

State Approved Provider List

(formerly known as SAVL)

Learning Acceleration Support Opportunities (LASO)

Cycle 4 2025/2026

State Approved Provider List (SAPL)

Vision

The State Approved Provider List (SAPL) provides a pre-vetted list of organizations with requisite expertise and experience to support school systems through LASO Cycle 4 grant opportunities.

Objective

This document includes the following:

- A list of providers approved by TEA for each LASO grant
- A provider matrix for an at-a-glance view of connections across multiple programs
- An overview of provider qualifications and expertise, along with contact information for each provider

Considerations

- Inclusion in this provider guide does not guarantee contract from school systems.
- School systems must follow their local, state, or federal procurement policies and procedures regarding provider selection. **Inclusion in this list does not overrule these policies.**

Next Steps

School systems should:

- Use this guide to identify providers that best meet your school's needs.
- Review provider overlap across multiple grants to identify a small subset of providers that support multiple opportunities, aiding school systems in efficient provider management.

Guide Considerations & Navigation

School System Considerations

- The TEA encourages school systems to collaborate with a single vendor for as many opportunities as available.
 - This promotes a greater systemic coherence and minimizes redundant support efforts.
 - the TEA suggests that school systems expand the scope of their current Curriculum & Instruction vendor where possible.

Multiple Provider Engagement Guidelines

LIFT and SAF

- Providers that support both LIFT and SAF will be paid a reduced amount for overlapping services regarding HQIM support provided through the SAF grant

LIFT and BLG

- LIFT Approved Providers will have an opportunity to complete a supplemental application to provide Blended Learning. Providers must:
 - Show a track record of experience with Texas school systems for support in blended learning best practices within the past 4 years.
Note: evidence and artifacts of experience and support will be required within the application submission.
 - Show capacity to support both large and small size school systems.
 - Have previously provided comprehensive professional development that included in-person (face to face) and virtual training and/coaching support options.

**Leadership & Instructional Foundations for Texas (LIFT)
LIFT Add-On: School Improvement PLC Supports (LIFT SI PLC)
School Improvement Curriculum and Instruction Support Grant
(CISG)**

Leadership & Instructional Foundations for Texas (LIFT)

Grant Overview

(LIFT merges programs formerly known as Strong Foundations SF, Texas Instructional Leadership TIL, and Texas Lesson Study TXLS)

The LIFT grant provides a three-year program to strengthen instructional systems across school systems and campuses, building instructional capacity around Bluebonnet, in the following key areas:

- Curriculum Adoption Support: Needs assessment of current instructional materials to guide Bluebonnet curriculum adoption (Planning Phase).
- Training & Skill-Building: Professional development to build staff understanding of the curriculum, strengthen skills, and set up schoolwide systems (Planning Phase).
- Observation and Feedback Cycle Development: Support to launch and refine observation and feedback systems that improve instructional quality (Planning and Implementation Phase).
- Implementation Training: Ongoing training to ensure effective use of Bluebonnet curriculum (Implementation Phase).
- Instructional Leadership Coaching: Coaching and feedback for leaders to strengthen instructional leadership and schoolwide routines (Implementation Phase).

Evaluation Criteria

Approved Providers (APs) have been vetted for their ability to provide professional development to school system leaders, campus leaders, and teachers in the following areas:

- Establishing a clear school system-wide vision for math and RLA instruction
- Supporting the adoption and roll-out of instructional materials for both RLA and math
- Establishing school-wide culture routines as well as teacher observation and feedback systems
- Establishing instructional materials internalization and student work analysis protocols and meeting structures
- Supporting school system-wide communication and change management
- Developing school system leader and campus leader capacity to monitor data and trends and respond to manage towards strong student outcomes
- Develop school system ownership and sustainability of these systems over the course of the three years

Additional Information

School systems are required to use a minimum of **70%** of grant funds to contract with a single LIFT Approved Provider to support grant activities and may use up to **30%** of grant funds for other allowable expenses.

If also awarded a LIFT SI PLC Support grant, the school system must select the same Approved Provider for both LIFT and the SI PLC Support grants.

LIFT Add-On: School Improvement PLC Supports (LIFT SI PLC)

Grant Overview

The LIFT Add on: School Improvement PLC Support grant supports Title I, School Improvement LIFT campuses to enhance implementation support for campuses participating in the Leadership and Instructional Foundations for Texas (LIFT) program, in the following key areas:

- Additional Funding & Support: Extra funding and targeted assistance for Title I campuses in school improvement (CSI, TSI, ATSI).
- Enhanced PLC Support: Expanded PLC facilitation, coaching, and observation feedback to strengthen collaboration.
- Implementation Monitoring: Ongoing monitoring of instructional material implementation to ensure fidelity.

Evaluation Criteria

Approved Providers (APs) have been vetted for their ability to provide professional development to school system leaders, campus leaders, and teachers in the following areas:

- Establishing a clear school system-wide vision for math and RLA instruction
- Supporting the adoption and roll-out of instructional materials for both RLA and math
- Establishing school-wide culture routines as well as teacher observation and feedback systems
- Establishing instructional materials internalization and student work analysis protocols and meeting structures
- Supporting school system-wide communication and change management
- Developing school system leader and campus leader capacity to monitor data and trends and respond to manage towards strong student outcomes
- Develop school system ownership and sustainability of these systems over the course of the three years

Additional Information

School systems are required to use:

- **50%** of grant funds to contract with a single Approved Provider per instructional material from the LASO Cycle 4 Approved Provider List to support grant activities
- **50%** of grant funds for additional support from the Approved Provider and/or salaries, partial salaries, or stipends for instructional coaches or other positions directly supporting PLC facilitation and implementation of the instructional materials

The school system must select the same Approved Provider for both LIFT and the LIFT SI PLC Support grant.

School Improvement Curriculum and Instruction Support Grant (SI CISG)

Grant Overview

The School Improvement Curriculum and Instruction Support Grant (SI CISG) supports Title 1 school improvement and CSI, TSI, ATSI Designated campuses on strengthening curriculum and instruction by implementing non-Bluebonnet, high-quality instructional materials (HQIM), in the following key areas:

- SBOE HQIM Support: Technical assistance for adopting a State Board of Education (SBOE)-approved high-quality instructional material (HQIM) in eligible grade levels.
- Curriculum & Instruction Support: Technical assistance to strengthen curriculum and instruction in grade levels where an SBOE-approved HQIM list does not exist.

Evaluation Criteria

Approved Providers (APs) have been vetted for their ability to provide professional development to school system leaders, campus leaders, and teachers in the following areas:

- Establishing a clear school system-wide vision for math and RLA instruction
- Supporting the adoption and roll-out of instructional materials for both RLA and math
- Establishing school-wide culture routines as well as teacher observation and feedback systems
- Establishing instructional materials internalization and student work analysis protocols and meeting structures
- Supporting school system-wide communication and change management
- Developing school system leader and campus leader capacity to monitor data and trends and respond to manage towards strong student outcomes
- Develop school system ownership and sustainability of these systems over the course of the three years

Additional Information

100% of grant funds must be used to support the implementation of eligible HQIM. School systems are required to use a minimum of **70%** of grant funds to contract with a single Approved Provider to support grant activities, and may use up to **30%** of grant funds for other allowable expenses.

Education Service Center (ESC) Regions

All Education Service Centers are **approved to support** the following grants:

- Leadership & Instructional Foundations for Texas (LIFT)
- LIFT Add-On: School Improvement PLC Supports (LIFT SI PLC)
- School Improvement Curriculum and Instruction Support Grant (SI CISG)

About Us

Region One ESC empowers school systems to build sustainable instructional systems that improve student outcomes. Through aligned curriculum, HQIM, professional learning, and embedded coaching, we equip educators to close gaps and accelerate achievement. With proven LASO partnerships, tailored technical assistance, and ongoing progress monitoring, we foster collaboration and accountability. Region One ESC brings unmatched expertise, capacity, and a proven record of success to LASO Cycle 4, helping school systems build strong foundations that last.

Texas Strategic Staffing

About Us

Your Champion in Excellence. At Region 4, we don't just support schools, we empower them. Backed by a team of over 200 seasoned educators with experience spanning classrooms, central offices, and superintendent suites, we bring unmatched expertise to every partnership.

We know what it takes to move from vision to results, through progress management. Our strategic supports align seamlessly with your school system's action plan, ensuring that every role—from teacher to leader—shares a clear, informed understanding of HQIM implementation.

Here's what sets us apart:

- Alignment that matters: We work with you to build services and supports around your goals for HQIM implementation.
- Systems that click: Together, we design structures for lesson internalization, and effective observation and impactful feedback.
- Results that shine: Our approach ensures fidelity of implementation that leads directly to measurable student outcomes.

Region 4 is ready to walk beside you every step of the way—turning plans into action, and action into results.

About Us

Region 16 Education Service Center has eight years of experience partnering with school systems to implement the TIL framework and four years of experience supporting the adoption and implementation of HQIM, including the state’s OER and Bluebonnet Learning products. Our approach is grounded in building sustainable capacity at every system level. We have trained specialists who provide direct support to school system and campus leadership teams and specialized content-area experts who work alongside educators to ensure effective, high-fidelity implementation. This multi-tiered support model enables us to address instructional leadership practices and content-specific needs, ensuring alignment, coherence, and continuous improvement across school systems. Through this comprehensive and collaborative approach, Region 16 ESC helps school systems establish the structures, skills, and mindsets necessary to implement state initiatives with fidelity, resulting in improved teaching and learning outcomes for all students.

About Us

SustainED Leaders collaborates with leaders and teachers to strengthen their ability to lead instructional improvement in schools so that all students' learning and growth is maximized. We partner with school systems to provide high-touch, side-by-side coaching and support to leaders and teachers, helping them implement high-quality instructional materials (HQIM) that accelerate academic achievement for all students.

About Us

Teaching Lab aims to shift the paradigm of teacher professional learning (PL) to achieve educational success for all. We provide curriculum-based PL using our evidence-based Head, Heart, and Habits model. Teaching Lab partners with schools and systems to adopt high-quality curriculum, build sustainable supports for teachers and leaders, deliver initial training, and offer ongoing PL through Cycles of Inquiry and coaching that emphasize diverse learner support and learning acceleration.

The Meadows Center for Preventing Educational Risk (MCPER)

About Us

The Meadows Center for Preventing Educational Risk (MCPER) at The University of Texas at Austin is a collaboration of researchers from multiple disciplines and sites. As researchers, we ensure the school systems we support have access to the latest research in education.

We believe in the power of high-quality instructional materials and walk hand in hand with our partners to provide customized support throughout the implementation process.

About Us

UnTapped Genius is a Texas-based consulting firm that partners with school systems to adopt and implement high-quality instructional materials through in-person, campus-embedded support. We specialize in meeting school systems where they are, personalizing coaching, planning, and leadership development to align with TEKS and RBIS priorities. Our flexible, people-centered approach strengthens instructional delivery, builds educator and leader capacity, and supports the development of sustainable systems that improve teaching quality and accelerate student achievement over time.

Blended Learning Grant (BLG)

Blended Learning Grant (BLG)

Grant Overview

The Blended Learning Grant opportunity has **two distinct cohorts** and associated purposes, as described below.

The **Blended Learning Academic** cohort will support school systems and open-enrollment charter schools through a planning stage to design and subsequently implement a high-quality blended learning model in math (through Math Innovation Zones - MIZ) and reading language arts (RLA) aligned with a High-Quality Instructional Material curriculum (HQIM).

The **Blended Learning Strategic Operations** cohort will support school systems and open-enrollment charter schools in leveraging a blended learning model to make a strategic operational shift to scheduling, staffing and/or budgets. This shift will seek to make robust operational changes in order to optimize student outcomes

Evaluation Criteria

1. Alignment of supplemental product approach with High-Quality Implementation Materials (HQIM) and Research-Based Instructional Strategies (RBIS)
2. Ease of access for teachers and leaders to HQIM with supplemental product
3. Built-in progress monitoring tools to support student learning with HQIM and supplemental product usage

Additional Information

Approved Math Online Curriculum providers:

Age of Learning | Carnegie Mathia | iReady Math
| IXL Math | ST Math | Zearn

Approved RLA Online Curriculum providers:

School systems/grantees will select RLA products based on alignment to an approved rubric. Some products have already been reviewed and determined to meet all eligibility requirements including;
Amira | Boost Reading | iReady Reading | HMH Read 180 Flex | IXL Language Arts

Optional Technical Assistance Providers:

Approved list coming soon. Will update from LIFT providers that have evidence of strong blended learning support.

Required Technical Assistance Providers (Strategic Operations Cohort):

- Collegiate Edu-Nation
- Engage2Learn
- The Learning Agenda

Approach to Instructional Design

The instructional design approach for *My Math Academy* (MMA) is underpinned by a deep understanding of educational research, cognitive development, and the science of learning. This approach integrates evidence-based strategies like mastery learning and balancing conceptual and procedural understanding, with engaging digital experiences to create a learning environment that is both effective and enjoyable for children.

My Math Academy's provides a comprehensive, research-backed learning experience that addresses the individual needs of each learner, fostering both immediate academic success and long-term educational resilience.

Alignment with TEKS

My Math Academy (MMA) is meticulously designed to align with educational standards, including the Texas Essential Knowledge and Skills (TEKS).

My Math Academy (MMA) and TEKS Alignment:

Number Sense and Operations: MMA covers comprehensive skills in number sense and operations, aligning with TEKS requirements for early mathematics education. This includes understanding numbers, counting, basic operations, and the relationship between quantities.

Geometry and Measurement: MMA integrates geometry and measurement activities that align with TEKS by helping students recognize shapes and understand spatial relationships, as well as measure objects and use measurement vocabulary.

Mathematical Reasoning: The program fosters mathematical reasoning skills by encouraging students to solve problems, recognize patterns, and use mathematical language, aligning with TEKS standards for mathematical process and reasoning skills.

Product Features

My Math Academy (MMA) is designed with the foundational belief that all children can learn and succeed in mathematics. Grounded in research and driven by a commitment to effective, engaging, and adaptive learning experiences, MMA was developed to meet children at their individual learning levels and help them build a solid mathematical foundation.

Product Features

My Math Academy (MMA):

- Adaptive Learning
- Game-Based Curriculum
- Comprehensive Math Skills Coverage
- Research-Backed.
- Parent and Teacher Tools

Product Specifications

Grades

- Pre-K through 2nd Grade
- 3-5 available Back to School 24-25

Cost

- Site License (PK-5) - \$6,500 per year
- Annual Student License - \$30 per student per year

Recommended Usage

- 20-30 minutes per week/10 hours per year

Record of Success

96% of students who used MMA for more than 30 minutes per week ended the school year “On Track” on CIRCLE math assessments (Tyler ISD 2021-2022) 1st Grade Students who used MMA for at least 10 weeks and at least 30 minutes per week made significantly greater gains on the MAP Growth™ Math assessment than non-users. They were also more likely than non-users to have met or exceeded their fall to spring projected growth target (Harlingen CISD 2022-2023)

Product Embedded Professional Learning

Professional Development training can be provided both virtually and on-site. See below for a sample of the product embedded professional learning that can be provided. For a complete list, please view our PD Catalog located [here](#).

Administrator PD

Leading and Launching with Success

- Establish best practices in leading and launching a successful implementation.

Fostering A Data Driven Culture

- Prepare leaders in building a collective efficacy toward amplifying their data culture through analysis of the *My Math Academy* reporting suite.

Teacher PD

Getting Started with *My Math Academy*

- Build a foundational understanding of *My Math Academy* to launch the program within the first 30, 60, and 90 days.

Maximizing Data to Enhance Instruction

- Deepen understanding of *My Math Academy* reports and data to drive instructional decisions.

Approach to Instructional Design

Others teach what. We teach why.

The moment a student gets it, when a concept clicks into place, is one of the most rewarding experiences in education. For more than 25 years, we've been developing solutions that help students achieve more of these moments and set them up for long-term learning success.

Carnegie Learning's Texas Math Solution provides educators digital access to coherent TEKS-aligned units. Our adaptive 1:1 math platform extends the teacher's reach by mirroring a personal math coach. Teachers get real time insight, so they know exactly where each student is and where they're heading. MATHia personalizes learning and keeps students engaged with just-in-time feedback and contextual hints. MATHia assesses students as they learn, so teachers get real-time data and actionable insights.

Alignment with TEKS

- Comprehensive Teacher Implementation Guide with detailed facilitation notes
- Adapted virtual Teacher Implementation Guide
- Student Edition of lessons
- Adapted, interactive student lessons
- Adaptive MATHia software that provides individualized learning for students with Spanish sequences available
- Embedded technology-enhanced items for STAAR prep

Approach to Instructional Design

i-Ready Assessment and Personalized Instruction builds a unique lesson plan of online instruction with a personalized starting point for every student based on the iReady Assessment, lessons can also be assigned to students. Personalized Instruction, offered for students who need instruction at grade levels K–8, is aligned to the college- and career-ready standards, and TEKS and embeds engaging multimedia instruction and progress monitoring into each online lesson. Lessons provide a consistent, best-practice structure that meets learners at their level, helps them problem solve, and keeps them motivated to continue their progress. *i-Ready PI* provides digital instruction that is proven to drive gains for students and is backed by evidence for ESSA. Topics are carefully sequenced and broken down into small, constituent parts and taught individually. This process involves explanation, demonstration, and practice in a structured environment. Learn more at, [What is i-Ready](#).

Alignment with TEKS

i-Ready Personalized Instruction is completely aligned to the TEKS. i-Ready also addresses the Foundational Skills with lessons that provide explicit instruction and practice in every lesson. The systematic scope and sequence for Phonological Awareness reflects evidence that supports progression from larger to smaller units of sound. Guided by the findings of the National Reading Panel, i-Ready provides systematic, explicit Phonics instruction in a progression that builds on students’ prior learning in Phonological Awareness and addresses all 44 phonemes and their corresponding high-utility sound-spellings, syllables, and affixes. High-Frequency Words lessons use a five-part instructional routine to teach children how to recognize these essential words. See attachment to learn more.

i-Ready Personalized Instruction aligns with Amplify Texas Tier 1 curriculum as evidenced in our linked documents demonstrating sample alignments between units and skills in grades K-5. Provided the personalized nature of our program, educators and students can implement smoothly with Amplify and meet diverse educational needs in both broad and specific cases.

Approach to Instructional Design

IXL is an end-to-end teaching and learning solution that includes:

- A comprehensive K-12 curriculum and personalized guidance;
- Instructional resources and classroom engagement tools;
- A first-of-its-kind assessment suite; and
- Actionable analytics for your school system, schools, classrooms, and individual learners.
- Additionally, we offer school system partnership, professional learning, and implementation services.

All integrated into a single platform, each component is designed to work together seamlessly to give educators the tools and insights they need to maximize learning for every single student.

Alignment with TEKS

IXL's adaptive PK-12 curriculum is composed of over 5,200 math skills comprehensively aligned to the TEKS. IXL empowers teachers to teach directly to the standards using custom-built TEKS skill plans that make lesson planning and mastery tracking seamless. IXL helps teacher plan for daily standards-based instruction with skill plans specifically designed to match the scope and sequence of the TEKS. Using skill plans teachers can readily identify IXL skills that support each standard or topic; assign skills directly from the skill plan for the whole class, groups of students, or a single student; and analyze students' progress on each assigned skill to inform instruction and remediation. Skills within IXL's TEKS skill plans are custom-created and built in standard progression to gradually and logically build student understanding and proficiency in each standard. Please see the following example: [IXL 5th Grade Math TEKS skill plan](#).

Additionally, IXL's grades 4-6 [TEKS alignment has been reviewed by Learning List](#), a research-based, independent review service. Please contact Learning List for their alignment review.

Cost

- Two years for \$22.45 per student

Recommended Usage

- Students reach proficiency in 2 skills per subject per week
- 30 minutes a week

Record of Success

Website: www.ixl.com/research

- The [IXL Effect in Texas](#) showed positive correlation between IXL usage and school performance. In particular, on the 2017 STAAR, IXL schools with at least 15 questions answered per student per week outperformed IXL schools with fewer questions answered.
- IXL published findings of a study conducted to determine IXL usage among [high school students in Texas](#) and its relation to academic performance in math, specifically the State of Texas Assessment of Academic Readiness (STAAR) in Algebra.
- A [recent Texas efficacy study](#) examined IXL usage among third- through eighth-grade students in Texas and its impact on math and ELA achievement, as measured by the STAAR.
- IXL math [Meets ESSA Tier 1 Requirements for Evidence-based Interventions](#).

Product Embedded Professional Learning

IXL Minis offers a collection of quick, easy professional learning videos to launch teachers and administrators into learning about everything that is available on IXL's platform. These engaging bite-sized videos are packed with actionable insights to inspire classroom instruction, dive into student data, and engage classrooms. IXL Minis are included with IXL site licenses at no additional cost.

IXL also offers [teacher](#) and [administrator](#) resources for effective implementation strategies, as well as an [online help center](#) with user guides and frequently asked questions.

Approach to Instructional Design

- ST Math is a visual instructional program that leverages the brain’s innate spatial-temporal reasoning ability to solve mathematical problems.
- ST Math’s unique, patented approach provides students with equitable access to learning through challenging puzzles, non-routine problem-solving, and informative feedback.
- ST Math is the **only language-independent program available**- no language barriers for EB students

Alignment with TEKS

ST Math builds deep conceptual understanding in a self-paced, mastery-based learning environment. The visual, game-based instructional approach supports Eureka Math: TEKS Edition by creating student opportunities for joyful and inspiring “Aha” moments. The grade-level journey in ST Math can be automatically aligned to the Eureka Math: TEKS Edition to ensure students are fully prepared to experience direct instruction. Teachers may also assign additional ST Math objectives for students who need intervention/enrichment content.

Product Embedded Professional Learning

We provide instructor-led workshops virtually or on-site. These workshops are hands-on, engaging, and relevant topics to immediately apply in the classroom. Coaching and consulting is offered from an ST Math expert. Educators can access professional learning through ST Math Academy, online portal hosting robust selection of on-demand, just-in-time courses educators can complete independently, at their own pace.

Approach to Instructional Design

Zearn Math helps students efficiently catch up while moving forward in their grade level learning. The materials build deep understanding and flexible problem solving skills through an emphasis on visualization, drawing to solve, and concrete representations of abstract concepts. Zearn Math’s interactive digital lessons include fluency, concept development, and application activities for every objective of elementary math. Embedded within each digital lesson is just-in-time targeted support that connects unfinished learning into the context of new learning

Alignment with TEKS

Zearn Math is designed to be used alongside daily teacher-led instruction. Zearn Math follows the instructional concepts, scope, and sequence of Eureka Math TEKS Edition. To access aligned content, students log into their personalized account where they are prompted to work on digital lessons assigned by the teacher that are directly aligned to teacher instruction with Eureka Math TEKS Edition. You can find more information in Zearn’s Eureka Math TEKS Edition Alignment Guide: https://webassets.zearn.org/Implementation/ZearnMath_TEKSAlignment.pdf.

Record of Success

Learning with Zearn Math drives student academic achievement gains, increases student engagement with math, and builds positive math mindsets. Zearn Math has received a top rating from numerous organizations, including the Louisiana DOE, the New Mexico PED, and the Utah SBE. Multiple studies have shown that students who use Zearn Math’s digital lessons see significant improvement in their academic achievement and in their mindset toward math. For more detail on these studies, please see Zearn’s Results page: <https://about.zearn.org/research>.

Product Embedded Professional Learning

To support partners in implementing Zearn Math, Zearn offers both getting started and deepening implementation training webinars, as well as partner check-ins throughout the year. Zearn also offers on-demand, unit-level Curriculum Study sessions that support teachers in planning and preparing for upcoming instruction with Eureka Math TEKS Edition by collaboratively exploring the big ideas of each unit and the variety of instructional strategies used. Finally, Zearn offers additional professional learning services through our Certified Advisor Partners.

About Us

Collegiate Edu-Nation's unwavering mission is encapsulated in the belief that ALL means ALL. We offer comprehensive capacity building support and technical assistance to students, families, schools, employees, volunteers, and consultants, spanning entire communities, with a primary focus on small & rural Texas areas. Our core objective is to break the cycle of generational poverty by empowering youth from Pre-K through postsecondary education to embark on meaningful careers. Through a systemic overhaul of traditional education systems and alignment with high-wage, high-demand careers, our P-20 System Model transforms small and rural schools and communities into centers of innovation, promising a brighter future and economic revitalization, extending far beyond the borders of Texas.

Grant-Specific Supports

Collegiate Edu-Nation (CEN) specializes in supporting small and rural school systems by redesigning campus schedules with a focus on strategic staffing to overcome the unique challenges these school systems face. Through a combination of blended learning, strategic use of master teachers, and aligned instructional resources, CEN ensures that all students benefit from high-quality instruction. CEN also provides targeted program supports, including RBIS training, schedule development, and professional development in blended learning models. CEN helps build capacity and access to critical resources, with a deep understanding of the rural landscape and the need for innovative staffing models to provide equitable access to education.

[CEN also developed the Rural P-20 Redesign Model Playbook.](#)

Strategic Operations Cohort only

About Us

At engage2learn (e2L), we're on a mission to transform public education. Since 2011, we've partnered with over 300 school systems, driving powerful, data-backed changes in professional learning that accelerate student success. Through GroweLab, we empower educators and leaders with personalized, results-driven solutions and actionable insights to create thriving school environments where every student, especially those with the greatest needs, can succeed and grow.

Grant-Specific Supports

e2L has a long-standing partnership with TEA on blended learning grants and has collaborated with several Texas school systems to support the implementation of blended learning. Our team of certified e2L coaches brings extensive experience, having led successful blended learning initiatives both in their previous school system roles and within e2L. Their expertise allows them to effectively guide school systems through the implementation process, ensuring thoughtful discussions and comprehensive support.

PREP Program Allotment: PREP Mentorship Program

PREP Mentorship Program

PREP Mentorship Program Overview

The Preparing and Retaining Educators through Partnership (PREP) Program Allotment aims to strengthen the quality of teacher recruitment, preparation, and mentorship, leading to increased educator effectiveness and retention. The Preparing and Retaining Educators Through Partnership (PREP) Mentorship Program provides school systems interested in implementing high-quality new teacher mentorship programs with funding to:

- Provide, at minimum, a \$1,000 to the mentor teacher (per beginning teacher),
- Train all required school system mentorship staff via the Texas Mentorship Training
- Provide release time for mentor teacher and beginning teacher mentoring activities.

Through PREP Mentorship Program, school systems will engage in the Texas Mentorship Training via an approved Texas Mentorship Training provider, who provides high-quality, research-based training to mentor teachers and any appropriate school system and campus employees who work with or supervise classroom teachers who have less than two years of teaching experience. The Texas Mentorship Training includes two pathways:

All Pathway 1 training will be rooted in the Texas Mentorship Training Mentoring Educator competencies, which include:

- Effective Mentoring Partnerships & Behaviors
- Co-Teaching Strategies
- The Learning Environment
- Instructional Preparation & Data-Driven Instructional Practices

All Pathway 2 design sessions will be rooted in the Texas Mentorship Training school system & Campus Leader competencies, which include:

- Vision Setting & Performance Management
- Master Schedule & Release Time
- Recruitment, Selection, & Assignment
- Program Sustainability and Scaling
- Training & On-going Support

Additional Information

All Texas Mentorship Training approved providers can be found on the Texas Mentorship Training Website beginning on 9/22: tmt.tea.texas.gov

AP Computer Science Principles (APCSP)

Description

A+ College Ready supports 40 total courses: 24 courses in grades 6-10 and 16 Advanced Placement courses. All curricular materials are housed in Canvas (<https://aplusala.instructure.com/login/canvas>), and contain various templates and strategies for support. All Advanced Placement Course materials are aligned to the College Board's AP Course Exam and Description, and all 6-10 courses (11th grade in math) are aligned to the Alabama Courses of Study.

Approach for Providing Service for Grant

AP Computer Science Principles (APCSP) is an accessible introduction to the many facets of computer science designed to develop interest and broaden participation in computer science. The AP CSP curriculum teaches students about algorithms, abstraction, data, the global impact of computing and computing systems and networks, as well as programming as a creative discipline. Students will learn to program in both a block-based language and a text-based language.

The A+ College Ready AP Computer Science Principles curriculum has continuously evolved to cater to the changing needs of computer science educators and students, emphasizing a student-centered, teacher-led approach. Incorporating resources from Code.org, CMU, and BJC into its originally developed in-state curriculum, it aims to deepen teachers' content knowledge in computer science, equipping them with the necessary skills and practice to teach at an Advanced Placement level.

Description

AI Quintessential was established in 2020 in the United Kingdom to provide technical support services covering development services, institutional building, strategy and cluster development, organization and human capital development, monitoring and evaluation, research and surveys. Additionally, AI Quintessential academy forms an integral part of the work to support the education sector with standardized curricula, content, and CPD certified professional development programs for researchers and educators worldwide.

Approach for Providing Service for Grant

AIQ is recognized by the College Board as an endorsed provider of curriculum and professional development for AP[®] Computer Science Principles (AP CSP). Using an Endorsed Provider affords schools access to resources including an AP CSP syllabus pre-approved by the College Board's AP Course audit, and officially recognized professional development that prepares teachers to teach AP CSP.

This endorsement affirms only that components of the Endorsed Provider's offerings are aligned to all the AP Curriculum Framework standards and the AP CSP assessment.

Apple: Develop in Swift

Description

Develop in Swift is a comprehensive coding offering intended for students in grades 9 and above. The curriculum prepares students for college or a career in app development using the Swift programming language, and is complemented with free online professional learning for educators. Swift is designed for Mac—which supports all major programming languages—making it the ideal device for teaching and learning code. As students move from Develop in Swift Explorations or AP® CS Principles to more advanced concepts in Fundamentals and Data Collections, they’ll explore designing and building a fully functioning app of their own—and can even earn AP® credit or an industry-recognized certification. And for out-of-school coding, the App Design Workbook, App Showcase Guide, and Swift Coding Club help students design, prototype, and celebrate their app ideas.

Approach for Providing Service for Grant

The Develop in Swift AP CS Principles curriculum helps students build a foundation in programming using Swift—a powerful and intuitive open-source programming language designed by Apple—while preparing them for the AP Computer Science Principles Exam. Students will get practical experience with the tools, techniques, and concepts needed to build an iOS app. They’ll learn about the impact of computing, privacy, and security on society, while exploring the technology behind their own activities through interactive stories. Develop in Swift AP CS Principles includes a student and teacher guide available for free on Apple Books. Downloadable Xcode and Playground project files are also available to support the curriculum activities. Register for Apple’s Develop in Swift free online professional learning. Description

The AP Computer Science Principles with Robotics course, developed by Barobo, Inc. in partnership with the C-STEM Center at the University of California, Davis, provides maximum engagement for students through its innovative blend of robotics with computer science principles and practices.

Approach for Providing Service for Grant

The course uses virtual robots and block-based programming in an online learning management system (LMS), with hardware robots being optional. As one of its salient features, the LMS incorporates the AP CSP robot, robot grid, and commands among its interface options. This feature allows students to run and experiment with code that controls the movements of the AP CSP robot, using virtual robots and/or hardware robots. Another innovative feature is the capability to create and run programs in both block code and AP CSP pseudocode. The curriculum and the professional learning for AP Computer Science Principles with Robotics are both available for free for qualified teachers.

Description

Beauty and Joy of Computing (BJC)'s AP CSP curriculum and PD were developed by the University of California, Berkeley, Education Development Center, and North Carolina State University with support from the National Science Foundation. It emphasizes the joy of creating beautiful computer programs and engages students in critical reflection on the social implications (including potential benefits and harms) of new computing technologies. The curriculum uses the visual block-based programming language Snap! and has an exploratory, hands-on approach in which students collaborate in pairs and teams on projects across a variety of contexts (games, art, mathematics, language, etc.). BJC is available free online.

Approach for Providing Service for Grant

Professional Learning: BJC professional development includes a five-day summer workshop taught both online and in person, where teachers collaboratively design and create visual, interactive Snap! programs, balanced with critical reflection on the impacts of computing. The workshop content is based on the BJC curriculum, and the training includes an introduction to the design philosophy and features of the curriculum, time for teachers to work on labs and a mini Create task, opportunities to plan instruction, and more.

Description

Formally Popfizz CS, Cobi AP Computer Science curriculum is created around Big Ideas, creating projects with Python. Students learn the foundational concepts of computing and technology and prepare for the AP Computer Science Principles exam.

Approach for Providing Service for Grant

Cobi's AP Computer Science Principles curriculum introduces foundational concepts of computing and technology with project-based learning at the core. Students learn through step-by-step tutorials, discover real-world connections, and use Python to create a series of projects ranging from a simple calculator to data visualization charts. Educators have access to professional development and instructional resources to deliver the course.

Professional Learning: Cobi Computer Science offers a comprehensive online professional development workshop with pedagogy and problem-solving at the core. Weekly check-ins, code reviews, and live support are available for successful completion of the AP CSP course. The program is offered in two formats: a 5-day synchronous program (15 hours), or a self-paced mode (30+ hours).

Description

Code.org® is an education innovation nonprofit dedicated to the vision that every student in every school has the opportunity to learn computer science as part of their core K-12 education. Code.org expands access to computer science in schools, with a focus on increasing participation by young women and students from other underrepresented groups. The leading provider of K-12 computer science curriculum in the largest school systems in the United States, Code.org also organizes the annual Hour of Code campaign, which has engaged more than 15% of all students in the world. Code.org is supported by generous donors including Microsoft, Amazon, Google and many others.

Approach for Providing Service for Grant

Code.org's AP CSP curriculum resources use an engaging, discovery-based approach to address big topics like how the internet works, big data, and programming apps in JavaScript. The curriculum consists of daily lesson plans, videos, tutorials, tools, and assessments that cover the AP CSP learning objectives. Teachers receive professional development and instructional resources to teach the curriculum.

Professional Learning: Code.org offers a five-day, in-person local workshop in the summer, followed up by 24 hours of in-person or virtual support throughout the academic year to teachers who make a one-year commitment to teach the AP CSP in an academic year. Teachers have access to a robust teacher forum moderated by experienced teachers and facilitators. Generous scholarships or discounts are available across the country.

Description

CodeCombat's AP CSP curriculum combines game-based and project-based learning experiences to build students' confidence to code. Using Python or JavaScript, students write code in browser-based games, which promote active learning and a growth mindset. With all year professional learning, teachers have access to a self-placed online professional learning course that contains 20+ hours of content and activities. Part of the course also includes one-on-one and group online consultations where they receive personalized support as they implement the curriculum.

Approach for Providing Service for Grant

Our innovative game-based learning technology has transformed the way students prepare for the AP CSP exam. Through our browser-based games, students learn about important exam topics while exercising the critical thinking skills that are necessary for success on the exam. With our curriculum, students will practice every stage of the Create Task through scaffolded and approachable capstone projects that can be adapted to a wide variety of student needs. We also provide curriculum and Kahoot! quizzes for students to practice multiple choice exam questions. For Data, Impacts of Computing, and additional Big Ideas, our turnkey lesson slides help students explore these topics through meaningful discussions and collaborative projects. Filled with real-world connections, our curriculum will allow students to fully understand how coding affects their everyday lives.

Description

With a unique focus on creative problem-solving and real-world applications, the CodeHS AP Computer Science Principles curriculum gives students the opportunity to explore important topics of computing. Students use their own ideas and creativity, build artifacts of personal value, and develop an interest in computer science that will foster further endeavors in the field. The CodeHS AP Computer Science Principles curriculum is available in Python or JavaScript.

Approach for Providing Service for Grant

CodeHS is a platform for helping high schools teach computer science. We provide a comprehensive solution to schools looking to improve or create a computer science program. We offer web-based curriculum for Introduction to Computer Science and AP Computer Science classes, tools for teachers to manage their classroom, and professional development to help teachers learn to teach coding. We are working with schools all over the world to bring in best-in-class computer science classes. Learn more or sign up at codehs.com.

CodeHS offers online professional development and in-person workshops to teachers planning to teach AP CSP. Teachers will gain the coding skills, pedagogical knowledge, resources, and confidence to lead a great AP CSP classroom with CodeHS. No programming experience is required, and the workshops take 30 hours on average to complete. Teachers will receive personalized support and feedback from the CodeHS PD team.

Description

CodeTrain is a team of Computer Science Educators committed to expanding and improving CS programs across Canada. Formed in 2018, it is led by a team based in Edmonton, Alberta with support from TakingITGlobal, the College Board and advised by teachers, NGOs and industry professionals from across Canada. Our goal is to improve student access to Computing Science in Canada through quality teacher professional development. Our resources are designed to be used by teachers in any province (or country), providing any curriculum framework.

Approach for Providing Service for Grant

CodeTrain's AP CSP curriculum is approachable for computer science teachers of all levels of experience. It is accessible and well-structured to support new computer science teachers, while including innovative and creative lessons and activities that more experienced teachers can bring to their classroom. Workshops and resources have been built upon years of experience teaching computer science in a broad range of classroom environments and include a one-year program (JavaScript) or a two-year program (Processing and Java) to deliver CSP.

Professional Learning: CodeTrain offers extensive summer sessions as well as half-day workshops throughout the school year.

Description

AP CSP is designed to attract a greater diversity of students to the computer science field, focusing on creative problem solving and real-world applications to better prepare them for college and career. Students don't need previous computer science experience to take this course. A high school algebra course like Algebra 1 is the recommended prerequisite.

Approach for Providing Service for Grant

Students use the principles that underlie the science of computing and develop the thinking skills that computer scientists use. Students work on their own and as part of a team to creatively address real-world issues using the tools and processes of computation. AP CSP gives teachers the flexibility to customize a curriculum based on the course's curriculum framework. As an alternative, a campus may choose curricula developed by College Board–endorsed providers. Endorsed providers offer a full curriculum with preapproved syllabi, lesson plans, formative assessments, and professional development.

Professional learning provided by the College Board includes AP Summer Institutes, AP Online Workshops, AP Mentoring, AP CSP Teacher Community and AP Classroom resources.

Description

In today's digital society, the need for software engineers is higher than ever. However, we have a critical shortage of trained students to fill these high-paying jobs. By introducing students to coding in middle and high school, we can encourage them to pursue a computer science degree in college. Computer Science graduates have excellent job opportunities in a future-proof career. By taking a CompuScholar course, students may find a lifelong hobby, career, and passion. CompuScholar offers online computer programming and digital literacy courses for middle school and high school students. We partner with educators and draw on real-world experience to prepare our students for the computing jobs of the future.

Approach for Providing Service for Grant

CompuScholar's Computer Science Foundations curriculum teaches all required topics for AP CSP using the popular Python language. Guidance is provided for students and teachers on preparing for the CSP end-of-course exam and completing the Create Performance Task. This online curriculum comes with complete student and teacher material, including instructional videos, lessons, quizzes and tests, homework exercises, and hands-on projects. All activities can be completed from any device in an online coding environment. The system auto-grades most student projects to minimize teacher workload. Teachers get expert technical help and one-on-one mentoring. CompuScholar supports automatic rostering and Single-Sign-On through Clever and ClassLink and can integrate course material into a school system learning management system like Canvas or Schoology.

Visit CompuScholar's [Computer Science Foundations](#) for more information and a College Board-approved syllabus.

Professional Learning: For professional learning, new or experienced teachers engage in 10 hours of self-study, self-paced training. Teachers learn about CompuScholar's online system, AP CSP skill requirements and learning objectives, the AP CSP exam format, scoring, course audit, and how to integrate AP Classroom resources into the student experience. Teachers receive yearlong support from CompuScholar's team.

Description

CS50, developed by a Harvard University professor, is an introduction to the intellectual enterprises of computer science and the art of programming for students who are comfortable and those who aren't. The curriculum assumes no prior background of students, but it is rigorous by design and programming-centric, engaging students with the fundamentals of computer science by way of hands-on programming projects. The computational-thinking skills that students ultimately acquire are broadly applicable.

Approach for Providing Service for Grant

An entry-level course for students with no prior background, CS50 AP teaches students how to think algorithmically and solve problems efficiently. The curriculum includes assessments, notes, slides, software, videos, and more. Programming languages used are Scratch, C, Python, JavaScript, and SQL. Topics include abstraction, algorithms, data structures, encapsulation, resource management, security, software engineering, and web programming. Languages include C, Python, and SQL plus HTML, CSS, and JavaScript. Problem sets inspired by the arts, humanities, social sciences, and sciences. Course culminates in a final project.

Professional Learning: CS50 offers [three-day, in-person workshops](#), with customizable tracks based on participants' interests, to teachers who make a one-year commitment to teach AP CSP in an academic year. Teachers receive ongoing support online throughout the school year from the CS50 team and experienced educators.

The Hello World AP CSP curriculum is one of a kind, where students explore computing topics and programming through Virtual Reality and Python! This curriculum is an all-in-one, turn-key solution for new and experienced teachers who are preparing students to master essential computing concepts for the AP CSP Exam. Using CoBlocks, a block-based programming language based on JavaScript, students explore and create highly engaging virtual worlds.

Approach for Providing Service for Grant

Students use Python to solve problems based on real-world data to master concepts around data processing and representation. Interwoven into this curriculum are instructional videos, Create Performance Task practice, auto-graded practice exams, a teacher dashboard, and more. This browser-based curriculum promotes autonomous student learning, creativity, student choice, and an interdisciplinary approach to programming.

Professional Learning: All teachers are provided with an online, self-paced professional development course and have access to a year-long professional learning community. Teachers will gain a thorough understanding of the AP CSP exam and be provided with a comprehensive set of tools to successfully implement the curriculum. Teachers will have access to personalized support and feedback from the Hello World team.

JuiceMind is an educational platform that provides coding quizzes and projects designed for CS teachers and students. It aims to make learning coding fun and engaging for K-12 students. The platform offers various curriculum enhancements to boost engagement and inclusivity in STEM and coding classes. JuiceMind provides products like quizzes, projects, and coding kits to help students learn coding through hands-on experiences. JuiceMind also offers a Chrome extension specifically for Replit, a popular online coding platform. The JuiceMind Replit Chrome Extension allows users to transfer Teams, Projects, and Tests from Replit.com with a simple click, enhancing the coding experience for students and teachers alike. Overall, JuiceMind focuses on bringing coding and engineering education to classrooms by providing real-world applications and interactive learning experiences. By offering a range of resources, from coding quizzes to physical coding kits, JuiceMind aims to make coding education accessible and enjoyable for students of all ages.

Approach for Providing Service for Grant

JuiceMind uses a comprehensive curriculum that builds knowledge through progressive, hands-on learning experiences. In addition to its educational offerings, JuiceMind provides a Smart Doorbell Coding Kit that is highly rated and provides a Smart Doorbell Coding Kit that is highly rated for keeping students engaged in the learning process. Description

NJCTL is a nonprofit online learning institution developed by teachers, for teachers. We are solving our nation's massive STEM teacher shortage and the social injustice that comes from depriving underserved students access to STEM education and the important opportunities this learning provides.

Through a comprehensive new pedagogy, PSI-PMI (The Progressive Science and the Progressive Mathematics Initiative); NJCTL empowers teachers to effectively teach K-12 mathematics and science and help students to learn and understand these subjects.

Approach for Providing Service for Grant

NJCTL's Computer Science Principles free curriculum teaches students how to use text-based Python programming to solve real-world problems and provides everything you need to get students programming on the first day of class. These College Board-approved teaching materials include presentations with instructional videos, guided programming activities, and interactive embedded formative assessment; classwork-homework; labs; quizzes; tests; AP test prep; unit plans and an approved AP syllabus with a yearlong plan. These comprehensive resources and materials make planning easy and fast, and no additional textbooks are needed. Designed to support a social constructivist learning environment, NJCTL materials make learning engaging and accessible to every student. Materials are also fully editable so teachers can tailor them to meet any individual needs.

Professional Learning: NJCTL's professional learning courses are online and asynchronous; teachers can learn anytime, anywhere and timely instructor support is available throughout the duration of the course. This two-course series is eligible for six graduate credits (three credits each).

Description

Project Lead The Way (PLTW) is an American nonprofit organization that develops STEM curriculum for use by US elementary, middle, and high schools. Created by teachers and led by educators, PLTW motivates, prepares, and supports teachers as they strive to make every child in every grade STEM-successful. From the first day to the last day, we're the STEM ally you and your teaching staff can count on. For more than 25 years, the heart of PLTW curriculum has been best-in-class professional development—a focus that's enabled schools in all 50 states of every type and demographic, address learning gaps and meet their STEM goals.

Approach for Providing Service for Grant

Project Lead The Way's AP CSP offering engages students in creative collaboration to explore the big ideas of computer science through our activity-, project-, and problem-based learning curriculum. Students are introduced to the Python programming language as they explore how computing impacts all careers, and develop the transportable skills needed for success.

Professional Learning: Project Lead The Way offers teachers in-depth core training to build their competence and confidence in course-specific knowledge and skills, as well as in pedagogical content knowledge. Core training consists of 80 hours in the summer and fall. Core training options are facilitated by expert Master Teachers, and cohorts leverage social learning and collective knowledge to promote collaboration through core training and community.

Description

Project STEM promotes equity in computer science and STEM through programs that help students engage, learn, and build confidence. Developed in partnership with the University of Texas at Austin's UTeach Institute, the Project STEM curriculum provides a technology-centric approach to the UTeach CS Principles curriculum. The curriculum utilizes the Scratch and Python programming languages. The Scratch and Python programming languages are suitable for students and teachers with or without prior programming experience.

AP Computer Science Principles is an introductory college-level computing curriculum that introduces students to the breadth of the field of computer science. The curriculum is designed to be equivalent to a first-semester introductory college computing course.

Approach for Providing Service for Grant

Project STEM's AP CSP curriculum reveals the foundational concepts of computer science and the impact of computing on society. The major areas of study in the curriculum are organized around big ideas that encompass ideas foundational to studying computer science. All resources are delivered on an interactive online platform with instructional videos, lesson slides, scaffolded student exercises, extensive teacher resources, support, reporting, and more.

Professional Learning: [Project STEM's Teaching Computer Science Principles](#) is a self-paced, 40-hour, online asynchronous professional development program developed and supported by veteran computer science educators. New and experienced teachers complete a series of interactive lessons and activities, which focus on foundational computing topics, curricular components, and strategies for successful course implementation.

Description

Founded by a mother who is a tech professional and designed by educators, for educators – Rex Academy’s curriculum is built around state education standards. With content for every age group, students can get a head start in elementary school, or prepare for real-world career certification in high school. With everything you need, from lesson plans to courses on topics such as cybersecurity and game development, you’ll be able to ensure that students are learning what you want. Can’t decide? You’ll get expert guidance from our team.

Approach for Providing Service for Grant

Rex K–12’s AP CSP curriculum is a project-based course that emphasizes collaboration and creativity. Students work on a series of hands-on projects throughout the year, culminating in a final project that allows them to apply their skills and knowledge to a real-world problem. Since this is an introductory course, Rex K–12’s focus is to help students develop computational thinking skills and learn how to approach complex problems using technology. The curriculum is extremely flexible, as teachers can customize it for a large classroom, direct instruction setting, or for students who prefer a more self-paced environment.

Professional Learning: Rex K–12’s professional learning is taught by subject matter experts in their various fields and is designed to give teachers a solid foundation in their specific subjects. In the case of AP CSP, it will be taught by a Python and Scratch expert. Teachers will complete a series of trainings on the Rex K–12 Technology Learning Platform (the TLP), do a deep dive into the AP CSP curriculum, and receive instructional support and checkups throughout the year.

Description

Skill Struck's AP CSP curriculum is an introductory college-level computing curriculum that introduces students to the breadth of the field of computer science. Students learn to design and evaluate solutions and apply computer science to solve problems through the development of algorithms and programs. They incorporate abstraction into programs and use data to discover new knowledge. Students also explain how computing innovations and computing systems including the internet work, explore their potential impacts, and contribute to a computing culture that is collaborative and ethical.

Approach for Providing Service for Grant

Skill Struck's course walks students through the basics of coding with HTML, CSS and Python alongside other topics such as digital citizenship, the internet, and data. Intended for students between grades 6 and 12.

Professional Learning: Skill Struck offers virtual and in-person workshops to educators planning to use Skill Struck's AP CSP curriculum. These workshops are taught by computer science curriculum experts. Teachers can also access 38 AP CSP ready-to-use lesson plans at any time. These lesson plans include in-depth activities that help teachers teach their students about the principles taught in AP CSP, and supplemental teaching materials to prepare to teach the course, whether teachers are new to or experienced in computer science.

Description

Tynker is a web-based platform that helps kids of all ages learn to code. It offers a variety of courses, tools and activities in different coding languages and topics, such as game design, web design, animation, robotics and Minecraft. Tynker uses blocks, videos, quizzes and badges to teach coding logic and skills in a fun and interactive way.

Tynker has a year-long high school curriculum designed to introduce students to the central ideas of computer science course prepares students for the AP CS Principles Exam. The curriculum covers Creative Development, Data, Computing Systems and Networks, Algorithms and Programming, Computing's Impact on Society. This introductory curriculum is designed for first-time computer science students with no prior coding experience and has no prerequisites beyond Algebra I.

Approach for Providing Service for Grant

Tynker's Computer Science Principles curriculum introduces students to the basics of computer science using Python. Students complete creative coding challenges and get patient, step-by-step instructions on programming fundamentals. They code their own playable games, analyze and chart data, explore AI, and much more. Along the way, students learn about the big ideas of computer science, including abstraction, data, algorithms, and creative development.

Professional Learning: Tynker offers a [four-day virtual training](#) workshop for teachers planning to teach AP CSP. Teachers will gain a thorough understanding of AP CSP's big ideas and scoring rubrics, as well as Tynker's classroom management and distance learning features. Valuable Tynker and College Board resources will be shared with all participants, including test resources, daily videos, classroom topic questions, teacher communities, and much more.

In Urban Arts' rigorous and evidence-based Game On curriculum, students create their own video games with original art, music, and storytelling, while developing skills needed for the AP CSP Exam. [Game On](#) is a free, research-based school support program for high schools to expand or establish an engaging and culturally relevant Advanced Placement Computer Science Principles (AP CSP) course offering through Game Design.

Approach for Providing Service for Grant

CS teachers are supported in teaching AP CSP using Game On's rigorous curriculum and evidence-based pedagogical approach. Designed to equip students with essential skills for the future, the program teaches computer science principles through game development using Unity and C#. Embedded in the 108+ hours of instruction are activities specifically designed to promote a growth mindset regarding computer science and attitudes around coding. Gaming is an accessible entry point into computer science that meets students where they're at through meaningful engagement and artistic exploration. Schools must commit to offer or begin offering an AP CSP course Includes free teacher training + stipend for participating teachers.

Description

The demands for a robust computing workforce and digitally-informed citizenry are greater than ever and growing. We are dedicated to building the next generation of information technology and computer science professionals, while providing *all* students with the knowledge and skills they need to thrive in our increasingly digital world.

As an educator, principal, or school system administrator trying to introduce new, cutting-edge CS curriculum, we know it can be overwhelming and costly. UTeach CS builds on efforts to increase diversity in the computing workforce by providing educators with affordable, evidence-based curriculum that works and is easy to use.

Approach for Providing Service for Grant

Developed by experts in STEM teaching and learning at The University of Texas at Austin, UTeach AP CS Principles encourages computational thinking and student engagement through a hands-on, project-based curriculum. Comprehensive and classroom ready, the curriculum offers detailed lesson plans, presentation slides, handouts, AP-style test banks, and access to an online student textbook. UTeach works for teachers with a variety of content backgrounds and levels of expertise through intensive scaffolding and on-demand implementation support during the school year. Programming languages: Scratch and Python. UTeach CS educators receive detailed teacher lesson plans with all the materials required to teach a successful class, as well as ongoing support to ensure educators have answers when they need them. Our courses are fully aligned with both the spirit and letter of the AP Computer Science Frameworks and endorsed by the College Board.

Professional Learning: [UTeach CS Principles professional development](#) provides a deep dive into AP CSP's course content, pedagogical approaches, and instructional strategies. PD is offered as a five-day in-person workshop and a six-week (summer) or ten-week (fall/spring) online workshop . PD is followed by year-round, on-demand support.

Texas Strategic Staffing for Residencies (TSS) Grant

Texas Strategic Staffing for Residencies (TSS)

Grant Overview

The Texas Strategic Staffing for Residencies Grant focuses on making staffing and scheduling decisions driven by immediate and long-term instructional needs. Strategic staffing support will be provided by Education Service Centers (ESCs) through the Texas Strategic Staffing for Residencies technical assistance service. School systems and EPPs will make informed decisions to implement paid teacher residencies that leverage reallocation and reinvestment of local funds to support teacher residents' wages while they engage in other instructional responsibilities such as substitute teaching, paraprofessional roles, tutoring, and more.

Evaluation Criteria

All Education Service Centers (ESCs) have a trained Texas Strategic Staffing fellow. School systems will be matched with an ESC technical assistance provider.

Additional Information

Technical Assistance provided by Education Service Center (ESC) Fellows are in-kind service to Texas Strategic Staffing for Residencies Grant awardees.

Education Service Centers (ESCs) 1-20

Description

All 20 Education Service Centers provide technical assistance and other supports to school systems and educator preparation program (EPP) partnerships to design and implement paid, yearlong High- Quality, Sustainable (HQS) Teacher Residencies.

Approach for Providing Service for Grant

Education Service Centers provide technical support to school systems and EPPs to help them make informed decisions to develop paid teacher residencies that leverage reallocation and reinvestment of local funds to support teacher residents' wages while they engage in other instructional responsibilities such as substitute teaching, paraprofessional roles, tutoring, and more in a two-year design and implementation process.

Additional Days School Year Planning and Execution Program (ADSY PEP)

Additional Days School Year Planning and Execution Program (ADSY PEP)

Grant Overview

High-quality, evidence-based ADSY programs help to prevent summer slide, i.e., learning loss created by the lack of student engagement in rigorous content between academic school years. The Additional Days School Year Planning and Execution Program (ADSY PEP) is a voluntary grant initiative designed to support school systems and open-enrollment charter schools in developing and sustaining high-quality ADSY programs. This grant program provides targeted support for the implementation of either ADSY Full Year or ADSY Summer models, helping school systems plan, launch, and refine extended learning opportunities that align with student needs and local priorities.

Evaluation Criteria

- Experience leading school and school system leaders through a design process for school day and calendar redesign based in the needs of students, parents, and educators
- Management and support of school systems and schools engaging in the school day and calendar redesign strategic planning process
- Expertise in developing and managing stakeholder engagement strategy and processes including teacher engagement and student and family communications
- Capacity to manage, support, and continually enhance the fidelity of the evidence-based ADSY PEP Full Year or Summer program model, offering on-demand leadership coaching for ADSY PEP campuses during the planning and implementation phase.

Additional Information

ADSY PEP Summer Grantees

Educational Service Centers 1, 11, and 20 are collaborating to deliver Professional Development and provide a differentiated Technical Assistance model for ADSY PEP Summer. Each grantee will be assigned one of these ESCs as their Technical Assistance provider and must collaborate with this designated provider.

ADSY PEP Full Year Grantees

ADSY PEP Full Year grantees will receive communication from the ADSY team connecting them to the approved provider for the model.

Note: *Approved Provider partnerships are essential for ensuring that school systems receive the support needed to implement high-quality, research-aligned ADSY Summer and ADSY Full Year programs.*

ESC ADSY PEP Summer Team Expertise

Region One ESC plays an active role in facilitating and promoting continuous opportunities to assist school systems in the region with project management, change management, and stakeholder engagement. These opportunities are led by a team of experts from Region One ESC, who design and conduct workshops to support state initiatives including high-quality, evidence-based summer learning programs. This includes change management academies, stakeholder engagement forums, and ongoing technical assistance, all aimed at helping school systems successfully implement research-based best practices.

Approach for Providing Service for Grant

Region One ESC is committed to improving the quality of education and learning for all students. We provide research-based professional learning opportunities that assist school systems in developing a comprehensive framework, emphasizing the vision and purpose behind instructional changes for all stakeholders. Our support includes the development of a clear, research-based system of values and guidance for both year-round and robust summer programs, along with aligning curriculum and instruction to ensure that collective learning is grounded in proven literacy and math practices. Our services include high-level planning, technical assistance, stakeholder engagement, system design, and on-site professional learning. We also offer a guided planning process to help design and implement summer programs based on research-driven best practices in academics, operations, and enrichment activities.

ESC ADSY PEP Summer Team Expertise

The Leadership and Support Department at ESC Region 11 offers an array of skills rooted in best practices across all facets of school leadership and instruction. Our team adopts a multifaceted approach to school support, encompassing professional development, technical assistance, program facilitation, customized analysis and feedback, and program management. ESC Region 11 is dedicated to making a meaningful impact by addressing needs, fostering essential connections, and delivering exceptional service. Most importantly, we are passionate about supporting school systems in ensuring that high-quality summer learning experiences are accessible to all students in Texas.

Approach for Providing Service for Grant

ESC Region 11 is dedicated to research and practice that promotes positive outcomes for all students participating in comprehensive summer learning experiences, encompassing both academic and enrichment activities. In collaboration with ESC Region 1 and ESC Region 20, we will offer school systems across the state a year-long, strategic approach to developing a comprehensive framework for summer learning. This framework will include high-quality, focused professional development, collaborative learning communities, and individualized, in-person technical support and guidance.

ESC ADSY PEP Summer Team Expertise

The Instructional Services Team at ESC-20 offers deep expertise in instructional leadership at the campus, school system, and regional levels. Our team provides technical assistance, customized professional development, system design, project management, evaluation, and stakeholder engagement to strengthen instructional excellence. Through ADSY PEP, school systems receive guidance using a Strategic Plan template and clearly defined Success Criteria that establish a comprehensive, evidence-based framework for program design and planning. By engaging the right stakeholders, addressing challenges, and strategically allocating time and resources, ESC-20 helps school systems achieve programs that deliver meaningful results.

Approach for Providing Service for Grant

ESC-20 supports summer learning through an evidence-based approach that produces measurable outcomes for students. In collaboration with ESC Region 1 and ESC Region 11, we deliver statewide assistance to school systems through a year-long strategic framework that integrates academic and enrichment opportunities. This approach combines targeted professional development, collaborative learning networks, and customized technical assistance, ensuring that every school system builds and sustains a comprehensive summer learning model aligned with grant requirements and student success.

Texas Strategic Staffing

School Action Fund (SAF)

Grant Overview

School Actions are whole-school strategies used to increase access to high-quality schools, meet community needs, and address chronic underperformance. By providing grant funds and technical assistance to support school actions for individual campuses, TEA also supports school systems to take strategic actions that both improve schools and provide parents and families with the schools and programs they want, need, and deserve. In Cycle 10 (LASO 4), the School Action Fund program supports the following bold school actions:

- Restart a struggling school
- Create a new school
- Reassign students to a higher performing school

As the School Action Fund (SAF) grant and program have evolved, so too have expectations of grantees and technical assistance providers (TAs). School Model Playbooks have been developed. SAF TAs are responsible for guiding grantees to plan and implement school designs which align with the Playbooks, given school system individual contexts.

Evaluation Criteria

- Demonstrated expertise in supporting school systems to plan and implement “school actions”: Restart, Create a New School, and Redesign actions and "models" such as Advanced STEM, ADSY Full Year, and ACE.
- Experience and results in school action-related work products, proven ability to manage complex projects with a wide set of stakeholders, progress monitoring ability and intentionality, and knowledge of the Texas education context.
- Ability to build capacity of campus and school system leaders to implement long-term learning acceleration strategies to improve instruction and grow students.
- Skilled in strategic community engagement and communication, including developing processes to gauge community need and demand, and communicating complex ideas clearly.

Additional Information

School Action Fund (SAF) Technical Assistance Providers have three primary roles in supporting SAF school system grantees—grant project manager, liaison to the TEA, and school system advisors on strategic planning and implementation of actions with fidelity.

As Project Managers, Technical Assistance providers work in tandem with the school system's grant Project Manager and team to ensure progress toward the goals of the grant and the activities necessary to implement school actions for designated schools.

In the TEA Liaison role, Technical Assistance Providers are responsible for regularly communicating school system progress with the TEA's SAF Team. Early notification of concerns and problem-solving is key to ongoing successful implementation of school actions and improved student outcomes.

SAF Technical Assistance Providers must develop a deep understanding of school system priorities, organizational strengths and needs, and 'relationship' with their communities.

SAF Technical Assistance Providers work with leaders to align school actions with a comprehensive, school system-wide continuous improvement strategy that seeks to increase the number and percentage of students in highly rated campuses.

About Us

Collegiate Edu-Nation's unwavering mission is encapsulated in the belief that ALL means ALL. We offer comprehensive capacity building support and technical assistance to students, families, schools, employees, volunteers, and consultants, spanning entire communities, with a primary focus on small & rural Texas areas. Our core objective is to break the cycle of generational poverty by empowering youth from Pre-K through postsecondary education to embark on meaningful careers. Through a systemic overhaul of traditional education systems and alignment with high-wage, high-demand careers, our P-20 System Model transforms small and rural schools and communities into centers of innovation, promising a brighter future and economic revitalization, extending far beyond the borders of Texas.

Grant-Specific Supports

CEN provides support for small and rural school systems in redesigning elementary and middle school campuses to support P-TECH high schools leading to **STEM** readiness and **college and career**/degrees and certifications for all students. CEN staff works hand in hand with school systems to increase capacity and access resources, training, and staff/leadership development to implement a P-20 System Model. We are approved to support SAF grantees with **Redesign** and **Create New** schools actions.

CEN also developed the **Rural P-20 Redesign Model Playbook**

About Us

We provide coaching, support, and facilitated experiences to create meaningful instructional practice change that drives teacher and student improvement. We build skills to implement instructional shifts that benefit students and remain ready to reassess and update approaches based on changing needs.

We help school systems solve a variety of challenges, including:

- Identifying, implementing, and scaling of instructional shifts across organizations
- Designing or redesigning existing school systems to better meet community needs
- Building the capacity of school and school system leaders to drive instructional change
- Supporting the implementation of statewide initiatives tied to instructional change

Grant-Specific Supports

In supporting Redesign and Create New School Actions, we provide direct support to school and school system teams to align initiatives and customize our approach. We coach principals, lead professional development with teachers, and focus on scaling sustainable transformation. We provide onsite assistance, training, community engagement support, project management, HQIM implementation, and school improvement/progress monitoring. Our work has been custom fit to meet the needs of the campus, not specific to a curriculum or digital platform. We utilize a 360-degree approach to goal setting, progress monitoring, and success metrics, including observations, our academically validated student perception survey, and school system/state student assessments.

About Us

Empower Schools works with state agencies, policymakers, school systems, and in partnership with communities across the United States to serve millions of students. Empower improves outcomes for urban and rural communities by developing sustainable systemic solutions at the school, school system, and state levels. 80% of students we serve identify as Black/African American, Hispanic, or experiencing poverty. Empower was founded in 2013 on the belief that partnering with communities to empower educators would lead to greater student success at school and in life. We support community partners in designing, launching, and sustaining innovative schools and school systems. We work at the systems level to propose, develop, and transform state legislation and public policy; build community support; nurture systems-level leaders; and provide equitable opportunities for all students. Empower's responsive approach is flexible and hyper-focused on the unique context and needs of the school community.

About Us

engage2learn (e2L) has been a leading Strategic Design, Talent Development Planning, and High-Performance Coaching Systems partner for more than 300 school systems and 79,000+ educators, impacting over 4.5 million students nationwide since 2011. We have extensive experience throughout Texas and the nation in bolstering school systems' ability to launch educationally sound strategies tailored to the individual needs of each school system and school, yielding improved academic achievement of participating campuses and their students. e2L has partnered with over 100 Texas school systems, from large urban to rural, that led to double-digit increases in student achievement. We have been a capacity builder for TCLAS, School Improvement (ESF), School Action Fund, BLGP, MIZ, ADSY, RSSP, Strong Foundations Planning, and Teacher Incentive Allotment.

Grant-Specific Supports

e2L has been a technical assistance provider for SAF School Action 2: Redesign a School since 2019. We do the heavy lifting in overall **project management, performance management, and progress monitoring**. Leaders are supported in aligning school actions with a comprehensive, system-wide **continuous improvement strategy**. Together we reimagine schools, develop and implement rigorous innovative models which meet community needs, and accelerate learning. We **build campus and school system staff capacity** to support, track, and monitor fidelity of implementation and progress toward an A-rating. e2L does this in partnership with school systems by:

- Facilitating a comprehensive Strategic Design process
- Creating an ESF-aligned multi-year School Design Plan and authentic stakeholder communications
- Developing a Learning Innovation Framework
- Providing teacher and leader training & coaching

About Us

Good Reason Houston's mission is to increase the number of students learning in great public schools. Good Reason Houston partners with Houston-area school systems to evaluate, plan, and implement strategies to grow and sustain great schools. This work includes building system-wide infrastructure, school creation and transformation efforts, and school improvement strategies. In addition, Good Reason Houston connects school systems with both local and national organizations to bring expertise and mobilize resources to accelerate systemic transformation.

Grant-Specific Supports

As a technical assistance provider for SAF ACE Restart, Good Reason Houston supports school systems with planning and implementation for ACE. As part of planning, Good Reason Houston provides comprehensive project management supports to advise on campus selection, support the codification of a school system's ACE model design, and facilitates cross-functional supports such as communications and community engagement. As part of implementation, Good Reason Houston works hand-in-hand with the school system to design progress monitoring systems and provide ongoing school system- and campus-level monitoring towards goals and strategic, data-driven action planning to facilitate continuous school improvement.

About Us

The MAYA team is poised to support education leaders in 1) Being results-based and data-driven, establishing clear targets and using data to assess progress and change course as needed, 2) Bringing attention to and acting on disparities; 3) Using oneself as an instrument of change to move a result, 4) Mastering the skills of “adaptive leadership”, which makes leaders aware of the impact of values, habits, beliefs, attitudes, and behaviors associated with taking action to improve results, and 5) Collaborating with others, understanding that the capacity to build consensus and make group decisions enables leaders to align their actions and move work forward to achieve results.

Grant-Specific Supports

Community Engagement and Operations Support: Supports with developing a community engagement strategy that increases awareness and positively impacts student outcomes.

Curriculum, Instruction, Professional Development, and Assessment Advising: Help schools & systems to evaluate, select, and implement quality and cultural materials, learning acceleration strategies, and assessment tools to meet the needs of all learners.

Learning Acceleration Strategic Planning: Support identifying the highest leverage strategies and target focus areas to accelerate student learning to most efficiently close gaps

State and Federal Program Assistance: Support in navigating opportunities created by public funding into sustainable strategies

School System Strategy: Support school school system strategic planning and implementation to improve student outcomes at scale.

About Us

School Empowerment Network is a nonprofit organization that empowers local leaders to create high-performing schools centered around proven design principles, rigorous and engaging instruction, and caring relationships between students and staff.

With our services—School Quality Reviews (SQRs), New School Design Fellowships, Pathways to Leadership, and Culturally-Responsive Leadership Coaching—we partner with local educators to create more equitable, high-quality schools and student outcomes informed by the most effective school design and leadership principles.

Grant-Specific Supports

SEN facilitates year-long New School Design Fellowships (NSDFs), which guide founding principals through the new school design process, culminating with the completion of individual School Design Guides.

SEN also provides a continuity of coaching from planning to opening. SEN coaches provide on-site principal and leadership team coaching throughout the crucial first and second years after school opening.

About Us

The team at Steady State, an independently owned small business, has more than three decades of experience working alongside state and local government, C-suite private sector, and business, philanthropic, and nonprofit executives to implement strategic solutions that have quickly resulted in meeting key goals and progress measures while achieving impactful outcomes for those they intend to serve.

Currently supporting 30+ social sector clients in 14 states, Steady State strongly believes that if social sector organizations are going to maximize their resources to drive impact, they must focus on their critical leverage points and attend to the systemic interdependencies within their organization and the landscape in which they operate.

Grant-Specific Supports

Supports 50+ school systems in Texas (from the smallest rural school systems to the largest urban school systems) with strategic planning and the implementation of school system and state initiatives. Steady State is the TEA Technical Assistance provider for the following initiatives:

(1) Teacher Incentive Allotment, (2) Strategic Compensation Fellowship Grant, (3) Rural Collaborative Expansion (CTE focus), (4) Accelerating Campus Excellence (ACE) Program, and (5) Resource Campus. Additionally, at the request of TEA in 2018-2019, Steady State trained 19 of the 20 Education Service Centers on how to effectively support school systems in their region design and implement state initiatives.

About Us

The Commit Partnership is a collective impact organization composed of 200+ partners across Dallas County and the state of Texas supported by a dedicated 'backbone' staff of 60+ professionals. Our Partnership's 'true north' goal is that by 2040, at least half of all 25–34-year-old residents, irrespective of race, will be provided the opportunity to earn a living wage. To increase living wage attainment, we must equitably increase educational success aligned with high demand jobs, maximizing the cumulative impact from providing a quality early education.

Grant-Specific Supports

The Commit Partnership is well-suited to support Texas school systems with the LASO SAF Grant. Since 2015 we have continued to provide outstanding support to the Texas Education Agency as a Technical Assistance provider by supporting school systems in planning and implementation of their ACE School Action Fund grant. During the 2021 -2022 school year, our team received a commendation and spotlight from TEA as six of the eight schools the team supported improved by two or more letter grades; furthering TEA's North Star Goal while improving student outcomes and increasing the number of quality seats. Additionally, during the 2021-2022 school year, Commit partnered with TNTP, to lead the North Texas Learning Acceleration Pilot at 5 local school systems. As a result, the pilot has led to the largest urban school system in North Texas implementing HQIM across half of their portfolio of schools in the 2022-2023 school year.

About Us

The Learning Agenda (TLA) is a capacity-building organization dedicated to **expanding learning opportunities** for youth within and outside of schools. We have **expertise in designing and redesigning the school day and year** to best meet the needs of students, schools, and communities.

Our clients include school systems, nonprofits and community organizations, philanthropies, and state education agencies. We support our partners in their processes to plan and implement **innovative and effective educational experiences** grounded in evidence and focused on continuous quality improvement. We prioritize **relationship-building, consistent and clear communication, and accountability to our work.**

Grant-Specific Supports

We engage in the following activities to ensure success in **Redesigning a School** or **Creating a New School**:

- Establishing a vision and coaching school leaders
- Engaging & communicating with key stakeholders including school system leadership, teachers, families & communities
- Strategic staffing and partnering with community groups
- Developing a strong instructional approach
- Promoting a positive culture and climate
- Selecting and leveraging High Quality Instructional Materials
- Promoting teacher collaboration and well-being;
- Setting goals and measuring progress
- Designing daily schedules and annual calendars
- Budgeting and sustainability

Current or Previous Work in Texas

Aldine ISD

- Serves portions of Houston and Harris County
- 60,074 students
- 91.6% economically disadvantaged
- 21.5% English language learners
- Supported Full Year Redesign, 2021-2023

Benavides ISD

- A small rural community in the southwestern corner of Duval County
- 233 students
- 89.3% economically disadvantaged
- 2.6% English language learners
- Supported Full Year Redesign for two years (2021-2023)

Grand Prairie ISD

- Located just outside Dallas, Texas
- 27,284 students
- 74.3% economically disadvantaged
- 34% English language learners
- Supported Summer Learning from 2019 - present

The Learning Agenda created comprehensive strategic planning processes and facilitated learning communities for more than **75 school systems across Texas** engaged in the **Additional Days School Year (ADSY) initiatives - both Summer Learning & Full Year Redesign**. 100% of program managers agreed that our planning process was useful to their work, and 97% said the planning process led to a high-quality design.

TLA also developed the **ADSY Full Year Model Playbook**.

About Us

We are a national nonprofit founded by teachers, TNTP helps school systems and schools put all the elements of great teaching to work so that more students graduate ready for success in college, career, and life.

Grant-Specific Supports

We offer support in vision setting & strategic planning, HQIM Implementation, PLCs, DDI, and coaching of campus leaders as well as classroom educators. Our support focuses on building leadership capacity to develop, implement, and sustain effective strategies that support all learners. The supports, resources, and strategies offered to the leader will be sustainable in the years to come.

We are offering support with School Action 2: School Redesign. We will support school system leaders in reimagining their schools, develop rigorous innovative models which will meet the needs of their community and accelerate learning.

Navigating Excellence through Targeted Supports (NEXT)

Navigating Excellence through Targeted Supports (NEXT)

Grant Overview

The Navigating Excellence Through Targeted Supports Initiative (“NEXT”) is designed to support low-performing elementary school campuses at school systems and open-enrollment charters to implement high quality math and/or reading language arts curriculum and instruction, aligned targeted tutoring, and targeted community and parent engagement.

Grantees will receive intensive support to:

- Audit and diagnose root causes to low-performance
- Ensure all educators have a deep understanding of high-quality instructional materials and research-based instructional strategies
- Build and inspire a coalition of support for instructional and operational shifts
- Implement rigorous tier 1 HQIM and evidence-based supplementary instruction
- Make strategic changes to campus operations (including staffing patterns, compensation, and/or scheduling) in the form of funding and technical assistance
- Closely monitor fidelity of implementation to drive continuous improvement efforts

Grantees that complete all required planning year requirements may be eligible for 1-2 years of continuation funding to support implementation.

Evaluation Criteria

Approved Providers (APs) will be selected to participate in this particular program based on the following criteria:

1. Experience with grant programs and initiatives similar to NEXT
2. Capacity of project leads to complete required support activities and deliverables
3. Track record of success in terms of student outcomes in grant programs and initiatives similar to NEXT

Additional Information

NEXT is currently procuring Technical Assistance Providers, tentatively scheduled to announce in March 2026.

Early College High School (ECHS)

Early College High School (ECHS)

Grant Overview

The ECHS grant offers campuses an opportunity to plan to build an Early College High School within their school system. Early College High Schools (ECHS) offer opportunities for campuses to provide targeted supports for historically underserved students through rigorous instruction and accelerated postsecondary courses to provide academic and wrap around strategies that help students succeed in college level coursework at no cost to the students. The ECHS grant requires a campus to maintain a partnership with an institution of higher education (IHE) that will serve to provide dual credit opportunities to the ECHS.

Evaluation Criteria

- Experience and expertise in supporting school systems to develop and implement a strategy for successfully launching and scaling new ECHS programs through their first graduating cohort
- Ability to manage, support, and continuously improve the fidelity of implementation to the ECHS blueprint with on-demand leadership coaching for ECHS campuses in planning
- Development and deployment of formative and summative assessments for campus leadership teams to: identify gaps in fidelity to the ECHS Roadmap to opening and ECHS Blueprint, document campus-based strengths and challenges, identify capacity challenges, and synthesize leadership priorities for technical assistance
- Monitoring technical assistance to ensure and improve fidelity to the design components of the ECHS Blueprint to support campuses in meeting the outcomes-based measures including an annual review process

Additional Information

Early College High School and Pathways in Technology Early College High Schools are provided technical assistance by Educate Texas at no additional cost to their campus or school system.

School systems seeking additional technical assistance support from other providers may locally decide to do so in addition to the no cost technical assistance provided by Education Texas on behalf of the Texas Education Agency.

About Us

Educate Texas, an initiative of Communities Foundation of Texas (CFT), leads a high impact portfolio of innovative programmatic interventions, groundbreaking research, and critical policy strategies that benefit millions of Texas students. Our experience, relationships, and understanding of the education ecosystem (K-12, higher education, state agencies, workforce) puts us in a unique position to collaborate with practitioners, philanthropic partners, policymakers, and civic leaders to provide Texas students with a strong educational foundation to earn a college degree or credential that leads to a living wage and thriving communities.

Grant-Specific Supports

Educate Texas' strategy is rooted in the theory of continuous improvement, using data and insights from a variety of sources to inform strategic decisions. Our partnership with the TEA as a technical assistance provider for the CCRSM network (550+ ECHS and P-TECH campuses) supports campus leadership teams in implementing ECHS and P-TECH models and ensuring program sustainability and growth through coaching and professional development. Educate Texas has provided support for P-TECH since its inception. Technical assistance provided by Educate Texas through membership in our CCRSM Network is free to grantees. Grant funds are not required to be used to pay for technical assistance.

Pathways in Technology Early College High School (P-TECH)

Pathways in Technology Early College High School (P-TECH)

Grant Overview

The Pathways in Technology Early College High School (P-TECH) program is an open-enrollment initiative that offers campuses an opportunity to plan to build a P-TECH within their school system. Designed to support historically underserved and at-risk students, P-TECH schools offer opportunities for students to earn a high school diploma while simultaneously earning industry certifications, and/or an associate degree on or before the sixth anniversary of a student's first day of high school. The P-TECH grant requires a campus to maintain a partnership with an institution of higher education (IHE) to provide dual credit opportunities to the P-TECH academy students and with a business/industry partner to provide work-based learning experiences.

Evaluation Criteria

- Experience and expertise in supporting school systems to develop and implement a strategy for successfully launching and scaling new P-TECH programs through their first graduating cohort
- Ability to manage, support, and continuously improve the fidelity of implementation to the P-TECH blueprint with on-demand leadership coaching for P-TECH campuses in planning
- Development and deployment of formative and summative assessments for campus leadership teams to: identify gaps in fidelity to the P-TECH Roadmap to opening and P-TECH Blueprint, document campus-based strengths and challenges, identify capacity challenges, and synthesize leadership priorities for technical assistance
- Monitoring technical assistance to ensure and improve fidelity to the design components of the P-TECH Blueprint to support campuses in meeting the outcomes-based measures including an annual review process

Additional Information

Early College High School and Pathways in Technology Early College High Schools are provided technical assistance by Educate Texas at no additional cost to their campus or school system.

Virtual and Hybrid Program Accelerator (VHPA)

Virtual and Hybrid Program Accelerator (VHPA)

Grant Overview

The Virtual and Hybrid Program Accelerator (VHPA) supports the development and refinement of high-quality virtual and hybrid programs, in the following key areas:

- Technical Assistance: Customized coaching to design, launch, and improve high-quality virtual or hybrid programs.
- Program Design: Guidance on creating strong student learning experiences, staffing models, and operational systems.
- Academic Strategy: Support for developing rigorous curriculum and personalized learning for virtual/hybrid settings.
- Teacher Development: Training on effective virtual instruction and technology integration.

Evaluation Criteria

Provider selected based on the following criteria:

1. Experience with supporting school systems launch virtual and hybrid programs or campuses
2. Capacity of project leads to complete required support activities and deliverables for the program
3. Track record of success in terms of operational and academic outcomes in other initiatives similar to VHPA

Additional Information

VHPA is currently procuring Technical Assistance Providers, tentatively scheduled to announce in March 2026. School systems will be partners with a provider through the VHPA program.
