by the Division of Individuals With Disabilities Education Act-IDEA Coordination, is automatically assumed to be applying for an exception to the 1% cap for AYP purposes. No separate exception application needs to be filled out for districts included in the 2010-2011 Directory for Services for the Deaf in Texas.

### Exception Process

School districts identified through RF Tracker or the RDSPD Directory will be initially granted an exception to the 1% cap, which will increase the district's federal cap by the total number of TAKS–Alt students passing results that exceed the 1% cap limit. Student data reported through the RF Tracker system are not used to determine the extent of the school district’s exception to the 1% cap. Before the preliminary release of AYP information on July 27, exceptions will be processed for districts who registered facilities through RF Tracker or the RDSPD Directory, and the results of the exceptions will be applied to the preliminary AYP results.

### Unused slots from the 1% cap on TAKS–Alt

As discussed in *Section III: Indicators, Components, Measures, and Standards*, if the number of TAKS–Alt student passing results in a school district falls below the 1% cap, the unfilled slots may be used by TAKS–M student passing results. TAKS–M proficient results may “spill over” to unused slots from the 1% cap on TAKS–Alt only if unused slots exist. This is allowed to occur only if the number of proficient results from TAKS–Alt was below the 1% federal cap limit. Exceptions to the 1% cap are not needed for districts with a total number of proficient results from TAKS–Alt below the 1% federal cap limit. The table below provides a summary of the relationship between Exceptions and the allowance for spill over from the 2% cap onto unused slots from the 1% cap.

RELATIONSHIP BETWEEN EXCEPTION TO THE 1% CAP AND SPILL OVER FROM THE 2% CAP		
Possible 1% Federal Cap Limits	Are Exceptions to the 1% Cap applied?	Are TAKS–M results allowed to spill over to the 1% cap?
The number of TAKS–Alt passing results <b>exceeds</b> the 1% Federal Cap Limit.	Yes, <b>exceptions are applied</b> which will increase the district's federal cap by the total number of passing results from TAKS–Alt that exceed the 1% cap limit.	No, <b>spill over from the 2% cap is not possible</b> since the 1% cap was exceeded by number of TAKS–Alt passing results.
The number of TAKS–Alt passing results <b>does not exceed</b> the 1% Federal Cap Limit.	No, an exception is <b>not necessary since</b> there is no need to increase the district's federal cap for TAKS–Alt passing results that exceed the 1% cap limit.	Yes, <b>spill over from the 2% cap can occur</b> since the 1% cap was not reached by the number of TAKS–Alt passing results.
The number of TAKS–Alt passing results <b>is equal to</b> the 1% Federal Cap Limit.	No, an exception is <b>not necessary</b> .	No, <b>spill over from the 2% cap is not possible</b> .

### Federal Cap

Federal regulations require that the state as a whole not exceed the 1% cap under any circumstances. As with the original process for each school district, the statewide participation denominator for each subject area is used to determine the 1% cap on proficient

results. To determine if recapture is necessary, after exceptions are processed the total number of proficient student results on TAKS–Alt across the state is divided by the statewide AYP participation denominator. If proficient results exceed the statewide 1% cap for either subject, a statewide recapture process will be performed. TAKS–Alt student passing results will be randomly excluded from the cap and reclassified to non-proficient until the 1% statewide cap limit is satisfied.

Proficient results selected during recapture will be counted as non-proficient in all AYP calculations for campus, district, and state level results. If the number of proficient scores in the state is less than the statewide cap, all results within the district cap remain unchanged and recapture is not used.

### **Other Circumstance Exceptions**

USDE regulations allow exceptions to the federal cap for circumstances other than serving students in residential treatment facilities or Regional Day School Programs for the Deaf. However, other exceptions are limited by federal regulation to address unique circumstances where a district or campus serves a disproportionate number of students with significant cognitive disabilities assessed on TAKS–Alt. Districts who did not qualify for an exception prior to preliminary release will be allowed to apply for an exception based on other circumstances during the appeals window. **Districts should be sure to check the TEASE Accountability website after the preliminary release on July 27 to see whether other circumstance exceptions will be allowed based on available space in the statewide 1% cap.**

### **Other Circumstance Exceptions Application Process**

Applications for Other Circumstance Exceptions may be submitted online via the TEASE Accountability website (see *Section VI*) by school districts from July 27th through September 2nd. Districts that submit Other Circumstance Exceptions applications online will also need to submit an appeal letter with a request for other circumstance exception during the appeals process window. Districts appealing for other reasons can include the exception request along with the letter detailing their other appeals. Districts should also include a copy of the exception application confirmation page that will appear when the online exception application is submitted. Districts should be sure to include the rationale for the exception request and any documentation necessary to support the request. It is not necessary to submit any other student level data to support the exception request. As with exceptions processed prior to the preliminary results, a recapture process may be employed to ensure that the state as a whole does not exceed the 1% cap after all exception requests have been evaluated. *Section V* has further information about the needed steps for submitting the required appeal letter.

### **Evaluation of Other Circumstance Exceptions to the Federal 1% Cap**

Exception requests to the 1% cap based upon a higher than normal district population of students with disabilities should include documentation to support the reason for the request. The following is a general guideline for exception requests.

Reasons favorable for granting the exception include, but are not limited to:

1. Community or health programs in the district attendance boundaries draw families of students with disabilities.
2. There are special arrangements with surrounding districts to serve special education students from outside the district boundaries.
3. Special programs offered by the district for students with certain disabilities draw families of students with disabilities.
4. Quality of the special education program in the district draws families of students with disabilities.

Reasons not favorable for granting the exception include, but are not limited to:

1. Appropriate testing of students under state assessment policy.
2. Factors such as student race/ethnicity, socioeconomic status, or mobility putting students at a disadvantage academically.
3. Reasons related to distribution of students with disabilities among campuses within a district such as cluster arrangements or special purpose campuses.

### **Justification for Other Circumstance Exceptions**

If the district is claiming that it serves an unusual number of students with a certain disability, it is expected that should be reflected in the data. It may be difficult to compile evidence that a special education program is effective and draws students from surrounding areas. If a district is making this claim, the data should minimally reflect a special education program that is not subject to any monitoring and meets the highest standards in the Performance-Based Monitoring Analysis System (PBMAS). If the district is claiming that there are unusual numbers of students with disabilities in individual family foster homes, student lists with identifying information should be provided with the exception request.

### **Federal Cap Extension for Other Circumstance Exceptions**

The approval of school district requests for exceptions to the federal cap is based on the availability of statewide slots within the cap that allow the state to maintain a 1% cap limit on proficient results from TAKS–Alt. The federal cap applied to proficient TAKS–Alt results will be extended to include an additional number of students up to the statewide 1% cap limit. In order to maintain that limit, TEA may employ a process in which only students who received instruction in the following instructional settings and disability

categories are added to the district cap limit. The 2010-11 Fall PEIMS submission of special education student disability and instructional arrangement information is used to identify student categories for processing Other Circumstance exceptions.

#### Instructional Setting Categories:

1. Self-Contained, Mild/moderate/Severe, Regular Campus – More than 60% (Instructional Setting Code 44)
2. State School for Persons with Mental Retardation (Instructional Setting Code 30)
3. Texas School for the Blind and Visually Impaired (Instructional Setting Code 70)
4. Texas School for the Deaf (Instructional Setting Code 71)

#### Disability Categories:

1. Multiple disabilities
2. Auditory impairment (Disability Code 03)
3. Autism (Disability Code 10)
4. Deaf/Blind (Disability Code 05)
5. Developmental Delay (Disability Code 12)
6. Emotional disturbance (Disability Code 07)
7. Learning disability (Disability Code 08)
8. Mental retardation (Disability Code 06)
9. Orthopedic impairment (Disability Code 01)
10. Other health impairment (Disability Code 02)
11. Speech impairment (Disability Code 09)
12. Traumatic brain injury (Disability Code 13)
13. Visual impairment (Disability Code 04)

#### **Approval of Exception Does Not Necessarily Change AYP Status**

Note that an approved exception for a district or campus who missed AYP solely due to the 1% cap may not result in that district or campus meeting AYP since there still may not be enough proficient students to meet AYP criteria. In addition, if after applying exceptions the state as a whole exceeds the 1% cap and the federal cap recapture process is initiated, there may not be enough students counted as proficient in the school district AYP performance results to Meet AYP. Due to the required statewide federal caps, appeals are not considered solely on the basis that the district's exception was approved.

## Section V: Appeals

Superintendents (or the equivalent for charter operators) are provided the opportunity to appeal data used to determine 2011 AYP Status under a limited set of circumstances and within a defined time limit. The NCLB Act requires that state educational agencies provide local school districts an opportunity to review the data, including academic assessment data, on which the AYP and School Improvement identifications are based. The act also calls for the state agency to consider supporting evidence provided by any local educational agency that believes that the preliminary identification is in error for statistical or other substantive reasons before making a final determination.

### Calendar

Once the AYP data are available to districts on July 27, 2011, TEA will begin accepting appeals. Confidential unmasked data tables will be available to all campuses and districts on July 27th through the TEASE secure website. Superintendents may submit a letter of request for appeal to the Texas Commissioner of Education through Friday, September 2, 2011. All letters must be postmarked no later than September 2, 2011. For districts and campuses that could be subject to Title I School Improvement Requirements, some additional information is provided below.

#### *Districts and Campuses Subject to Title I School Improvement Requirements*

The requirements for Title I districts and campuses for the 2011–12 school year are determined by the district or campus preliminary 2011 AYP results, the final 2010 AYP status, and the School Improvement Program (SIP) status in the 2010-11 school year. For information regarding districts and campuses that may be subject to or may exit Title I School Improvement Program Requirements, see *Appendix B: Title I School Improvement*.

### **Limitations on 2011 AYP Appeals**

School districts will have approximately five weeks to submit an appeal to the preliminary AYP status. TEA must limit the number of appeals requiring extensive student level research that can be considered in order to thoroughly evaluate all appeals prior to the release of the final AYP status in December. The limitation on the number of student records that can be submitted for appeal is discussed in the *Guidelines by Indicator for Appeals* section below.

### General Considerations for Appeals

#### **Data Relevant to the 2011 AYP Result**

Appeals are considered for the 2011 AYP status based on data relevant to the 2011 evaluation. Appeals are not considered for data

reported in the prior year for Performance and Participation measures, regardless of whether the prior year AYP results or status may impact the outcome of the current year AYP status. Appeals are not considered for data reported for Graduation Rate results in the year following the school year relevant to AYP evaluations.

### **Appeals Are Not a Data Correction Opportunity!**

Appeals should be based upon a data or calculation error attributable to TEA, regional education service centers (ESCs), or the test contractor for the student assessment program. Problems due to district errors on PEIMS data submissions or on test answer documents may be considered on a case-by-case basis. However, repeated patterns of district errors on PEIMS data submissions or test answer documents are not favorable for appeal. TEA will review districts' previous history of submitting district data error appeals.

### **Allowable Appeals**

Appeals are allowed for all districts and campuses.

- Appeals are not considered for any indicators, components, or measures on which the district or campus does not miss AYP. For example, an appeal to reevaluate campus Reading/English Language Arts Performance or Participation is not considered for a campus that does not miss AYP for Reading/English Language Arts. These appeals are considered invalid.
- Appeals **are** allowed in circumstances that would result in the district or campus continuing to miss AYP for 2011. For example, an appeal to reevaluate campus Reading/English Language Arts Performance is considered for a campus that does not meet AYP for both Reading/English Language Arts Performance and Mathematics Performance, even though this appeal alone would not result in the campus meeting AYP for 2011. These appeals are allowed because even though granting them results in the district or campus continuing to miss AYP, they *would* potentially have an effect on the Title I School Improvement requirements.
- Appeals for only one component of an indicator that would continue to miss AYP for that indicator are not considered. Title I School Improvement Program (SIP) indicators Reading/English Language Arts and Mathematics combine both the Performance and Participation components for the subject area outcome. For example, an appeal to reevaluate campus Mathematics Performance alone from a campus that also missed the AYP Mathematics Participation component would continue to result in missing AYP for the Mathematics indicator. Appeals for one component of an indicator that would not result in a change to the indicator are not considered.

### **Determination of AYP Status**

AYP appeals for each indicator are determined independently. Appeals to one indicator will not negatively or positively affect another indicator meeting AYP standards. For example, students included as participants based on an appeal will not result in

reevaluating performance to include these students. Likewise, an attendance rate appeal will not result in performance improvement/safe harbor being recalculated unless the performance measure is also appealed.

## **Guidelines by Indicator for Appeals**

The following guidelines describe the circumstances under which AYP data may be appealed and the documentation required in support of the appeal. Appeals applications submitted under these guidelines are not guaranteed to be granted. Each appeal will be evaluated based on the documentation provided and other information available at TEA.

### **Performance Results for Reading/English Language Arts and Mathematics**

If a problem is identified with data received from the test contractor, the assessment data may be appealed. An appeal of these measures should reflect a serious problem such as a missing grade level or campus. Coding errors on TAKS or any other assessment will be considered on a case-by-case basis.

- If the district has requested that the writing portion of the English Language Arts test be re-scored, the outcome of the re-score and a copy of the dated request to the test contractor should be provided with the appeal. If the rescored results impact the AYP status, an appeal is necessary since rescored results may not be processed in time to be included in the assessment data used to determine AYP.
- If other serious problems are involved in the appeal, copies of correspondence with the test contractor should be provided with the appeal.

### **Limitations on Performance Appeals**

A district or campus appeal to the performance component based on test results of more than **10** students will not be favorable for consideration. Appeals based on more than 10 students will only be considered in rare situations where extenuating circumstances can be documented to justify the inclusion of additional students in the appeal.

### **Data Quality**

For all appeals, data quality will continue to be a consideration in evaluating the merits of an appeal. Districts are responsible for providing accurate information to TEA, including information provided on student answer documents or submitted via online testing systems. Districts that submit appeal requests based on coding or submission errors that have repeated patterns of district coding errors should be prepared to submit a data improvement plan or other required monitoring intervention activities to address potential concerns related to data integrity. Clearly documented student identifying information is critical in the evaluation of performance rate appeals.

### **Student Attribution Codes**

Student attribution codes were submitted in the Public Education Information Management System (PEIMS) by districts with Residential Treatment Facility (RTF) campuses, Texas Juvenile Probation Commission (TJPC) campuses, or Texas Youth Commission (TYC) campuses. Appeal requests to reconsider district or campus performance results based on the inaccurate student attribution coding on test answer documents will likely be denied.

### **Texas Projection Measure (TPM)**

An appeal request to determine the AYP performance results using the discontinued TPM results for any TAKS assessment, or a request to use the TAKS-Alt growth measure for AYP, will not be evaluated

### **Other Indicator Appeals and Safe Harbor**

A successful appeal of the Other Indicator (either Attendance Rate or Graduation Rate) may have an impact on the district or campus ability to meet the performance improvement/safe harbor standard on Reading and/or Mathematics Performance. However, Safe Harbor is *not* recalculated unless the performance measure is also appealed. Please refer to performance improvement/safe harbor in *Section III* for further information.

## **Participation**

### **Limitations on Participation Rate Appeals**

A district or campus appeal to the participation rate based on test results of more than 10 students are viewed unfavorably. Appeals based on more than **10** students will only be considered in rare situations where extenuating circumstances can be documented to justify the inclusion of additional students in the appeal.

For all appeals, data quality will continue to be a consideration in evaluating the merits of the appeal. Districts are responsible for providing accurate information to TEA, including information provided on student answer documents. Clearly documented student identifying information is critical in the evaluation of participation rate appeals.

### **Extreme Medical Emergencies**

If the district or any campus did not meet the 95% standard for the Participation Component of the Reading/English Language Arts or Mathematics Indicators because of students who were not tested due to extreme medical emergencies, the appeal must include documentation (such as a note signed by a doctor or parent) showing that the student was unable to participate in the assessment at any time during the testing window due to medical reasons. NOTE: State assessment policy requires testing of medically fragile students

who receive instruction in homebound or hospital settings unless they are unable to participate in the assessment at any time during the testing window.

### **Students Ineligible for the Linguistically Accommodated Testing (LAT) of TAKS Reading/English Language Arts**

In accordance with federal NCLB regulations, LEP-exempt students are included in the AYP Reading/ELA Indicator through their participation in the Linguistically Accommodated Testing (LAT) of TAKS Reading/English Language Arts. The *2011 Texas Student Assessment Program Coordinator Manual* defines students eligible to take the LAT administrations in Reading or ELA as those in grades 3–8 or 10 who are identified as LEP-exempt in Reading or ELA in accordance with Texas policy, and in their second or third school year of enrollment in U.S. schools. LEP-exempt students in their first school year of enrollment in the U.S. do not take a LAT administration of Reading/ELA and are counted as participants in AYP through their TELPAS reading test. An appeal may be submitted for a district or any campus that did not meet the Participation Component of the Reading Indicators due to students counted as non-participants because they were not enrolled in the district or campus during the TELPAS Reading testing window. Commissioner rules for testing and classification of limited English proficient students state that school districts must administer the required oral language proficiency test within four weeks of their enrollment. The appeal must include documentation showing a student’s 1) date of initial enrollment and 2) LPAC documentation identifying the student as limited English proficient (LEP); and 3) LPAC documentation indicating the number of years enrolled in U.S. schools.

### **Linguistically Accommodated Testing (LAT) for Reading/English Language Arts and Mathematics**

If a problem is identified as miscoding of LAT info on test answer documents for Linguistically Accommodated tests administered to eligible students LEP-exempt from the TAKS Reading/ELA or Mathematics tests, the assessment data may be appealed. District appeals to the performance or participation status of students tested on the LAT tests must include proper documentation of a LAT administration or validation that the tested student was either a current or monitored LEP student during the time of testing.

## **Graduation Rate**

### **Graduation Rate Calculation**

In June, each school district was provided with lists of all students in their class of 2010 four-year longitudinal completion cohort and their class of 2009 five-year longitudinal completion cohort. The lists provided included the final status of each student in that cohort. For the Graduation Rate, only students with a final status of “graduate” are counted in the numerator of the rate calculation. The denominator of the rate calculation is the sum of the students with a final status of “graduate”, “continue in school”, “GED”, or “dropout”. Note that the list also includes members of the cohort who left Texas public schools and students with identification errors. Only students shown in these lists may be appealed for the graduation rate indicator.

The four-year and five-year longitudinal cohort student statuses are considered final. TEA must maintain compliance with the federal requirements for adjusted cohort graduation rates and the National Center for Education Statistics (NCES) dropout definition. In order to ensure that all districts have an equal opportunity to locate graduates, requests for changes to the final student statuses are not favorable for appeal. Appeals requesting a change in the final leaver status of the students based on information that was not known until after the Public Education Information Management System (PEIMS) resubmission deadline cannot be considered. Appeals to count continuing students or GED recipients as graduates will not be considered.

Accuracy of leaver data submitted to TEA by the district is a factor considered in evaluation of the merits of Graduation Rate appeals.

- If the district or any campus did not meet the AYP graduation rate indicator because of students with disabilities shown with a final status of “continue in school”, an appeal may be submitted based on students with individualized education programs (IEPs) containing needed transition services, indicating graduation plans that exceed the longitudinal (four or five year) cohort period. These students will then be excluded from the Graduation Rate calculation.

Sufficient documentation for students developed in their earliest years of inclusion in the class of 2010 cohort should be included. Students served in special education programs with IEPs developed during their last year in the longitudinal (four or five year) cohort will not be favorable for appeal.

- If the district or any campus did not meet the AYP graduation rate indicator because of recent immigrant students with limited English proficiency in U.S. schools for one year or less, the appeal should include documentation showing the students’ recent immigrant LEP status. These students will then be excluded from the Graduation Rate calculation.

LPAC documentation of the student’s limited English proficient status during the students’ first year of enrollment should be included with each appeal.

- Appeal requests for Graduation rate recalculations for the exclusion of special education or limited English proficient students outlined above are based on the longitudinal cohort (four or five year) status of students as reported by the PEIMS resubmission deadline.

Graduation rate appeals will also be considered for districts and campuses that do not initially meet the AYP performance criteria for Reading/English Language Arts and/or Mathematics for all students or any student group because they do not meet the Graduation Rate criteria required as part of the performance improvement/safe harbor standard. If an appeal is not made for the performance measure that might meet Safe Harbor consequent to a successful appeal for the Other Indicator (graduation rate), the status of the performance measure will remain unchanged.

### **Limitations on Graduation Rate Appeals**

A January 5, 2011, letter was sent from the commissioner to remind school districts of the importance of submitting accurate leaver records prior to the January 20, 2011, PEIMS resubmission deadline. The commissioner noted that these leaver records will be used to produce the 2009-10 completion, graduation, and dropout rate results that will be evaluated in the 2011 state and federal accountability systems. The commissioner's letter also highlighted that state law requires use of an external panel to ensure independent oversight of the state accountability appeals process. For the 2009 and 2010 ratings, the state accountability appeal panel consistently recommended that appeals related to completion and dropout rates only be granted in limited circumstances given the opportunities that districts are provided to submit accurate leaver records for students who attended their schools in the prior year.

Similarly, federal accountability appeals to the Graduation Rate are evaluated on a case-by-case basis and limited by the number of students in question and scope of the appeal. A district or campus may not appeal the graduation rate calculation on the basis of more than **10** non-graduates ("GED", "continue in school", or "dropout") **or** one percent of the number of non-graduates in the cohort of the longitudinal completion rate, whichever is larger.

As reiterated by the commissioner's letter, districts are responsible for providing accurate information to TEA, including the data used to determine the graduates component of the longitudinal secondary school completion rates. Therefore, federal accountability appeals to the graduation rate cohort determination or longitudinal completion rates calculations are not considered.

For all appeals, data quality will continue to be a consideration in evaluating the merits of an appeal. Poor data quality is not a valid reason to appeal the graduation rate. Other indicators of leaver data quality will be considered in concert with graduation appeals, such as excessive counts or rates of underreported students.

### **Graduation Rate Appeals from Alternative Education Campuses**

There are some additional considerations for alternative education campuses (AEC) and appeals related to Graduation Rate. TEA recognizes the unique students served by these campuses and the need for consideration in regard to the graduation rate used in AYP. For this reason, there is no limit to the number of students that can be included in an appeal to the graduation rate for alternative education campuses.

#### **School District Appeals**

School district appeal requests for a recalculation of the district graduation rate based on allowable appeals for alternative education campuses are not considered except for charter districts that are registered for evaluation under AEA procedures, or showing that they are eligible for registration as an AEA campus but have chosen not to register.

### **Charter District or Campus Appeals**

Appeals for review of the Graduation Rate from alternative education campuses require that the campus provide evidence the campus serves “students at risk of dropping out of school.” They may do this by either having registered as an Alternative Education Accountability (AEA) campus under the state accountability alternative education campus registration process, or showing that they are eligible for registration as an AEA campus but have chosen not to register.

- Eligible charter districts or campuses may request the calculation of Graduation Rate for an alternative education campus using an alternative methodology that excludes the following students:
  - Students who received a GED certificate,
  - Continuing students, or
  - Continuing students who transferred to campus in the fall following their expected graduation date.
  
- Eligible charter districts or campuses may request that the Graduation Rate not be evaluated if the AEC did not have students enrolled in Grade 12 in the 2010-11 school year.

### **Recalculated Graduation Rate**

The recalculated graduation rate must meet the 2011 AYP graduation rate requirements, or reduce the denominator below the minimum size criteria for the student group. Graduation rates for the four-year longitudinal graduation rate and the five-year longitudinal graduation rate will be recalculated then evaluated on 2011 AYP criteria. The prior year graduation rate for the specific student group is also recalculated to exclude GED and/or continuing students for a consistent measure of improvement in the graduation rate.

## **Attendance Rate**

### **Current Year Attendance**

As described in *Section III*, the 2011 AYP Status is based on 2009–10 Attendance Rates for districts and campuses that have Attendance Rates as their Other Indicator. Districts can appeal to have their 2011 AYP Status reevaluated using 2010–11 Attendance Rates for districts and campuses not meeting one or more of the 2011 AYP measures due to Attendance Rates. Eligible districts and campuses include the following:

- those that do not initially meet the Attendance Rate standard or improvement on the Attendance Rate for all students; and
  
- those that do not initially meet the AYP performance criteria for Reading/English Language Arts and/or Mathematics for all students or any student group because they do not meet the standard or show the required level of improvement on the

Attendance Rate required as part of the performance improvement/safe harbor standard, even though a 10% decrease in percent of students not meeting the performance standard is achieved. If an appeal is not made for the performance measure that might meet Safe Harbor consequent to a successful appeal for the Other Indicator (attendance rate), the status of the performance measure will remain unchanged.

Since the 2011 appeals process will occur before 2010-11 attendance rates can be calculated from PEIMS submission 3, districts will be required to supply the current year attendance data with their appeals. A notarized copy of 2010-11 attendance rates must be submitted as part of the appeal. Copies of each of the six-week totals as well as the yearly total must be included.

Attendance Rate for all students (90.0% standard) will be reevaluated using 2010–11 attendance data provided by the district. Improvement on the Attendance Rate for all students and student groups will be reevaluated using 2010–11 Attendance Rates compared to 2009–10 Attendance Rates. If attendance measures are reevaluated using current year attendance data, all measures based on attendance will be reevaluated. A district or campus cannot meet some 2011 AYP criteria using 2009–10 Attendance Rates and meet other criteria using 2010–11 Attendance Rates.

## **Special Circumstance Appeals**

### **Appeal of Reported Race or Ethnicity Identification**

Due to the application of the Federal Race/Ethnicity Provision to the 2011 AYP evaluations, appeals related to the reported race and ethnicity categories on test answer documents for administration during the 2009-10 and 2010-11 school year will not be considered. Texas will apply a Federal Race/Ethnicity Provision to the 2011 AYP evaluation to address multiracial students reporting more than one race that includes both Black/African American and White racial categories. Appeal requests to reconsider AYP results based on students' race and ethnicity reporting in any combination of multiple or single racial categories will not be considered. See the Section III: *Participation Student Groups Evaluated* and *Performance Student Groups Evaluated* sections for more information on the Federal Race/Ethnicity Provision.

### **Appeal of the USDE approved Texas AYP Workbook requirements**

Appeals to the performance or participation indicators based on the results of TAKS–Modified (TAKS–M), TAKS–Alternate (TAKS–Alt), or TELPAS Reading as required by the United States Department of Education (USDE) approved 2011 Texas AYP Workbook, are not considered. Appeals related to assessment results from the prior year that are used to calculate safe harbor in 2011 are not considered. Texas is required to maintain federal requirements and processes for the evaluation of AYP, therefore, appeal requests to apply state legislative accountability rules for an AYP outcome are not considered.

### **Appeals Related to the Federal Cap and Campus Rankings**

Appeals to the performance results due to the federal caps are not considered. TAKS–M results used in AYP are subject to the 2% Federal Cap. In the case where the student’s result from the first or second administrations is from the TAKS–M test, the TAKS–M results are included in the AYP performance numerator *after* the federal cap process determines the result can be counted for AYP.

Appeals to the campus ranking submitted by school districts for the 2% federal cap are also not considered. For example, appeals requesting a campus ranking that differs from the campus ranking chosen by the district by the June 24, 2011, deadline are not considered. In addition, an appeal based solely on the basis that the district’s exception was approved will not be considered. Please refer to *Section IV* for information on reconsideration of performance results due to the application of the federal cap.

### **Spring 2011 TAKS Corrections Window**

As in 2010, in 2011 TEA offered districts the opportunity to correct the TEST TAKEN INFO field on test answer documents. This correction opportunity was available only for the primary administrations in the spring. Changes to the TEST TAKEN INFO field submitted within the correction window will be included in the TAKS data files used in determining the 2011 AYP status. Appeals from districts that missed this corrections window would likely be denied. Corrections to fields other than the TEST TAKEN INFO field will not be used in determining AYP results. For state or federal accountability purposes, student identification information, demographic or program participation, and score code status will be based on the information provided on the answer document at the time of testing.

### **Title I Targeted Assistance Campuses**

All students were included in the calculations for Title I campuses with targeted assistance programs. Districts can appeal to have the 2011 AYP status of any targeted assistance campuses recalculated based on the results of only Title I students if test answer documents in both Reading/English Language Arts and Mathematics were submitted for at least 50 Title I students on the targeted assistance campus.

### **Grades 9 and 11 TAKS**

The AYP Reading/English Language Arts and Mathematics indicators are based on test results for Grades 3–8 and 10. Campuses with no students in Grades 3–11 are evaluated on the test results for the campus with which they are paired for state accountability ratings. Campuses with no students in Grades 3–8 or 10 that are not paired for state accountability ratings are evaluated for 2011 AYP Status based on the test results of the district at the all students level. If a campus with no students in Grades 3–8 or 10 that has students tested in Grades 9 or 11 does not meet AYP on the Performance components of the Reading/English Language Arts or Mathematics indicators, the district may appeal to have the campus evaluated based on its own test results. The Reading/English Language Arts and Mathematics indicators are evaluated for all students and for each student group meeting the minimum size requirement based on

all campus test results in Grades 9 and 11. The Other Indicator is also evaluated if the campus meets the minimum size requirement for all students.

## **How to Submit an Appeal Application**

Districts and campuses must submit written appeals on official district letterhead and under the signature of the district superintendent. See instructions that follow for submitting appeals. For any district or campus, only one opportunity to appeal is permitted on any single measure.

Superintendents must prepare a written request (see Exhibit 6 for an example of an acceptable appeal) addressed to the commissioner of education that includes:

- A statement that the letter is an appeal for the 2011 AYP results.
- If an Other Circumstance exception was applied for, send the printed exception application confirmation.
- The 2011 AYP Appeal Request Form must be included with the letter for appeals applications. Now automated, completing the AYP Appeal Request Form will automatically register your appeal in the TEASE AYP Appeal Form and Registration System. This system provides a mechanism for tracking all AYP appeals and allows districts to monitor the status of their appeals. Exhibit 7 provides an example of the required form that will be available to districts on the TEASE website (see *Section VI: AYP Products Available Online Through TEASE Accountability for more information regarding registration of appeals*).
- Specification in the letter of the district and each campus for which the appeal is being submitted (including county-district-campus numbers for each campus). It is not necessary to have a separate letter for the district and each campus. However, it should not be assumed that a letter appealing the status of a district will also apply to any campuses within that district or vice versa, even if the district has only one campus.
- For the district and each campus, list ALL indicators, components, or measures for which the district/campus is being appealed. It is not necessary to have a separate letter for each indicator being appealed.
- For each indicator, component, or measure being appealed, the appeal must specify the perceived error (or reason why it is being appealed). If applicable, the reason the perceived error is attributable to the TEA, a regional ESC, or the test contractor for the student assessment program and the reason the perceived error resulted in the district and/or campuses not meeting the AYP standard for the measure must be included.
- The superintendent must certify that all information included in the letter is true and correct to the best of the superintendent's knowledge and belief.

It is insufficient to claim data are in error without providing information with which the appeal can be evaluated. When student-level information is in question, supporting information must be provided for review, i.e., a list of the students in question by name and identification number. Lists of students included in the AYP participation and performance measures will be available on the TEASE website at the time the AYP data tables are made available to school districts on July 27th. *Confidential student-level documentation included in the appeal packet will be processed and stored in a secure location and will be accessible only by TEA staff authorized to view confidential student information. TEA staff will adhere to federal FERPA requirements intended to protect individual student confidentiality; therefore, additional staff release forms are not necessary.*

Appeal letters and all supporting documentation should be shipped to the following address:

Your ISD Your address City, TX zip	
Division of Performance Reporting Texas Education Agency 1701 North Congress Avenue Austin, TX 78701-1494	
<u>Attn: AYP Appeal</u>	

Letters of appeal postmarked after the September 2<sup>nd</sup> deadline will not be considered. These deadlines are final. To maintain a fair appeals process, no late appeals will be considered. Superintendents are encouraged to obtain delivery confirmation services from their courier and to retain confirmation of delivery until final 2011 AYP Status is released. Superintendents are encouraged to double-check that they have included all relevant supporting information with their letter prior to shipment. Exhibit 8 provides a suggested order for packing AYP letters for shipment. Appeals delivered directly to TEA by district staff must be time-stamped in the Division of Performance Reporting by 5:00 p.m. on September 2, 2011. Overnight courier tickets or tracking documentation must indicate package pickup on or before September 2.

The AYP Appeal Form and Registration System will allow districts to monitor the status of their appeal. TEA will not contact districts to acquire missing documentation or to discuss information provided in their request for appeal or exception. Appeals are

evaluated on the circumstances described in their request on the basis of information provided by the district and research conducted by staff to validate the circumstances described.

## **How an Appeal Application Is Processed by the Agency**

All appeals will be resolved by December and the results will be reflected in the final 2011 AYP Status. If the district or campus receives a final 2011 AYP Status of *Meets AYP* based on their request, the status will be annotated with a comment. Prior to the release of final 2011 AYP Status, superintendents will be sent a letter from the commissioner notifying them of the results (see Exhibit 9 below). The notification letter will also be made available on the TEASE Accountability website.

The details of the request are entered into a database for tracking purposes and researchers evaluate the request using relevant agency data sources to validate the statements made to the extent possible. The agency examines all relevant data, not just the results for any students specifically named in the correspondence.

- Guidelines to be used to evaluate AYP appeals are reviewed by an independent panel that provides external oversight to the appeals process.
- Staff conducts research and prepares a recommendation that is forwarded to the commissioner.
- The commissioner of education makes a final decision.
- The superintendent is notified in writing of the commissioner's decision and the rationale upon which the decision was made. The decision of the commissioner is final and is not subject to further negotiation.
- Data are never modified, even when the AYP results are changed.

## **Relationship Between AYP and PBMAS**

AYP staff will consider indicators from the Performance-Based Monitoring Analysis System (PBMAS) when making findings on AYP appeals, as well as other district data submitted through PEIMS or the state assessment contractor. In addition, beginning in 2011, the Program Monitoring and Interventions Division will consider school districts' repeated patterns of AYP appeals based on district coding errors when conducting monitoring intervention activities to address potential concerns related to data integrity.

### **Federal Race or Ethnicity Reporting**

Please note that in order to monitor possible manipulation of the race/ethnicity data for accountability purposes, the agency plans to conduct analyses to identify districts and campuses with significant discrepancies between the percent of students who are classified as Two or More Races on the spring 2011 assessment documents and the fall 2010 PEIMS enrollment files.

## Exhibit 6: Sample AYP Request Cover Letter

September 2, 2011

Robert Scott  
 Commissioner of Education  
 Texas Education Agency  
 1701 North Congress Avenue  
 Austin, TX 78701-1494

Dear Commissioner Scott,

This letter is to appeal the 2011 AYP status for the Sample Independent School District and campuses named below.

District/Campus	Indicators Appealed	Reason
Sample ISD (999999)	Reading and Math Performance	Request for exception to the federal cap
Sample H S (999999001)	Math Participation	Absences on test dates due to medical emergencies
Sample J H (999999041)	Reading Participation	LEP-Exempt students enrolled after the TELPAS testing window
Sample Elementary School (999999101)	Attendance Rate	Campus would like to be evaluated on current year's attendance rate

By my signature below, I certify that all information included in this appeal is true and correct to the best of my knowledge and belief.

Sincerely,  
 [signature]  
 John Q. Educator  
 Superintendent  
 Sample Independent School District

*Documentation Attached*

This is an example of an acceptable format for the cover letter. Districts should provide as much detail as they need to explain their appeals. At a minimum, the letter should include the information below.

Statement that this is an appeal of 2011 AYP Status.

Specification of which district/campuses are being appealed, for which indicators/components/measures, and why.

Certification that all information is true and correct to the best of superintendent's knowledge.

Superintendent must sign!

## Exhibit 7: Sample AYP Appeal Request Form

**Texas Education Agency  
2011 AYP Appeal Form and Registration System  
District: SAMPLE ISD**

**AYP APPEAL FORM AND REGISTRATION DIRECTIONS**

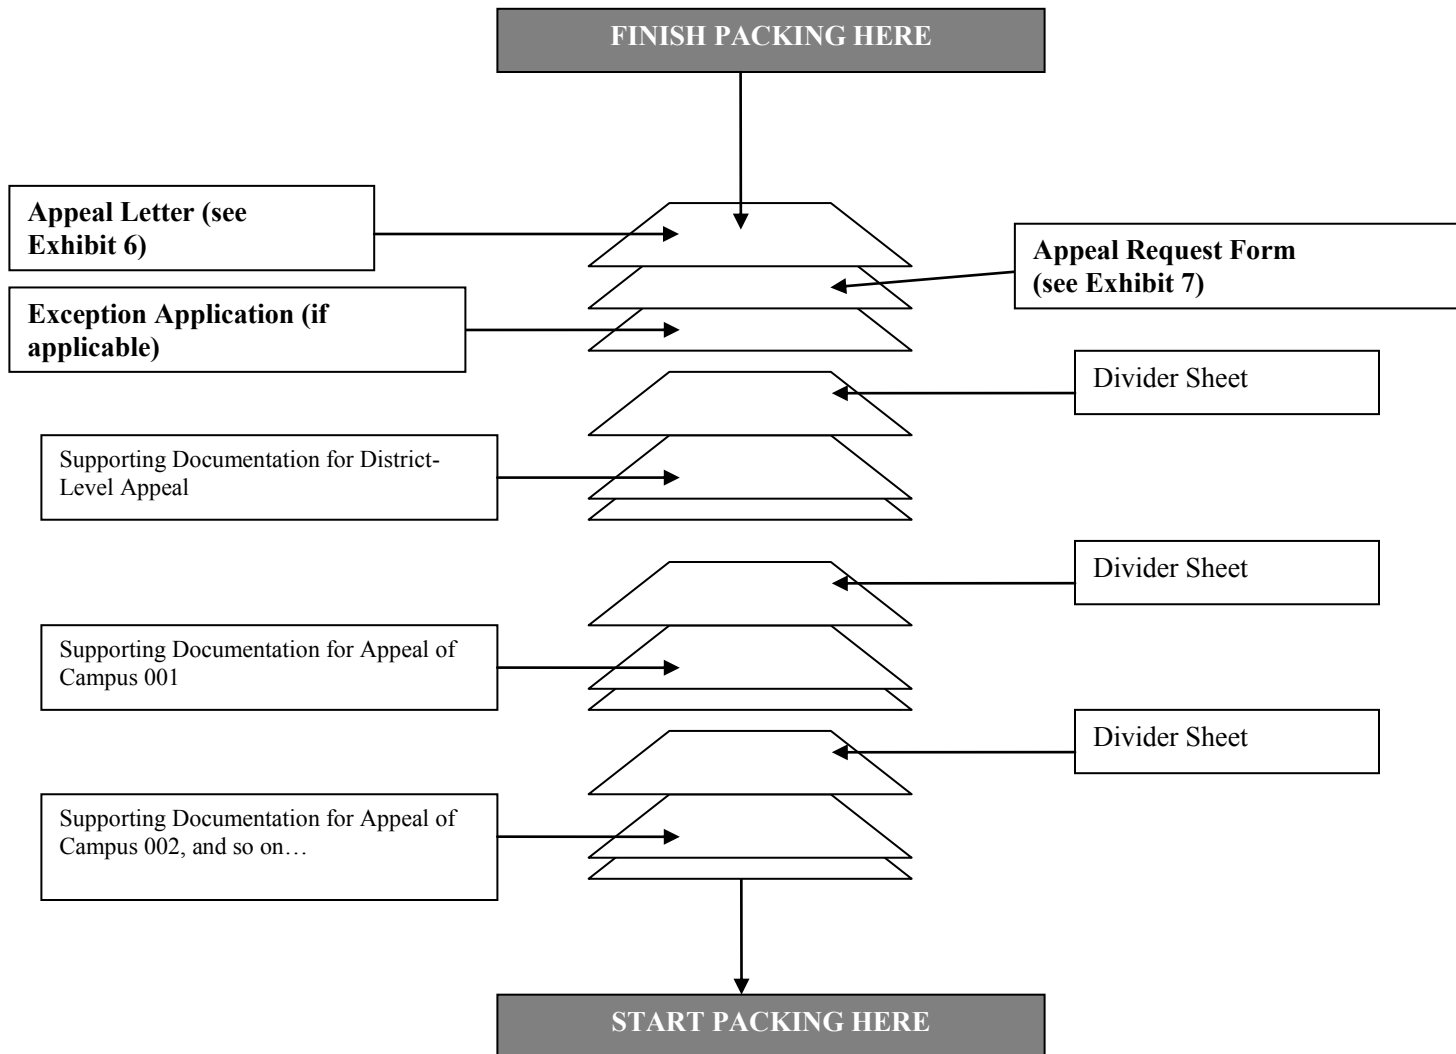

The TEASE Accountability website will include detailed instructions on accessing, entering, and printing the AYP Appeal Form. This will automatically register your appeal in the TEASE AYP Appeal Form and Registration System.

District or Campus Number	District or Campus Name	Reading/ELA Performance	Mathematics Performance	Reading/ELA Participation	Mathematics Participation	Graduation Rate	Attendance Rate
999999	Sample ISD	<input type="checkbox"/> No <input type="checkbox"/> Yes	<input type="checkbox"/> No <input type="checkbox"/> Yes	-----	-----	-----	-----
999999001	Sample HS	-----	-----	-----	<input type="checkbox"/> No <input type="checkbox"/> Yes	-----	-----
999999041	Sample JH	-----	-----	-----	-----	-----	-----
999999101	Sample Elementary School	<input type="checkbox"/> No <input type="checkbox"/> Yes	-----	<input type="checkbox"/> No <input type="checkbox"/> Yes	-----	-----	<input type="checkbox"/> No <input type="checkbox"/> Yes

The TEA AYP APPEAL FORM AND REGISTRATION SYSTEM is used to indicate the district intends to submit an appeal for the district and any campuses in your school district that missed AYP. In order to print your form and enter the registration system, at least one appeal must be selected.

- Step 1) For each district or campus, enter the indicator(s) you wish to appeal.
- Step 2) After you have made your selection, click the *Continue* button to review your AYP Appeal Form.

## Exhibit 8: Suggested Packing Order for Appeal Request

## Exhibit 9: Sample AYP Decision Notification Letter

Mr. John Q. Educator, Superintendent  
 Sample ISD  
 1001 Sample Road  
 Sampleville, Texas 77777

Dear Mr. Educator:

Thank you for your letter regarding preliminary 2011 Adequate Yearly Progress (AYP) results. Agency staff reviewed the supporting documentation you provided, examined other relevant data available at the Texas Education Agency (TEA), and conducted research related to the circumstances described in your appeal letter. A detailed description of our findings related to the appeals your district requested by district/campus and by indicator is provided below.

DISTRICT/CAMPUS NUMBER	NAME	RESULT OF REQUEST
999999	Sample ISD	<i>Meets AYP</i>
999999001	Sample H S	<i>Missed AYP</i>
999999041	Sample J H	<i>Meets AYP</i>
999999101	Sample Elementary School	<i>Missed AYP</i>

### Exceptions to the Federal Cap

The U.S. Department of Education (USDE) regulations allow Texas to grant exceptions to the federal cap only in limited circumstances. Given that Texas did not reach its federally mandated federal cap on proficient results even with all exceptions approved prior to the preliminary release, and based on your district's unique circumstances, an additional number of students were allowed to exceed the federal cap and count as proficient in your district. Note that a granted exception application does not guarantee that your district or any campuses meet AYP. Please see the detailed results below for the final status of your district/campuses.

### Sample ISD (999999)

As stated above, the exception request for Sample ISD was approved and an additional number of students were allowed to exceed the federal cap and count as proficient in your district. The performance measure for this campus was recalculated to include additional proficient student(s) and the AYP standard was met. The 2011 AYP status for Sample ISD is *Meets AYP*.

### Sample H S (999999001)

Your appeal for mathematics has been denied since it did not include documentation for a sufficient number of students in order to meet the AYP participation standards in the appealed student group. The appeal for Mathematics Participation was denied. The 2011 AYP status for Sample H S is *Missed AYP*.

### Sample J H (999999041)

Your appeal for Reading/English Language Arts Participation was not considered because Sample J H met AYP on this measure. The 2011 AYP status for Sample J H is *Meets AYP*.

### Sample Elementary School (999999101)

Your appeal for Attendance Rate based upon current year data has been approved. The AYP results for Attendance Rate have been changed. The 2011 AYP status for Sample Elementary School is *Missed AYP*. Please note that the following measure(s) will be removed from the reasons Sample Elementary School missed AYP: Attendance Rate.

Although my decisions are final, any clarifying questions regarding this notification may be directed to the Division of Performance Reporting at (512) 463-9704.

Sincerely,  
 Robert Scott  
 Commissioner of Education

## Section VI: AYP Products Available Online Through TEASE Accountability

Since 2004, AYP products have become available to districts through the Accountability application on the Texas Education Agency Secure Environment (TEASE), a secure website available only to authorized users. The gateway to TEASE is located at: <https://seguin.tea.state.tx.us/apps/logon.asp>

### AYP Release Schedule

In an effort to provide information to school districts via the TEASE site prior to the public release of 2011 preliminary data tables, districts will have access to confidential preview preliminary data tables that will not include AYP status labels or the Title I School Improvement (SIP) Requirement status label. On July 27th, districts will receive confidential preliminary data tables prior to the public release from the secure TEASE Accountability website. The following week, on August 3<sup>rd</sup>, the preliminary data tables on TEASE will be updated to include AYP status labels and Title I SIP Requirement status label information. The public, masked preliminary data tables will be available on the TEA public website on the following day, August 4<sup>th</sup>.

#### **Federal Race/Ethnicity Provision**

As described in *Section III: Indicators, Components, Measures, and Standards* (pages 25, 35, and 48), Texas will apply a Federal Race/Ethnicity Provision to the 2011 AYP evaluations. Each campus or district AYP data table will include a message indicating whether the Federal Race/Ethnicity Provision was used. The official AYP data for the Reading and Mathematics Performance and Participation indicators will be the data that does not include the multiracial students in the separate student groups.

To assist districts who might be interested in seeing which students' results were subject to the Federal Race/Ethnicity Provision, additional information is provided on AYP student listings. See *Appendix C* for more information available to school districts that help identify students that were redistributed due to the Federal Race/Ethnicity Provision.

A summary of the AYP release schedule is shown below.

**July 27, 2011**

**Release of 2011 Preliminary Data Tables to Campuses and Districts**

Confidential unmasked preliminary data tables available on the TEASE site *will not include the preliminary AYP and SIP status labels*. The AYP Explanation Table will be included on these tables.

**Appeals Begin**

**Open Other Circumstance Exceptions Application**

**August 3, 2011**

**Update 2011 Preliminary Data Tables on TEASE**

Confidential unmasked preliminary data tables are updated on the (TEASE) site to *include the preliminary AYP and SIP status labels* (includes messages indicating whether the Federal Race/Ethnicity Provision was used).

**August 4, 2011**

**Public Release of 2011 Preliminary Data Tables**

Masked preliminary data tables released electronically on the TEA public website *will include preliminary AYP and SIP status labels*.

## **Gaining Access to TEASE Accountability**

District staff need a TEASE account to access any TEASE application. Even if approved district personnel currently have access to other TEASE applications (e.g., PEIMS Edit+, eGrants, etc.), they may still need to have the Accountability application added to their TEASE accounts. If a staff member needs to have access to TEASE Accountability, he or she will need to complete the following form:

<http://ritter.tea.state.tx.us/forms/tease/accountability.htm>

The form must be printed out, completed, signed by the district superintendent (or equivalent for charter operators), and mailed or faxed to the contact information provided on the form. Depending on the volume of requests, it may take several days for a request to be processed (if the request was mailed, several more days should be allowed for the request to reach TEA). Staff will receive an email from TEA Security once Accountability has been added to their TEASE accounts.

## Multiple District Access

Certain charter operators and Education Service Center (ESC) staff have the unique situation of requiring access to multiple school district or charter operator information. To gain access to TEASE Accountability information, multiple district users must obtain the superintendent's signature for each district to which the user requests access (one request form per district/charter). Multiple district login accounts do not provide access to all districts in any single ESC region, only to those districts that have granted access for the user. In some cases, it may not be possible to obtain a single login with access to multiple school district or charter information since some applications do not support multiple-district users. For information about new single or multiple-district TEASE user accounts, please contact the Division of Performance Reporting at (512) 463-9704.

## AYP Products Available

The Accountability application is designed to contain products produced for districts by several divisions in the Department of Assessment, Accountability, and Data Quality. Once TEASE has been logged into and the Accountability application selected from the list of authorized applications, the main Accountability index screen will appear. This screen lists the types of products available from the site and may also contain recent announcements to districts related to Accountability. Therefore, users must always be sure to read the main screen carefully for updated announcements and products.

**IMPORTANT: Data on the TEASE Accountability application are NOT masked to protect individual student confidentiality. Remember that individual student information is confidential under the Family Educational Rights and Privacy Act (FERPA). This site is intended for DISTRICT USE OR ESC USE WITH DISTRICT PERMISSION ONLY. The Texas Education Agency also takes the position that the tables at this stage of the accountability review process constitute “agency audit workpapers” and are not required to be disclosed under the Texas Public Information Act.**

From the main page, find the link to Adequate Yearly Progress (AYP) Results and click the link to access online AYP products. Products available will change depending on whether a preliminary release or a final release has occurred. During the preliminary release of AYP information, districts will be able to access the following products:

- unmasked preliminary data tables
- Appeal Request Form and Registration System
- application for other circumstance exception
- student listings including AYP calculation status information

During the final release of AYP information, districts will be able to access final unmasked data tables and unofficial copies of appeal decision notification letters. Student listings will also remain available during the final release.

### **AYP Appeal Form and Registration**

Superintendents must prepare a written letter requesting an appeal of their Preliminary AYP status addressed to the commissioner of education which includes their district's AYP Appeal Request Form. AYP appeal letters must be submitted to TEA by the AYP appeal deadline of September 2, 2011. **To maintain a fair appeals process, no late appeals will be considered.** District staff may enter the automated TEASE Appeal Request Form and Registration System to access the AYP Appeal Form, enter the AYP indicators they wish to appeal, and print the form. Entering and printing the AYP Appeal Form will automatically register the district's intention to appeal. After initial registration, district staff may access the AYP Appeal Request Form and Registration System to monitor the receipt of registration and documentation for their appeal.

Once the appeal is registered, districts have until September 2, 2011 to submit their written appeal to TEA. The AYP Appeal Request Form and Registration System will be available during the AYP appeal window, from July 27 through 5:00 p.m. CDT on September 2<sup>nd</sup>. After that time, the AYP Appeal website will be accessible for district staff to monitor the status of their appeal and receive other information updates. AYP Appeal Forms and registration of a district's intent to appeal are not available through TEASE after the appeal deadline.

Appeals will be evaluated based upon the required documentation submitted in the mailed packet as described in *Section V: Appeals*. All appeals must meet the requirements outlined in Section V.

**IMPORTANT NOTE:** Superintendents who do not have TEASE access must request access in order to register, print the Appeal Form, or monitor the status of their appeal. Please see the section above, *Gaining Access to TEASE Accountability*, for more information.

### **Most Recent AYP Products Only**

The TEASE Accountability site is not intended to be an archive of AYP information. The site is intended to contain only the most recent AYP products released. When final AYP products are released, that year's preliminary products will be taken off the site. Also, when a new year's preliminary AYP products are released, the prior year's final products will be taken off the site.

## Section VII: Future Considerations

Although the Texas Consolidated State Application Accountability Workbook (Texas AYP Workbook) provides the basic framework for determining Adequate Yearly Progress (AYP) for Texas public school districts and campuses, the system is expected to change. Since its inception, the federal accountability system is designed to increase in rigor as districts and campuses are held to higher standards over time.

### **Transition Plan for STAAR Tests**

Texas state statute governing the Texas statewide student assessment program mandate significant changes to student tests beginning in the 2011-2012 school year. The new testing program, the State of Texas Assessments of Academic Readiness or STAAR, will replace the TAKS tests with the new grade 3-8 assessments and twelve end-of-course assessments. As Texas implements the STAAR tests and phases-out of TAKS, the AYP calculations must be modified to include new grade 3-8 and end-of-course assessments.

As required by state law, the *Transition Plan for House Bill 3* contains a detailed description of the process the commissioner of education will use to develop and implement the provisions of House Bill 3 (81st Texas Legislature, 2009). Accessible at <http://www.tea.state.tx.us/student.assessment/hb3plan/>, Section III, Chapter 16, Federal Accountability: 2012 and Beyond, includes the AYP Accountability Development Timeline (page III-5) for planned activities related to 2011-12, 2012-2013 and beyond. The AYP transition plans for school year 2012-2013 and beyond may also include long term goals and targets for the graduation rate calculations.

### **2012 AYP**

#### **Reading and Mathematics Indicators**

The initial Texas AYP Workbook amendments submitted in December 2010, included a request to carry forward the 2011 AYP status for all campuses and districts for the 2012 AYP evaluations and maintain School Improvement Program (SIP) intervention stages for the 2012–13 school year. This approach is most similar to the state accountability transition plan in which the assignment of state accountability performance ratings is suspended for 2012.

In discussions during Spring 2011, the U.S. Department of Education (USDE) indicated that Texas must evaluate AYP based on test results available for the 2011-12 school year. The 2012 amendment was resubmitted in April 2011 to request the evaluation of 2012 AYP and School Improvement Program (SIP) statuses based on 2011-12 Texas Assessment of Knowledge and Skills (TAKS) results for Grade 10 and 2011-12 State of Texas Assessments of Academic Readiness (STAAR) results for Grade 3-8 at the TAKS

proficiency standard. Subsequently, USDE requested that Texas redact all references to the 2012 AYP evaluations from the 2011 Texas AYP Workbook and recommended that Texas submit 2012 AYP amendment requests in a separate submission prior to February 15, 2012. The Texas Education Agency (TEA) plans to resubmit 2012 AYP amendments in late Fall 2011.

Note that 2012 AYP evaluations are required by the USDE, including School Improvement Program (SIP) intervention stages for the 2012–13 school year. As in past years, TEA guidance regarding Title I School Improvement Requirements during the 2012-13 school year will be provided to districts in late Spring 2012.

### **Graduation Rate Student Group Evaluations**

Federal regulations finalized in October 2008 require that 2012 AYP include the evaluation of disaggregated cohort graduation rate data to determine AYP. Currently, the 2011 AYP graduation rate calculations used to determine the Other Indicator results for secondary schools evaluate the All Student group only. In order to meet the Graduation Rate indicator for 2012 AYP, all seven student groups will be evaluated for graduation rate. Texas plans to submit additional amendment requests to address the graduation rate targets with the 2012 Texas AYP Workbook amendments.

### **Use of Growth Measure in AYP Calculations**

Due to the discontinued use of the Texas Projection Measure (TPM) and the TAKS-Alt growth measure for evaluation of the 2011 AYP, future plans for the use of TAKS–M growth projections available in spring of 2012 are also suspended. The Texas Commissioner of Education's final decision documents released on April 22, 2011, specified the discontinued use of TPM and the TAKS-Alt growth measures for 2011 state and federal evaluations. At the time of publication, it is not anticipated that any growth measures will be used to determine 2012 AYP results.

### **Science**

Under the No Child Left Behind (NCLB) Act, all states are required to assess students in science during the school year. However, the statute does not require that the science assessment results be used for calculating AYP. Any such changes would require an amendment to the statute which could possibly occur after final reauthorization of ESEA.

### **Performance Standards**

The AYP definition is based on expectations for growth in student achievement. The standards must increase over time until they reach 100 percent in 2013–14. For the first six years, the standards were held constant for two years at a time, with increases occurring at the end of the second year. The first increase took place in 2004–05. The second increase occurred 2006-07. Exhibit 10 shows the standards for 2002-03 to 2013-14. Note that beginning in 2008–09 the standards increase annually. Standards are rounded to the nearest whole percent.

**Exhibit 10: AYP Performance Standards**

	<b>AYP Performance Standards for 2002-03 – 2013-14</b>								
<b>School Year</b>	<b>2002-03 2003-04</b>	<b>2004-05 2005-06</b>	<b>2006-07 2007-08</b>	<b>2008-09</b>	<b>2009-10</b>	<b>2010-11</b>	<b>2011-12</b>	<b>2012-13</b>	<b>2013-14</b>
<b>Reading/English Language Arts</b>	47%	53%	60%	67%	73%	80%	87%	93%	100%
<b>Mathematics</b>	33%	42%	50%	58%	67%	75%	83%	92%	100%

## Section VIII: Appendices

### Appendix A: Texas Administrative Code

---

Since 2004, a portion of the *Adequate Yearly Progress Guide* has been adopted as a commissioner's rule by figure. With the publication of this Guide, the Texas Education Agency will file a Commissioner Rule amendment to 19 *Texas Administrative Code* §97.1004, *Adequate Yearly Progress* with the Office of the Secretary of State. This rule will adopt the *2011 Adequate Yearly Progress Guide* as a figure, thus giving legal standing to the AYP status process and procedures. Allowing for a 30-day comment period, final adoption of the 2011 AYP Guide should occur in early August 2011. If any changes result from this rule adoption process, then educators will be notified as soon as possible. Once the rule is adopted, it may be accessed online at:

<http://www.tea.state.tx.us/rules/tac/chapter097/ch097aa.html>

#### **Chapter 97. Planning and Accountability**

Subchapter AA. Accountability and Performance Monitoring

§97.1004. Adequate Yearly Progress.

## **Appendix B: Title I School Improvement**

---

If a district or campus receives Title I, Part A funds and does not meet the Adequate Yearly Progress (AYP) standard for the same indicator for two or more consecutive years, that district or campus is subject to certain Title I School Improvement requirements, such as offering school choice and supplemental education services. Title I School Improvement requirements are implemented in progressive stages based on the number of years the campus or district does not meet the AYP standard for the same measure. The requirements for Title I districts and campuses for the 2010–11 school year are determined not only by the district or campus 2011 AYP Status, but also by the AYP status in the prior year, and the School Improvement status in the prior year.

The following appendix is a compilation of information provided by the School Improvement Unit of the Division of No Child Left Behind (NCLB) Program Coordination. For further information on any of the items detailed below, please contact the Division of NCLB Program Coordination at (512) 463-9374, Option 3, or see the division website at [http://www.tea.state.tx.us/index4.aspx?id=4459&menu\\_id=798](http://www.tea.state.tx.us/index4.aspx?id=4459&menu_id=798).

### **General Guidelines for Title I School Improvement**

- Districts and campuses receiving Title I, Part A funds are subject to School Improvement requirements if they do not meet the AYP standard for the same indicator (Reading/English Language Arts, Mathematics, Graduation or Attendance) for two or more consecutive years.
- Title I districts and campuses identified as subject to School Improvement requirements must implement the requirements in the following school year.
- The requirements increase each additional year Title I districts and campuses do not meet the AYP standard for the same indicator. Stage 1 designates the first year of Title I School Improvement.
- Title I districts and campuses are no longer subject to School Improvement when they meet the AYP standard for two consecutive years for the same indicator that originally triggered School Improvement. The first year a district or campus subject to School Improvement meets the AYP standard for the same measure, the requirements remain the same as the prior year. The second year the district or campus meets the AYP standard for the same measure, the district or campus is no longer subject to School Improvement. If a district or campus subject to School Improvement meets the AYP standard for the same measure one year but does not meet the AYP standard for the measure the second year, School Improvement increases to the next stage.

- Title I districts and campuses may be subject to School Improvement for more than one indicator. The requirements will reflect the highest stage applicable. Districts and campuses are subject to School Improvement until they have met the AYP standard for two consecutive years for each indicator that originally identified the district or campus for School Improvement.
- If a district or campus no longer receives Title I funds, it is no longer subject to School Improvement.

### **Existing and Remaining SIP Identified Campuses**

The USDE requires that campuses that were subject to final School Improvement requirements in 2010-11 and will remain subject to School Improvement requirements in 2011-12 due to the 2011 AYP results must continue to implement those requirements. School districts must notify parents about school choice options by August 8, 2011.

### **Potential SIP Identified Campuses**

If a campus is identified as subject to improvement requirements in the August 4th release for the first time, they must begin implementing requirements (including school choice provisions) immediately. School districts with a campus that is identified as subject to improvement requirements in the August 4th release for the first time, must notify parents about school choice options by August 8, 2011.

### **Exiting SIP Identification**

School districts with campuses that exit school improvement status on August 4, 2011, are no longer required to implement the school improvement provisions. Guidance has been provided in a letter to these districts from TEA.

### **Detailed Requirements for SIP Identified Campuses**

Guidance has been provided by TEA to notify school districts that campuses must begin the school year in the current stage of school improvement and must implement all required Title I SIP intervention activities. Campuses that could potentially exit school improvement status were also provided a guidance letter from TEA. The following information summarizes the requirements included in the guidance letters.

### **Parent Notification Letter (PNL)**

- Existing SIP campuses were required to send a Parent Notification Letter (PNL) to parents and TEA on or before July 1, 2011.
- In the event that fewer than two school choice options are offered in the July 1, 2011, letter and a second school choice option becomes available after the August 2011 release, a follow up letter will be necessary. If the campus is able to offer two or more options for school choice in the July 1<sup>st</sup> letter, no additional options are necessary after the August release.
- Campuses entering Stage 1 after the August release will be required to send the PNL to parents and to TEA on or before August 8, 2011.

### **Fiscal Implications – Title I SIP Application for Funding for 2011-12**

- The SIP application will open in the *eGrants* system on September 6, 2011.
- Existing SIP campuses will receive a limited preliminary allocation, plus any roll-forward from the 2010-11 grant, which may be expended for allowable SIP expenditures until September 30, 2012.
- Any roll forward funds from the 2010-11 grant must be expended before the 2011-12 allocation.
- In the event that an existing campus exits SIP status on August 4, 2011, the campus is no longer eligible to receive or expend SIP funds as of that date.
- If the campus remains in the current stage of improvement or advances to the next stage of school improvement on August 4, 2011, the campus will receive an adjusted SIP entitlement and be allowed to expend the full entitlement, plus any roll-forward from the 2010-11 grant, during the 2011-12 school year.
- Title I campuses that miss AYP for the second consecutive year and enter school improvement status on August 4, 2011, will receive a SIP entitlement and be allowed to expend the full entitlement during the 2011-12 school year. The application closes on October 20, 2011.
- In the event that the campus exits SIP status on appeal in December 2011, the campus is no longer eligible to receive or expend SIP funds as of the date the appeal is granted.

### **School Choice**

- Existing school improvement campuses are required to have notified parents of their option for school choice by July 1, 2011. Guidance has been provided in a letter to these districts from TEA.
- In the event that the campus exits SIP status on August 4, 2011, the campus must continue to allow students who have taken advantage of the school choice provision under SIP to continue to attend the school of choice through the highest grade level offered at the school of choice. Whether or not to continue to provide transportation through the end of the 2011-12 school year is at the discretion of the regular school district. Regardless, Title I, Part A and Title I SIP funds may not be expended for school choice after August 4, 2011.
- If the campus remains in the current stage of improvement or advances to the next stage of school improvement on August 4, 2011, the campus will continue to implement the school choice provision and provide transportation as required by Title I statute.
- Title I campuses that miss AYP for the second consecutive year and enter school improvement status on August 4, 2011, must notify parents of school choice by August 8, 2011, and begin implementation of the school choice option immediately.
- In the event that the campus exits SIP status on appeal in December 2011, the campus must continue to allow students who have taken advantage of the school choice provision under SIP to continue to attend the school of choice through the highest grade level offered at the school of choice. Whether or not to continue to provide transportation through the end of the 2011-12 school year is at the discretion of the regular school district.

### **Supplemental Educational Services (SES) – Stages 2--5**

- The campus is required, as notified by the agency, to notify parents of eligible students of their option for Supplemental Educational Services (SES) by August 22, 2011.
- The campus must offer parents a minimum of 60 calendar days in which to select SES for their eligible student.
- The regular or charter school district must process all requests for SES and be prepared to begin services within thirty days for those campuses expecting to remain in school improvement status.
- Campuses that were in Stage 1 in 2010-2011, and advance to Stage 2 when the preliminary AYP results are released in August 2011 must send the SES parent notification packets out by August 22, 2011.
- If the campus remains in the current stage of improvement or advances to the next stage of school improvement on August 4, 2011, the regular or charter school district and campus must begin SES services immediately.
- In the event that the campus exits SIP status on appeal in December 2011, the campus must notify parents and providers that the campus has exited school improvement status and SES services are no longer available.

### **Related Issues for SIP Identified Districts and Campuses**

#### **District and Campus Identification Numbers**

TEA policy requires school districts and charters to request campus number changes of existing campuses by October 1 to ensure time for processing before the PEIMS fall snapshot date in late October. Changes for a subsequent school year will not be processed before November 1, however, this policy does not apply to new active campuses opening mid-year or to campuses under construction. See Chapter 16 of the 2011 State Accountability Manual at <http://www.tea.state.tx.us/perfreport/account/2011/manual/index.html> for more information.

In certain circumstances, school districts and charters must receive TEA approval to change the campus number of a campus with a state accountability rating of *Academically Unacceptable*. For these campuses, the ratings history may be linked across campus numbers for purposes of determining consecutive years of *Academically Unacceptable* ratings. If the new campus number is determined by TEA to include linking of the accountability history results, the accountability histories of both the state accountability rating and the SIP status will be linked across campus numbers. Data for districts and campuses in these circumstances will not be linked. The data reported in the AYP data table in the previous year will not be linked or compared to the current year data. This includes PEIMS data, assessment data, and AYP indicators that draw on those data. Campuses with new numbers cannot take advantage of Required Improvement/Safe Harbor provisions of AYP in order to meet AYP the first year under a new number.

#### **School Transfers**

If an eligible student exercises the option to transfer to another public school campus, the school district must permit the student to

remain in that campus until he or she has completed the highest grade in the campus. However, the district is no longer obligated to provide transportation for the student after the end of the school year in which the student's campus of origin is no longer identified for school improvement, corrective action, or restructuring.

In addition, there is no requirement for students who change campuses to remain in their new campus through the highest grade of the school. To the extent feasible, those students should have the opportunity to return to the original campus if their parents decide that would be in their educational interest.

### **Waivers for the First Day of Instruction**

As required by state legislation, school districts are not allowed to begin instruction for the school year before the fourth Monday in August unless the district operates a year-round school system. For the 2011-12 school year, the effect of this statute is that districts may not begin instruction prior to August 22, 2011. School districts requests for waivers to the first day of instruction are not allowed.

School districts will be responsible for notification to parents about school choice options after the annual AYP results are available.

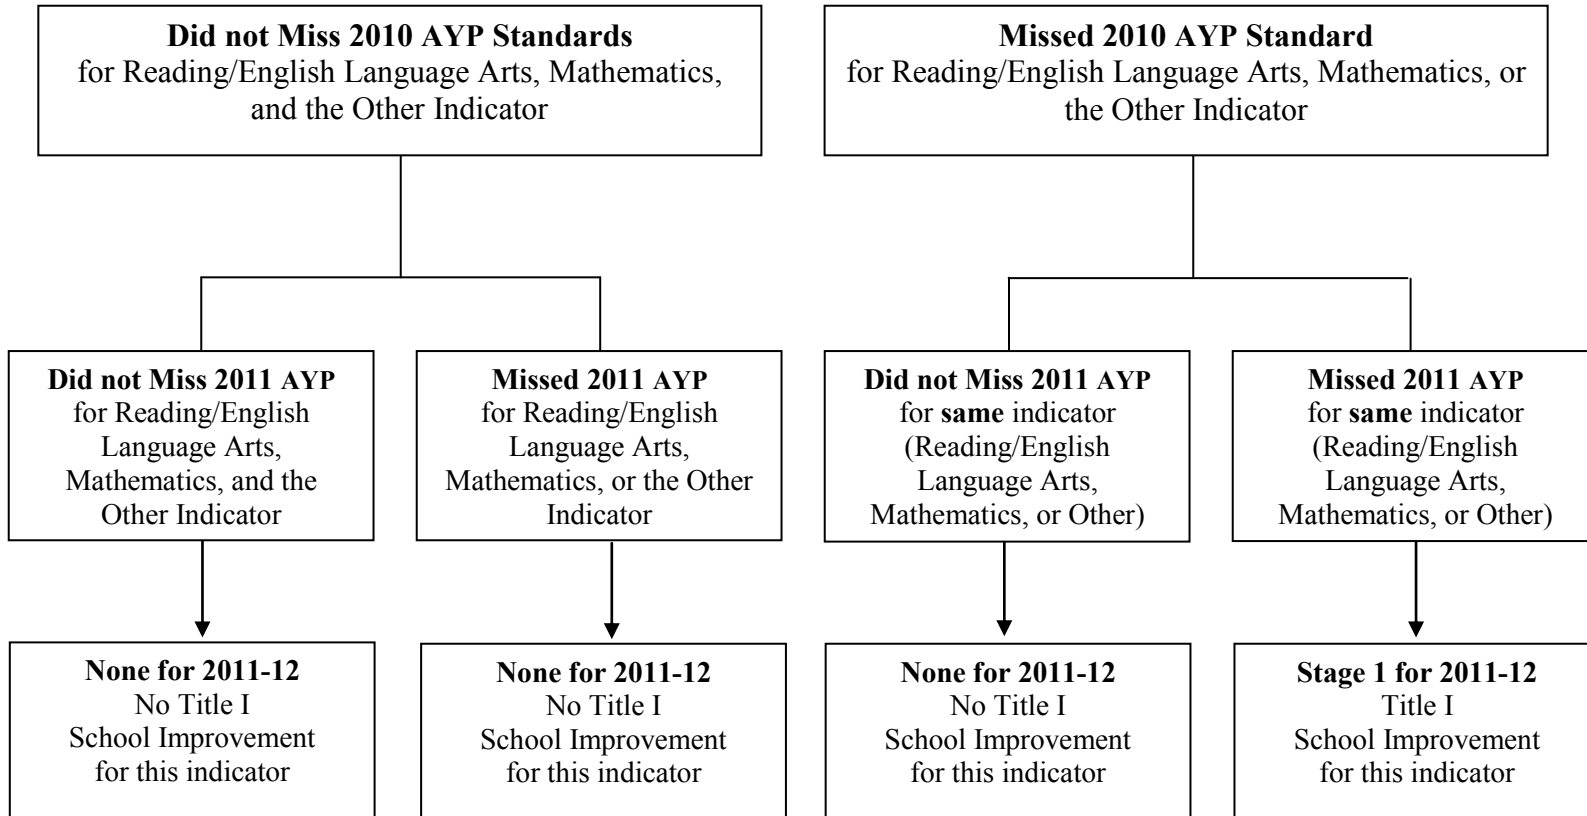

### **Title I School Improvement Stages**

Title I districts and campuses must implement certain requirements after not meeting AYP for two or more consecutive years, based on the number of years the campus or district does not make AYP. Non-Title I schools that do not make AYP for two consecutive years will be required to amend their school improvement plan to address the deficit areas. However, non-Title I campuses and school districts will not necessarily be subject to other school improvement activities, supplemental services, and corrective actions.

The following six decision trees show how the guidelines are applied to Title I districts and campuses to determine the stage of School Improvement for the 2011-12 school year. Note that the decision trees consider only one indicator at a time. If a campus or district is in School Improvement for multiple indicators, School Improvement Status can be determined by applying the decision trees for each indicator to determine the campus's or district's stage of School Improvement on that indicator. The highest resulting stage will be the stage of Title I School Improvement assigned to the campus or district. For example, if a campus determines that it is in Stage 1 for Reading/English Language Arts, Stage 2 for Mathematics, and Stage 3 for the Other Indicator, the campus is considered to be in Stage 3 of Title I School Improvement.

## Appendix C: Sample AYP Products

---

The following sample 2011 AYP data table illustrates the AYP products provided to school districts. See *Section III*, for more information about each measure. The final AYP products may include minor modifications that are not shown in this section.

This appendix has been updated to include the following information:

AYP Unmasked Data Table .....	Page 106
AYP Source Data Table .....	Page 117
Sample District and Federal Cap Calculation .....	Page 120
AYP Student Data Listings and Student Categories .....	Page 121

### **AYP Unmasked Data Table**

TEA will provide preliminary 2011 AYP confidential unmasked data tables to school districts via TEASE on July 27, 2011, that *will not include the preliminary AYP and SIP status labels*. The AYP Explanation Table will be included on these tables. On August 3, 2011, the TEASE website will be updated to include the preliminary AYP and SIP status labels. On August 4, the TEA public website will provide public, masked, AYP data tables and all status labels.

Each data table includes the 2011 AYP Status and reasons for missing AYP for each of the following 29 measures.

Seven Reading Performance Measures:

All Students  
African American  
Hispanic  
White  
Economically Disadvantaged  
Special Education  
Limited English Proficient

Seven Reading Participation Measures:

All Students  
African American  
Hispanic  
White  
Economically Disadvantaged  
Special Education  
Limited English Proficient

Seven Mathematics Performance Measures:

All Students  
African American  
Hispanic  
White  
Economically Disadvantaged  
Special Education  
Limited English Proficient

Seven Mathematics Participation Measures:

All Students  
African American  
Hispanic  
White  
Economically Disadvantaged  
Special Education  
Limited English Proficient

One Other Indicator (Graduation Rate or Attendance Rate) Measure:

All Students

Preliminary AYP Status is provided on August 4, 2011.

Other: Graduation Rate	+						
Other: Attendance Rate	-						

- + Meets AYP
- Not Evaluated for AYP due to not meeting minimum size criteria or the measure is not applicable
- % Missed AYP for this performance measure due to 2% and/or the 1% federal caps
- X Missed AYP for this measure

## Performance: Reading/English Language Arts and Mathematics

*LEP (Measure):* Includes students tested in 2010-11 with assessment documents coded as 1) a currently identified LEP student, or 2) a monitored LEP student.

*LEP (Students):* Used to determine minimum size – includes only students tested in 2010-11 coded as currently identified LEP students.

The number *Met Standard*, *Number Tested*, and *Percent Met Standard* for Reading/ELA and Mathematics: Results are summed across Grades 3-8 and 10 for the grades tested at the campus or district and provided for 2010-11 and 2009-10.

*Met Standard:* This value is the numerator used to calculate the % Met standard. It is derived from the number of proficient students after the 1% and 2% federal caps are applied.

*Student Group:* The percent of total represented by each group is provided to assist in determining if minimum size has been met. The calculation is based on the denominator for the rate (except for LEP).

	All Students	African American	Hispanic	White	Econ. Disadv.	Special Education	LEP (Measure: Current & Monitored)	LEP (Students)
<b>Performance: Reading/English Language Arts (ELA) (AYP Target: 80%)</b>								
<b>AYP Proficiency Rate</b>								
<b>2010-11 Assessments</b>

% Met Standard	78%	83%	71%	85%	45%	24%	63%	n/a
Change in % Met Standard	5	-5	11	-1	5	-18	10	
Improvement Required					6			

*Change in % Met Standard:* the difference between the rates for the two years shown on the data tables. These calculations are used to determine if the district or campus met performance improvement in Reading/ELA and Mathematics from 2010 to 2011, or when shown on other pages, if the campus met the improvement requirement on the Attendance Rate or Graduation Rate from 2009 to 2010.

*Improvement Required:* If any student group (or all students) meets minimum size but does not meet the performance standard, the improvement required to meet AYP through safe harbor is shown. This information is not calculated for the Attendance Indicator because required improvement is always 0.1 percentage points.

## Participation: Reading/English Language Arts and Mathematics

The *Number Participating*, *Total Students*, and *Participation Rate* for Reading/ELA and Mathematics: Results are summed across Grades 3-8 and 10 for the grades tested at the campus or district and are provided for 2010-11 and 2009-10.

*Total Students* under All Students is the number used as the basis for calculating the 1% and 2% federal cap.

	All Students	African American	Hispanic	White	Econ. Disadv.	Special Education	LEP (Measure)	LEP (Students)
<b>Participation: Reading/English Language Arts (AYP Target: 95%)</b>

<b>Average Two-Year Participation Rate</b>								
				95%	93%			

**Total Students:**  
Total students enrolled on the day of testing are shown here and are used to calculate the participation rate.

**Number Participating:** Total test participants is the numerator used to calculate the participation rate.

**Average Two-Year Participation Rate:** If any student group (or all students) meets minimum size but does not meet the participation standard, average participation rate across two years is calculated.

**Other Measure:** Only one other measure is used in the AYP calculation for each district and campus—Attendance Rate or Graduation Rate. This block of the data table shows the data used for calculation of the applicable measure.

*Graduation Rate:* The *Graduates* (numerator), *Number in Class* (denominator), and calculated *Graduation Rate* are provided for the four-year rates for the Class of 2010 and Class of 2009, and the five-year rate for the Class of 2009.

*Attendance Rate* (not shown on example): The *Days Present* (numerator), *Days Membership* (denominator), and calculated *Attendance Rate* are provided for 2009-10 and 2008-09.

	All Students	African American	Hispanic	White	Econ. Disadv.	Special Education	LEP (Measure: Ever HS)	LEP (Students)

Graduation Rate	78.9%	75.0%	61.4%	81.8%	74.3%	80.6%	80.0%	55.6%
Change 2009 to 2010	-6.2	-1.7	-19.0	-5.5	-7.6	-5.0	-13.3	
Safe Harbor Target	1.1			0.8	1.6			
<b>Five-Year Longitudinal Cohort (AYP Target: 80%)</b>								
<b>Class of 2009 Five-Year Graduation Rate</b>								
Graduates	252	11	22	219	110	36		
Number in Class	314	15	27	272	139	42		
Graduation Rate	80.3%	73.3%	81.5%	80.5%	79.1%	85.7%		

*Safe Harbor Target or Improvement of 1.0:* If the all students group (any student group for performance improvement/safe harbor) meets minimum size but does not meet the four-year target of 75%, the improvement from the prior year and the safe harbor target is shown.

**Explanation Table:** At the end of the AYP Data Table is a small explanatory table that shows AYP performance across all measures. Symbols are displayed for each measure to indicate AYP results.

**+ Met AYP on this measure:**  
This measure met the minimum size criteria **and** the AYP requirement was met.

**% Missed AYP for this performance measure due to federal caps:**  
The sole reason this measure did not meet AYP was due to the application of the federal cap.

2011 AYP Explanation Table

	All Students	African American	Hispanic	White	Econ. Disadv.	Special Education	LEP
Performance: Reading	+	-	+	+	%	-	-
Performance: Math	+	-	+	+	X	-	+
Participation: Reading	+	-	+	+	X	-	-
Participation: Math	+	-	X	+	+	-	+
Other: Graduation Rate	+						
Other: Attendance Rate	-						

- + Meets AYP
- Not Evaluated for AYP due to not meeting minimum size criteria or the measure is not applicable
- % Missed AYP for this performance measure due to the 2% and/or the 1% federal caps
- X Missed AYP for this measure

**Not Evaluated on this measure:**  
Either the measure did not meet minimum size criteria or the measure was not applicable for AYP results.

**X Missed AYP for this measure:**  
For Performance measures, an X means the measure was missed for reasons other than the federal cap. For Participation and Other measures, an X means the AYP requirement was not met.

## **Sample AYP Source Data Table**

The confidential unmasked Source Data Table shows the 2011 AYP results for a district or campus *without* the application of the 1% and 2% federal caps. For all AYP results, the number of students passing TAKS–M and TAKS–Alt combined cannot exceed 3% of the number of students enrolled in the district at the time of testing determined by the district’s participation denominator for the subject area. The AYP Data Tables report students exceeding the federal cap as non-proficient, or failers, in the subject area performance measure, regardless of actual performance.

The AYP Source Data Table is provided for information purposes to inform a district, charter, or campus of their performance without the application of the federally required 1% and 2% federal caps. All AYP processing rules are applied, including the use of students meeting the full academic year definition (accountability subset). A sample of the AYP Source Data Table is shown on the next page.

## Sample District Federal Cap Calculation

The following table illustrates the district federal cap limit for the sample shown in this appendix. In this example, Sample ISD includes only one campus shown in the AYP Unmasked Data Table. See *Appendix D* for more information on How to Calculate the 1% and 2% Federal Cap Limit.

Page 3 of 5

TEXAS EDUCATION AGENCY  
Adequate Yearly Progress District Data Table  
Preliminary 2011 AYP Results

Participation: Reading/Language Arts

2010-11 Assessments  
Number Participating  
Total Students      371

Student Group %

2009-10 Assessments  
Number Participating  
Total Students  
Participation Rate

Average Two-Year  
Participation Rate

Participation: Mathematics

2010-11 Assessments  
Number Participating  
Total Students  
Participation Rate  
Student Group %

The 3% Federal Cap for Reading/English Language Arts for this district is:  
 $2\% \times 371 = 7.42$ , the federal cap is rounded up to 8  
 $1\% \times 371 = 3.71$ , the federal cap is rounded up to 4  
 3% cap =  $8 + 4 = 12$

District assessment proficiency rate for Reading/English Language Arts is  $271/316 = 86\%$

District AYP Proficiency Rate for Reading/English Language Arts is  $261/316 = 83\%$

Assessments (met passing standard)	Total Students	Number Tested	Met Standard	AYP Calculation

## **AYP Student Data Listings and Student Categories**

Lists of student information are available to school districts that show how all students were used in the AYP results. As in previous years, student data is provided for Reading/English Language Arts and Mathematics with separate lists for students included in the campus calculation or the district calculation. School districts may also download the student lists as a data file. Additional information is included as columns on the listing to help districts and campuses identify each student. The column headings listed below are shown in the order in which they may appear on the student lists, however, this information may differ slightly from the actual student listings released to school districts in July 2011.

**Econ Disadv:** whether the student belongs to the Economically Disadvantaged student group

**LEP Measure:** whether the student was identified as LEP in the current year or either of the previous two years (appears in LEP Measure column of AYP data table for the Performance and Participation indicators)

**LEP Current Year:** whether the student was identified as LEP in the current year (appears in LEP Students column of AYP data table for the Performance and Participation indicators)

**Special Ed:** whether the student participates in a Special Education program

**Grade:** student's enrolled grade level

**Score Code:** indicates whether a student's test should be scored

**Assessment:** identifies the type of assessment taken by the student

**Title I Program:** whether the student currently participates in a Title I, Part A program

**Years In U.S. School:** (current-year LEP students only) how many years the student has been in U.S. schools

**Mobile:** whether the student was mobile and therefore not included in the performance calculation

**FRE Provision Redistributed Student:** indicates whether the student was selected due to the Federal Race/Ethnicity Provision; the redistributed student group is shown.

### **AYP Student Listing Categories**

Also included in each of the student data listings is a student category field, or Status value, that indicates how a student was counted in the AYP results:

EXCEEDED 1% CAP – MET STANDARD: Tested on TAKS–Alt, Met the passing standard, Not selected for the federal cap, Participant Counted as Not Proficient due to Federal Cap

EXCEEDED 2% CAP – MET STANDARD: Tested on TAKS–M or LAT TAKS–M, Met the passing standard, Not selected for the federal cap, Participant Counted as Not Proficient due to Federal Cap

NON-PROFICIENT: Participant Counted as Not Proficient, Did Not Meet Standard on Test

PROFICIENT-MET STANDARD: Participant Counted as Proficient, Met Standard on Test

PARTICIPANT: Participant Only, Not included in Performance

NON-PARTICIPANT: Absent, Not Counted as a Participant

A sample of the student data listings is shown on the following page.

## Appendix D: Calculating 2011 AYP Results for Sample School

---

Following is a step-by-step description of the 2011 AYP Status calculation for Sample School. This example illustrates a hypothetical Title I campus receiving a preliminary 2011 AYP Status of *Missed AYP* whose sample data table is shown in *Appendix C*. The sample has been designed to maximize illustration of the information that can be provided on the data table and the types of calculations that will be performed before the preliminary release. The samples described in this section include:

AYP Data Table Results . . . . .	Page 124
AYP Explanation Table . . . . .	Page 132
Reconciling Student Level Data . . . . .	Page 133
How to Calculate the 1% and 2% Federal Cap Limit. . . . .	Page 136

### AYP Data Table Results

The 2011 AYP Data Table provides results for the following indicators. Please refer to the Sample AYP Unmasked Data Table shown in *Appendix C*.

<u>Reading/English Language Arts</u>	<u>Mathematics</u>
<b>Performance</b>	<b>Performance</b>
AYP Proficiency Rate . . . . . Steps 1 – 7	AYP Proficiency Rate . . . . . Steps 9 – 15
Performance Improvement/Safe Harbor . . . . . Step 8	Performance Improvement/Safe Harbor . . . . . Steps 16 – 17
<b>Participation</b> . . . . . Steps 18 – 26	<b>Participation</b> . . . . . Steps 27 – 34
<b>Other Indicator</b> . . . . . Steps 35	

## **Performance: Reading/English Language Arts**

### ***AYP Proficiency Rate***

**All Students:** Sample School tested 316 total students (students enrolled on the campus for the full academic year) in Reading/English Language Arts. Therefore, no special conditions for small campuses apply.

Step 1. All Students: 83% *Met Standard* exceeds the 80% performance standard

**Student Groups:** Performance minimum size requirements for the student groups is 50 students **and** the student group must also represent at least 10 percent of all students; ***or*** the student group is at least 200 students.

Step 2. African American: not evaluated (only 23 students tested)

Step 3. Hispanic: 82% *Met Standard* exceeds the 80% performance standard  
There are 73 students who represent 23 percent of students tested, therefore minimum size criteria is met.

Step 4. White: 84% *Met Standard* exceeds the 80% performance standard  
There are 198 students who represent 63 percent of students tested, therefore minimum size criteria is met.

Step 5. Economically Disadvantaged: 50% *Met Standard* does not meet the 80% performance standard – go to the improvement calculation in Step 8.  
There are 107 students who represent 34 percent of students tested, therefore minimum size criteria is met.

Step 6. Special Education: not evaluated (only 16 students tested)

Step 7. LEP: not evaluated (only 35 students tested)  
(Although there were only 35 LEP students tested in 2010–11, there were 56 students identified in the LEP performance measure. See *Section III* for more information.)

### ***Performance Improvement/Safe Harbor***

Improvement is calculated for any student group (or all students) that does not meet the performance standard for Reading/English Language Arts or Mathematics. The Economically Disadvantaged student group did not meet the Reading/English Language Arts performance standard. If this student group met performance improvement/safe harbor for the respective measures, they will be considered to have met the AYP performance standard. To meet performance improvement/safe harbor, students must show: 1) a 10 percent decrease from the prior year in the percent of students not passing the subject area test **and** 2) meet the absolute standard **or** meet improvement criteria on the Graduation Rate, if minimum size requirements on the Graduation Rate are met for the current year.

#### **Calculating Improvement Required for Reading/English Language Arts**

Step 8. Reading/English Language Arts performance requirement for Economically Disadvantaged student group

(1) *a 10 percent decrease from the prior year in the percent of students not passing the subject area test*

Based on Reading/English Language Arts Economically Disadvantaged students, performance improvement is determined by:  
100% - 45% Met Standard in 2009-10 = 55% of students not passing the Reading/English Language Arts test in 2009-10

55% x 10% decrease = 5.5% (this rounds up to 6%, see *Section III* for rounding rules) decrease in students not passing **or** 6% increase in students Met Standard is required

Note: This calculation is the equivalent of improvement required to reach a standard of 100% in ten years.

100% - 45% Met Standard in 2009-10 = 55% improvement required to reach a standard of 100%

55% divided by 10 years = 5.5% (rounds up to 6%) improvement required over a one year period **or** 6% increase in students Met Standard is required

For the Sample School Reading/English Language Arts performance results for the Economically Disadvantaged student group, 50% Met Standard in 2010-11 **minus** 45% in 2009-10 = 5% increase, which does not meet the 6% improvement required;

***and***

(2) meet the Graduation Rate criteria *if minimum size requirements on the Graduation Rate are met for the current year alone.*

Graduation Rate minimum size requirements for the student groups in the current year of 50 students, **and** the student group must also represent at least 10 percent of all students; **or** the student group is at least 200 students. This school must then meet the 2011 AYP Graduation Rate criteria (see step 37, other indicator, for more information).

However, due to lack of required improvement, the Reading/English Language Arts performance requirement for Economically Disadvantaged students is not met.

The Reading/English Language Arts Performance requirement is not met due to the Economically Disadvantaged student group.

## **Performance: Mathematics**

### ***AYP Proficiency Rate***

**All Students:** Sample School tested 318 total students (students enrolled on the campus for the full academic year) in Mathematics. Therefore, no special conditions for small campuses apply.

Step 9. All Students: 88% *Met Standard* exceeds the 75% performance standard

**Student Groups:** Performance minimum size requirements for the student groups is 50 students **and** the student group must also represent at least 10 percent of all students; **or** the student group is at least 200 students.

Step 10. African American: not evaluated (only 23 students tested)

Step 11. Hispanic: 77% *Met Standard* exceeds the 75% performance standard  
There are 74 students who represent 23 percent of students tested, therefore minimum size criteria is met.

Step 12. White: 86% *Met Standard* exceeds the 75% performance standard  
There are 198 students who represent 62 percent of students tested, therefore minimum size criteria is met.

Step 13. Economically Disadvantaged: 52% *Met Standard* does not meet the 75% performance standard - go to performance improvement/safe harbor calculation in Step 16  
There are 112 students who represent 35 percent of students tested, therefore minimum size criteria is met.

Step 14. Special Education: not evaluated (only 20 students tested)

Step 15. LEP: 47% *Met Standard* - does not meet the 75% performance standard - go to performance improvement/safe harbor calculation in Step 17

There are 50 LEP students who represent 16 percent of students tested in 2010-11, therefore minimum size criteria is met. The percent *Met Standard* is based on the performance results of 53 students identified in the LEP performance measure. (See *Section III* for more information.)

### ***Performance Improvement/Safe Harbor***

Step 16. The Economically Disadvantaged student group in Sample School did not meet the Mathematics performance standard.

Improvement Required:

100% - 48% *Met Standard* in 2009-10 = 52% improvement required to reach a standard of 100%

52% divided by 10 years = 5% improvement required over a one year period or 5% increase in students *Met Standard* is required

For the Sample School Mathematics performance results for the Economically Disadvantaged student group, 52% *Met Standard* in 2010-11 *minus* 48% in 2009-10 = 4% increase, which does not meet the 5% gain required

However, regardless of the outcome of the other measure, the Mathematics performance requirement for Economically Disadvantaged students is not met due to lack of required improvement.

Step 17. The LEP student group in Sample School did not meet the **Mathematics** performance standard.

Improvement Required:

100% - 40% *Met Standard* in 2009-10 = 60% improvement required to reach a standard of 100%

60% divided by 10 years = 6% improvement required over a one year period **or** 6% increase in students *Met Standard* is required

For the Sample School Mathematics performance results for the LEP student group, 47% *Met Standard* in 2010-11 **minus** 40% in 2009-10 = 7% increase, which meets the 6% gain required;

**and**

Graduation Rate minimum size requirements for student groups in current year of 50 students and the student group represents at least 10 percent of all students are not met. Minimum size criteria for the graduation rate LEP student group is based on the number of students identified as LEP in the four-year longitudinal graduation/completion total in class for the class of 2010. The Class of 2010 four-year longitudinal cohort Number in Class of 13 students does not meet the minimum size requirement – meeting the Graduation Rate criteria is not required.

The Mathematics performance requirement for LEP students is met.

### **Participation: Reading/English Language Arts**

**All Students:** All Students participation rate is evaluated if at least 40 students are enrolled on the day of testing.

Step 18. All Students: 96% participation – exceeds the 95% participation standard  
There are 371 students enrolled on the test date; minimum size criteria are met.

**Student Groups:** Participation minimum size requirements for the student groups is 50 students, **and** the student group must also represent at least 10 percent of all students; **or** the student group is at least 200 students.

Step 19. African American: not evaluated (only 30 students enrolled on the test date)

Step 20. Hispanic: 96% participation – exceeds 95% participation standard  
There are 97 students who represent 26 percent of students enrolled on the test date, therefore minimum size criteria is met.

Step 21. White: 94% participation – does not meet 95% standard – use the average participation rate (below).  
There are 220 students enrolled on the test date, which is greater than the 200 student minimum size requirement.

Step 22. White Average Two-Year Participation Rate: 95% participation – meets the 95% participation standard.

The total number participating for 2010-11 is 207, and for 2009-10, 215. The total participants for both years is 422. The total number of students for 2010-11 of 220, combined with the total for 2009-10 of 224 is 444. The average participation rate is  $422 / 444 = 95\%$ .

Step 23. Economically Disadvantaged: 94% participation – does not meet 95% standard – use the average participation rate. There are 121 students who represent 33 percent of students enrolled on the test date; minimum size criteria are met.

Step 24. Economically Disadvantaged Average Two-Year Participation Rate: 93% participation – does not meet 95% participation standard

The total number participating for 2010-11 and 2009-10 is  $114 + 98 = 212$ . The total number of students for 2010-11 and 2009-10 is  $121 + 108 = 229$ . The average participation rate is  $212 / 229 = 93\%$ .

Step 25. Special Education: not evaluated (only 39 students enrolled on the test date)

Step 26. LEP: not evaluated (only 47 students enrolled on the test date)

### **Participation: Mathematics**

**All Students:** All Students participation rate is evaluated if at least 40 students are enrolled on the day of testing.

Step 27. All Students: 95% participation – meets the 95% participation standard  
There are 370 students enrolled on the test date.

**Student Groups:** Participation minimum size requirements for the student groups is 50 students, **and** the student group must also represent at least 10 percent of all students; or the student group is at least 200 students.

Step 28. African American: not evaluated (only 26 students enrolled on the test date)

Step 29. Hispanic: 90% participation – does not meet 95% participation standard – use the average two-year participation rate. There are 100 students who represent 27 percent of students enrolled on the test date.

Step 30. Hispanic Average Two-Year Participation Rate: 91% participation – does not meet 95% participation standard  
The average participation rate is the total number participating for 2010-11 and 2009-10 ( $90 + 90 = 180$ ) divided by the total number of students for 2010-11 and 2009-10 ( $100 + 98 = 198$ ), or 91%.

- Step 31. White: 96% participation – exceeds 95% participation standard  
There are 215 students enrolled on the test date, which is greater than the 200 student minimum size requirement.
- Step 32. Economically Disadvantaged: 95% participation – meets the 95% participation standard  
There are 123 students who represent 33 percent of students enrolled on the test date.
- Step 33. Special Education: not evaluated (only 39 students enrolled on the test date)
- Step 34. LEP: 95% participation – meets the 95% participation standard  
There are 58 students who represent 16 percent of students enrolled on the test date.

### **Other Indicator**

Graduation Rate is the Other Indicator for Sample School. All Students Graduation Rate is evaluated if the Number in Class is at least 40 students. The 2011 AYP Graduation Rate goal and alternative targets are evaluated when the minimum size criteria are met.

- Step 35. Evaluate the 2011 AYP Graduation Rate criteria.  
All Students: there are 326 students in the total Number in Class which meets the minimum size criteria. The graduation rate criteria are evaluated including the goal, targets, and each alternative.

#### *Four-year Longitudinal Graduation Rates*

*(1) Graduation Rate Statewide Goal of 90%*

The Class of 2010 four-year Graduation Rate of 72.7% does not meet the goal.

*(2) 2011 Annual Graduation Rate Target of 75%*

Since the goal was not met, the annual target is measured. The Class of 2010 four-year Graduation Rate of 72.7% does not meet the annual target.

#### *Graduation Rate Alternative Targets:*

*(3) Safe Harbor Target defined as a 10% decrease in difference between the prior year rate and the Goal*

Since the annual target was not met, the safe harbor target is measured. The safe harbor target is determined by

the goal 90.0% - 78.9% the Class of 2009 four-year Graduation Rate = 11.1% difference,

11.1% x 10% decrease = 1.1% safe harbor target required.

The 72.7% Class of 2010 Graduation Rate *minus* the 78.9% Class of 2009 four-year Graduation Rate = - 6.2 improvement, which does not meet the safe harbor target.

(4) *Improvement Target of 1.0 percent increase from the prior year*

Since the safe harbor target was not met, the improvement is measured. 72.7% Graduation Rate minus the Class of 2009 four-year Graduation Rate 78.9% = - 6.2 improvement shown. This does not meet the 1.0% improvement requirement.

*Five-year longitudinal Graduation Rate Target of 80% s*

The final alternative is the five-year graduation rate. The Class of 2009 five-year Graduation Rate of 80.3% meets the five-year annual target.

The Other Indicator requirement is met.

### **AYP Explanation Table**

Sample School does not meet the AYP requirement in four measures:

- Reading/English Language Arts performance requirement due to the economically disadvantaged student group (Step 8 of this example), the explanation table shows that this student group did not meet the standard because of the federal cap. The symbol “%” appears in the appropriate column.
- Mathematics performance requirement due to the economically disadvantaged student group (Step 16 of this example), the explanation table shows that this measure missed AYP. The symbol “X” appears in the appropriate column for this measure.
- Reading/English Language Arts participation requirement due to the economically disadvantaged student group (Steps 23 and 24 of this example), the symbol “X” appears in the explanation table for this measure.
- Mathematics participation requirement due to the Hispanic student group (Steps 29 and 30 of this example), the symbol “X” appears in the explanation table for this measure.

The campus will receive a 2011 AYP Status of *Missed AYP*.

## **Performance Measure failure due to the Federal Cap**

The symbol “%” in the explanation table for the economically disadvantaged student group indicates that without the application of the 1% and 2% federal caps, this student group would have met the AYP performance requirement. Page 1 of the 2011 AYP Source Data Table (see page 118) indicates that the economically disadvantaged student group would have met the performance improvement/safe harbor calculation had the federal cap not been applied.

## **Reconciling Student Level Data**

Since 2004, school districts have received AYP student listings in order to identify how students were processed for the AYP campus or district results and to identify the number of students who exceed the cap.

Refer to the sample AYP Unmasked Data Table and sample AYP Source Data Table. The AYP Explanation Table shown on page 112 indicates that the same four AYP measures were not met as described above.

## **Reading/English Language Arts Performance**

The AYP Data Table categories are shown on the student data listing and may be reconciled or matched to the data table total for each district and campus. The following steps help describe how the AYP Reading/English Language Arts student listings match the AYP data table for the sample school shown in *Appendix C*.

### **AYP Student List, Total Students “TOTAL =”**

Step 1. Page 3 of the 2011 AYP Unmasked Data Table (see page 110).

#### **Participation: Reading/English Language Arts 2010-11 Assessments**

All Students group, number of *Total Students*: 371

Step 2. 2011 AYP Student Data Listings for subject: **Reading/English Language Arts** (see page 123). Begin at the bottom of the listing.

Total = 371

### **AYP Student List category labeled “NON-PARTICIPANT”**

Step 1. Page 3 of the 2011 AYP Unmasked Data Table

All Students group, number of *Total Students*: 371

All Students group, total *Number Participating*: 357

Difference in the numerator:  $371 - 357 = 14$

Step 2. 2011 AYP Student Data Listings for the same subject.

The AYP Student Listing category labeled “NON-PARTICIPANT” shows 14 students. These were not included in the *Number Participating*.

Step 3. The 2011 AYP Unmasked Data Table, **Explanation Table** (see page 112) that indicates the economically disadvantaged student group *Missed AYP* due to the Participation rate.

Page 3 of the 2011 AYP Unmasked Data Table shows (see page 110.)

Economically disadvantaged student group, *Number Participating*: 114

Economically disadvantaged student group, *Total Students*: 121

Difference in the numerator:  $121 - 114 = 7$

Step 4. 2011 AYP Student Data Listings for the same subject.

The AYP Student Listing category labeled “NON-PARTICIPANT” shows 14 students. Seven of the students shown (not shown in the example student listing) will indicate they are included in the economically disadvantaged student group.

### **AYP Student List category labeled “PARTICIPANT”**

Step 1. Page 3 of the 2011 AYP Unmasked Data Table  
All Students group, total *Number Participating*: 357

Step 2. Page 1 of the 2011 AYP Unmasked Data Table (see page 108.)

**Performance: Reading/English Language Arts**  
2010-11 Assessments

All Students group, total *Number Tested*: 316  
Difference:  $357 - 316 = 41$

Step 3. 2011 AYP Student Data Listings for the same subject

The AYP Student Listing category labeled “PARTICIPANT” shows 41 students. These were not included in the performance measure, *Number Tested*.

**AYP Student List category labeled “PROFICIENT-MET STANDARD”**

Step 1. Page 1 of the 2011 AYP Unmasked Data Table

All Students group, total that *Met Standard*: 261

Step 2. 2011 AYP Student Data Listings for the same subject.

The AYP Student Listing category labeled “PROFICIENT” shows 261 students. This category includes student test results that met the passing standard that were selected for inclusion in the 1% and 2% federal caps.

**AYP Student List category labels “EXCEEDED 1% CAP” and “EXCEEDED 2% CAP”**

Step 1. Page 1 of the 2011 AYP Unmasked Data Table

All Students group, total *Met Standard*: 261

Step 2. Page 1 of the 2011 AYP Source Data Table (see page 118)

**Performance: Reading/English Language Arts**  
2010-11 Assessments

All Students group, total *Met Standard*: 271

Difference:  $271 - 261 = 10$

Step 3. The 2011 AYP Unmasked Data Table, **Explanation Table** (see page 112) that indicates the economically disadvantaged student group failed to *Meet AYP* due to the federal caps.

Page 1 of the 2011 AYP Unmasked Data Table shows

Economically disadvantaged student group, number that *Met Standard*: 54

Step 4. Page 1 of the 2011 AYP Source Data Table  
Economically disadvantaged student group, number that *Met Standard*: 58

Difference:  $58 - 54 = 4$

Step 5. 2011 AYP Student Data Listings for the same subject.

The AYP Student Listing categories labeled “EXCEEDED” show a total of 10 students. Four of the students shown (not shown in the example student listing) will indicate they are included in the economically disadvantaged student group.

### **How to Calculate the 1% and 2% Federal Cap Limits**

The following steps describe the Sample District Federal Cap Calculation shown in *Appendix C* for the subject Reading/English Language Arts only. *Section III* of the AYP Guide describes the calculation for a school district’s federal cap limit.

## Reading/English Language Arts

Step 1. **AYP participation denominator:** The number of students enrolled in Sample ISD in Grades 3 – 8 and 10 on the day of testing, is reported as the AYP District Participation denominator by subject.

The third page of the 2011 AYP Unmasked Data Table (see page 110)

### **Performance: Reading/English Language Arts** 2010-11 Assessments

All Students group, number of *Total Students*: 371

Step 2. **Calculate the Cap Limits:** The federal cap limits are calculated for TAKS–M and TAKS–Alt separately.

TAKS–M 2% federal cap limit is  $371 \times .02 = 7.42$ . The percentage is rounded up to the next whole number for any decimal value, so the 2% limit is 8.

TAKS–Alt 1% federal cap limit is  $371 \times .01 = 3.71$ . The percentage is rounded up to the next whole number for any decimal value, so the 1% limit is 4.

The overall 3% federal cap on both TAKS–M and TAKS–Alt is  $8 + 4 = 12$ .

Step 3. **Identify the overall Performance results:** The sample federal cap calculation includes a table of possible assessment results submitted from Sample ISD. The sample Source data table shows

Total, *Met Standard*: 271

Total, *Number Tested*: 316

District assessment proficiency rate:  $271 / 316 = 86\%$

Step 4. **AYP Proficiency Rate:** The sample federal cap assessment table shows

Total, *AYP Calculation*: 261

Total, *Number Tested*: 316

District AYP performance rate:  $261 / 316 = 83\%$

### Identify the number of students that exceed the cap

Step 5. **TAKS–M results:** The sample federal cap assessment table on page 120 shows 9 students met the TAKS–M student passing standard, and 3 students met the LAT TAKS–M student passing standard. The federal cap determines the number of students that exceed the cap limit and reclassifies those students to non-proficient for AYP purposes.

TAKS–M, *Met Standard:* 9

LAT TAKS–M, *Met Standard:* 3

Total: 12

TAKS–M, *AYP Calculation:* 8

(The 2% federal cap limit on TAKS–M)

Number of students that exceed the 2% cap limit:  $12 - 8 = 4$

Step 6. **TAKS–Alt results:** The sample federal cap assessment table shows 10 students met the TAKS–Alt student passing standard. The number of TAKS–Alt student results that exceed the cap limit is calculated below.

TAKS–Alt, *Met Standard:* 10

TAKS–Alt, *AYP Calculation:* 4

(The 1% federal cap limit on TAKS–Alt)

Number of students that exceed the cap limit on TAKS–Alt:  $10 - 4 = 6$

Step 7. 2011 AYP Student Data Listings for the same subject.

The AYP Student Listing category labeled “EXCEEDED 1% CAP” and “EXCEEDED 2% CAP” shows a total of 10 students, which include students that were not selected for the 1% and 2% federal caps tested on either TAKS–M or TAKS–Alt. Four of the students will be displayed with a TAKS-M assessment, and six will be shown with TAKS-Alt.

## Appendix E: NCLB Report Card Preview

---

The NCLB Report Card (RC) is issued annually by states as required by federal regulation in order to report student achievement and AYP information for the state, local educational agency (school district), and school or campus. The Texas NCLB Report Card is presented in five parts and provides 1) Assessment Data, 2) Accountability Data, 3) Adequate Yearly Progress (AYP) and School Improvement Program (SIP) data, 4) Teacher Quality Data, and 5) National Assessment of Educational Progress (NAEP) information. The NCLB RC report may be accessed at <http://www.tea.state.tx.us/index4.aspx?id=2147493710>.

In January, 2012, TEA will release the 2011 NCLB Report Card (RC) including Part I: Student Achievement results. Part I contains student participation and performance data that differs substantially from AYP. NCLB RC Part I data is reported by grade, and includes percent of students by achievement level, such as Percent Not Meeting Standard (Basic), Percent Met Standard (Proficient), and Percent Commended (Advanced). In addition, Science assessment information is reported, along with twelve federally required Student Groups.

The major calculation differences between AYP and NCLB RC are outlined below:

- NCLB RC includes all students, including those that do not meet the criteria for full academic year, and
- NCLB RC does not apply the federal caps (the 1% or 2% caps), therefore students exceeding the cap in AYP are considered proficient in NCLB RC results.

In order to assist districts in understanding NCLB RC Part I data, TEA will provide a confidential unmasked NCLB RC Preview Report to school districts via TEASE in November/December, 2011. The 2011 AYP Student Data Download may be used to reconcile the results for student groups reported in AYP that are also reported in the NCLB RC results.

For more information on the NCLB RC Preview Report or the assessment results reported on the NCLB RC provided in January, 2012, contact the Division of Performance Reporting. For more information on the distribution requirements of the NCLB Report Card, please contact Division of NCLB Program Coordination at (512) 463-9374.

A sample of the NCLB RC Preview Report Card is shown below.

Graduation Rate Student Group Evaluations, 92

## I

Indicators, 20, 21, 25, 63, 64, 73, 74, 79

## J

Juvenile Justice Alternative Education Program (JJAEP), 15, 18

## L

Language Proficiency Assessment Committee (LPAC), 22, 31  
Limited English proficient (LEP), 12, 22, 31, 35, 36, 47, 49, 56, 57, 75, 125, 128,  
129, 130, 131  
LEP-Exempt, 22  
Linguistically Accommodated Testing (LAT), 12, 22, 31, 32, 39

## M

Mathematics, 11, 12, 16, 17, 20, 21, 25, 31, 36, 37, 48, 49, 50, 52, 56, 59, 60, 62, 63,  
64, 71, 75, 77, 79, 95, 126, 127, 129, 130, 132  
Minimum size requirements, 12, 16, 20, 36, 56, 58, 59, 62, 126, 127, 129  
Attendance Rate, 58  
Graduation Rate, 55  
Participation, 35  
Performance, 49

## N

New  
Campuses, 15  
District or Campus Numbers and AYP, 16  
Districts, 15  
New Features of the AYP System, 15  
No Child Left Behind Act of 2001 (NCLB), 11, 12, 13, 22, 144

Not Evaluated, 15, 18, 51, 58, 62, 64, 125, 127, 128, 129, 130, 131  
campuses that close mid-year, 15  
charter campuses with no students in Grades 3-8 and 10, 16  
JJAEP and DAEP campuses, 15  
new campuses, 15

## O

Other Circumstance Exceptions, 67  
Appeals, 14  
Other Indicator, 16, 17, 20, 23, 52, 60, 63, 64, 77, 80, 99, 131, 132  
Appeals and Safe Harbor, 73  
Attendance Rate, 57  
Graduation Rate, 52

## P

Pairing, 62  
Prekindergarten and kindergarten (PK/K) campuses, 63  
Participation  
Average participation rate, 20, 36  
calculating participation measures, 31  
student groups evaluated, 35  
Participation standard, 16, 20, 36, 60, 62, 64, 129, 130, 131  
Performance improvement, 16, 17, 20, 50, 51, 56, 57, 59, 60, 61, 62, 75, 78, 126,  
128  
calculation, 50  
Performance Measures  
calculating performance measures, 37  
count of total students tested, 37  
student groups evaluated, 47  
uniform averaging, 62  
Performance standard, 16, 17, 20, 49, 50, 61, 62, 64, 75, 77, 78, 125, 126, 127  
2002-03 to 2013-14 Annual Measurable Objectives Chart, 93  
Full Academic Year, 16, 37  
Prekindergarten and Kindergarten (PK/K) Campuses, 11, 63  
Prior Year Measures  
Attendance rate, 57  
Graduation rate, 52

## R

Reading/English Language Arts, 11, 12, 16, 17, 20, 21, 25, 31, 36, 37, 49, 50, 52,
